CONTENTS

INTRODUCTION 11

PART I Theory 13

1. SURVEY OF THE FUNDAMENTAL NOTIONS . 14

1.1 Sets and basic operations 14
1.1.1 Classes and sets 14
1.1.2 Basic operations 15
1.2 Relations and structures 16
1.2.1 Relations and functions 16
1.2.2 Structures 18
1.3 First-order logic 22
1.4 Formal languages 24

2. FUZZY SET THEORY 27

2.1 Reasoning on the notion of a fuzzy set 27
2.2 The notion of a fuzzy set 29
2.2.1 Definition of a fuzzy set 29
2.2.2 The lattice of membership grades 32
2.2.3 Representation theorem and cardinality of fuzzy sets 43
2.3 Operations on fuzzy sets 46
2.3.1 Basic operations 46
2.3.2 Other important notions and their properties . 51
2.3.3 Extension principle 57
2.3.4 Operations on fuzzy sets of type 2 60
2.3.5 Measures of fuzziness 62
2.4 Fuzzy structures 66
2.4.1 Fuzzy relations and structures 67
2.4.1(a) Fuzzy relations and functions 67
2.4.1(b) Fuzzy relation equations 74
2.4.1(c) Fuzzy functions 78
2.4.2 Similarity relations 82
2.4.3 Special fuzzy structures 85

2.4.3(a) Fuzzy ordering 86
2.4.3(b) Fuzzy groups 87
2.4.3(c) Fuzzy topology 88
2.4.3(d) Probability of fuzzy events 89
2.5 Fuzzy numbers 91
2.5.1 Basic properties of fuzzy numbers 91
2.5.2 Basic operations on fuzzy numbers 95
2.5.3 Ordering of fuzzy numbers 98

3. THE MODEL OF NATURAL LANGUAGE SEMANTICS AND LINGUISTIC VARIABLES . . **101**

3.1 The model of natural language semantics 101
3.1.1 The semantics of words 101
3.1.2 The semantics of expressions 104
3.1.3 Linguistic modifiers 110
3.2 Linguistic variables 117
3.3 The linguistic approximation 120

4. FUZZY LOGIC **127**

4.1 Many-valued first-order fuzzy logic 127
4.1.1 Introduction 127
4.1.2 Truth values and generalised functions . . . 128
4.1.3 Syntax and semantics of first-order fuzzy logic 130
4.1.4 Fuzzy theories of the first order 138
4.1.5 Completeness theorems 142
4.2 Linguistic logic 144
4.2.1 Linguistic truth values 145
4.2.2 Expressing linguistic truth values 147
4.3 Approximate reasoning 148

PART II Applications **153**

5. DECISION AND CONTROL **154**

5.1 Decision 154
5.1.1 Decision in a fuzzy environment 154
5.1.2 Determination of weights 158
5.1.3 Decision based on aggregation of preferences 161
5.1.4 Decision based on a linguistically expressed contribution of alternatives 162
5.2 Control 166
5.2.1 The fuzzy controller 166

5.2.2 Examples of fuzzy controllers 171
5.3 Presentation of information 174
5.3.1 Reduction of information 174
5.3.2 Toleration search of misspelled words . . . 174

6. FUZZY SYSTEMS **181**

6.1 Dynamic fuzzy systems 181
6.2 General fuzzy models, examples and methodology . 186
6.2.1 General fuzzy models 186
6.2.2 Some examples of fuzzy models 189
6.2.3 Methodology of fuzzy model construction . 192
6.3 Evaluation of system behaviour 193
6.4 Preference of system parameters 196
6.5 Fuzzy automata 201

7. FUZZY ALGORITHMS AND PROGRAMMING LANGUAGES **205**

7.1 Fuzzy algorithms 205
7.1.1 The concept of the fuzzy algorithm 207
7.1.2 Interpretation and execution of fuzzy instructions 211
7.2 Linguistically oriented programming languages . . . 211
7.2.1 Introduction 211
7.2.2 The programming language L.P.L. 211
7.2.3 The possible applications of linguistically oriented programming languages 214

8. OTHER APPLICATIONS **216**

8.1 Linear programming 216
8.2 Cluster analysis and pattern recognition 217
8.3 Situation analysis in power system working 218
8.4 Database systems 219
8.5 Psychology 220
8.6 Applications in other fields 221

9. GENERAL PROBLEMS OF FUZZY SET THEORY **222**

9.1 Determination of the membership function 222
9.2 Theoretical problems with the foundations of fuzzy set theory 226
9.2.1 Vagueness and indiscernibility 226
9.2.2 Alternative set theory 227
9.2.3 Fuzzy equality and nebulae 229

9.2.4 Axiomatisation of fuzzy sets 231
9.2.5 Discussion 232
9.3 Historical remarks 233

A short dictionary of fundamental terms 235
