

CONTENTS

- | | |
|--|-----------|
| 1 – Polaris | I |
| <i>Learning the basics from the laziest star in the sky</i> | |
| 2 – 61 Cygni | 15 |
| <i>Measuring the distance to a flying star</i> | |
| 3 – Aldebaran | 27 |
| <i>How the colour of a giant reveals its hidden secrets</i> | |
| 4 – Mizar (and friends) | 43 |
| <i>A quick waltz among multiple stars</i> | |
| 5 – Alcyone and her sisters | 59 |
| <i>How the sky's most beautiful star cluster inspired a very important diagram</i> | |
| 6 – The Sun | 73 |
| <i>The star on our doorstep and what it can tell us</i> | |

- 7 – The Trapezium and other wonders** 87
Nebulae and the origins of stars
- 8 – T Tauri** 101
The nitty gritty of starbirth
- 9 – Proxima Centauri** 113
Dwarf stars that pack a surprising punch
- 10 – Helvetios** 127
In search of strange new worlds
- 11 – Algol** 139
Variable stars and hidden binaries
- 12 – Mira** 153
Of red giants and pulsating stars
- 13 – Sirius (and its sibling)** 167
The brilliant Dog Star and its secretive companion
- 14 – RS Ophiuchi** 181
A star that occasionally goes bang, and will one day go boom
- 15 – Betelgeuse** 195
The biggest stars in the sky and how to measure them
- 16 – Eta Carinae** 207
Discovering the fate of monster stars
- 17 – The Crab Pulsar** 221
A famous supernova, and what it left behind

18 – Cygnus X-1	233
<i>Searching for a black hole in a dark Universe</i>	
19 – Eta Aquilae	245
<i>Cepheids – a measuring tape for the cosmos</i>	
20 – Imposter #1: Omega Centauri	257
<i>Globular clusters: stellar cities with ageing populations</i>	
21 – S2	271
<i>A journey to the centre of the galaxy</i>	
22 – Imposter #2: The Andromeda Nebula	285
<i>A neighbouring galaxy – and the wider Universe</i>	
23 – Imposter #3: 3C 273	299
<i>Quasars – beacons in the distant cosmos</i>	
24 – Supernova 1994D	313
<i>Dark matter, dark energy and the end of everything</i>
