Part I Some Information on Climate and Emissions. World Transformation on the Example of Poland

1	Introduction—Some Facts and Opinions	3
2	Some Information on Climate and Emissions. Where Are We Heading?	7
2.1	Fragile Climate Balance	8
2.2	Reports of IPCC and WMO. In the Centre of Disputes	10
2.3	Interesting Scenarios of National Geographic	12
2.4	Other Opinions	14
2.5	Climate Apartheid. Climate Denialism	17
	References	19
3	CO ₂ Emissions. Will the European Union Become “Don Kichot” in a Lonely Fight?	21
3.1	European Green Deal. A New Idea	22
3.2	Will Coronavirus Pandemic Slow Down the Process of Green Deal? Will It Change the World?	24
3.3	European Green Deal—Road Map—Key Actions	30
	References	31
4	Energy Industry: Visions, Forecasts, Scenarios	33
4.1	We Need to Look at the Energy for the Future from Another Perspective—The Role of New IT Tools, Electromobility, Smart Cities	34
4.2	Is the Sun and Hydrogen Age Ahead of Us?	39
4.3	Scenarios of the International Energy Agencies	40
4.3.1	Dominant Position of Renewable Energy Sources	41
4.3.2	Electricity	43
4.3.3	Hydrogen	44
4.3.4	WWS (Wind, Water, Sun) Plan—100% RES	45

4.3.5	Community Energy Based on Disseminated Energy Appliances/Renewable Energy Sources Technologies	46
4.3.6	Transformation Costs	49
4.3.7	Prospective Technologies for Community Energy	49
4.4	Power-to-X Technologies	50
	References	51
5	Transformation in Poland. Scenarios. Controversies. Programs	53
5.1	Official Documents: Energy Policy of Poland Until 2040 (EPP2040), Energy Plus, Report of the Power Engineering Problems Committee of the Polish Academy of Sciences	53
5.2	European Green Deal Versus Poland	58
5.3	Other Scenarios	58
5.4	Smog—Pressing Problem of Poland and Other Eastern European Countries	62
5.5	Electromobility in Poland	68
5.6	Polish Hydrogen Strategy	72
5.7	Controversies—Dilemmas	75
	References	77
6	Which Energy Mix for Poland and for Other Countries of the World Based on Coal Energy?	79
6.1	The Role of Gas in Energy Mix	83
6.2	“My Energy” Program	84
6.3	Closed Circuit Economy	86
	Reference	87
Part II Human Impact on Progressive Climate Change, New Trends in Social Behaviour in the Fight Against Climate Change		
7	Afterthoughts and Conclusions	91
8	Energy Poverty	93
8.1	Description of the Phenomenon and Definition of Energy Poverty	93
8.2	Energy Poverty and the Problem of Smog	94
8.3	Preventive Actions	98
	References	100
9	Smart Cities	101
9.1	Introduction to the Subject of Smart Cities	101
9.2	Standards Sharing, Integration and Activation	104
9.3	Smart City Standards—Building the Foundations of ALLternet Infrastructure (ALL)	107

9.4	Development Opportunities Based on the Idea of Smart Cities	113
	References	114
10	Industry 4.0—The Fourth Industrial Revolution	115
10.1	What is the Fourth Industrial Revolution?	115
10.2	Industrial Revolutions in the Past and Their Impact on the Environment and Urban Space	117
10.3	What is Industry 4.0?	118
10.3.1	Beacons, Geolocation and Augmented Reality	122
10.3.2	Cloud Computing	124
10.3.3	Artificial Intelligence	128
10.3.4	Big Data and Data Analysis	132
10.3.5	Systems Integration	133
10.3.6	Simulations	134
10.4	Social Aspects of Industry 4.0	135
10.5	Industry 4.0 and Business	139
	References	140
11	A Few Words to Sum Up	141

Part III Influence of Technologies Developed at IMP PAN on the Process of Energy Transformation in Poland

12	Before We Start	145
13	Polish Academy of Sciences and the Institute of Fluid-Flow Machinery in a Nutshell	147
13.1	Polish Academy of Sciences	147
13.2	The Robert Szewalski Institute of Fluid-Flow Machinery of the Polish Academy of Sciences	149
13.3	Topics, Structure, Research Teams	149
13.4	Science Schools	153
13.5	Historical Background with a Hint of Nostalgia	166
13.6	Branch Office—KEZO Research Centre in Jabłonna	168
14	How to Start the Energy Transformation	175
14.1	The Direction of Energy Transformation According to the Authors	175
14.2	Smart Municipality/Smart Region as an Example of a Possible Transformation Path	182
14.3	Energy Mapping and Selection of Appropriate “Clean” Technologies	185
	Reference	190

15 Technologies Necessary to Carry Out the Energy Transformation	191
15.1 Introduction, Presentation of the Institute's Key Projects	191
15.2 Municipal Energy Centre (GCE)—A Computer System for Managing Energy Resources in Municipalities	205
15.3 Energy Technologies for Agricultural Municipalities	206
15.3.1 Installation of Gasification of Straw Bales	207
15.3.2 Microturbines in Food Production	209
15.3.3 Purification of Syngas	210
15.3.4 Agricultural Biogas Plant. Installation in Bałdy	210
15.3.5 Installation for Obtaining Water Biomass	211
15.4 Large Installations on an Industrial Scale	212
15.4.1 "Żychlin" Installation	213
15.4.2 "Szepietowo" Installation	214
15.4.3 "Lubań" Installation	215
15.4.4 "Bałdy" Installation	217
15.5 Cogeneration Systems	217
15.5.1 Laboratory of Polygeneration Micro-Power Plants	218
15.5.2 Pyrolysis Gasifiers	219
15.5.3 Cogeneration System with Fuel Cells	219
15.5.4 Prototype of the ORC Home Microgeneration Plant with Micro-Turbines and a Multi-Fuel Boiler	220
15.5.5 Coupled Biomass Gasification System with SOFC Cells	222
15.5.6 Development of Microturbines at IMP PAN. Use of Waste Heat	222
15.6 Energy Storage	226
15.6.1 Hybrid Energy Storage	228
15.6.2 Heat and Cold Storages	228
15.7 Anti-smog Technologies Developed at IMP PAN	231
15.7.1 Low-Power Electrostatic Precipitator for Older Boilers in Domestic Installations	232
15.7.2 Ultra-Low Emission Coal Boiler	234
15.7.3 Home Cogeneration Plant	236
15.7.4 Scaling. A Series of Types of Higher Power Plants	237
15.7.5 Fighting for Clean Air. National Clean Air Centre at CB KEZO in Jabłonna	237
15.8 Institute's Works for the Development of Hydropower	239
15.9 Small Wind Energy at IMP PAN	243
15.9.1 Introduction and Basic Information	243
15.9.2 Design and Operation of Windmills	245
15.9.3 An Innovative Solution of IMP PAN	247
References	251

16 Other Activities of the Institute for Energy Transformation	253
16.1 LowTEMP Project—Low-Temperature City Heating	253
16.2 Act Now!—Reduction of Energy Consumption in Buildings	255
16.3 WASTEMAN Project—Waste Management	257
16.4 CIRTOINNO Project—Circular Economy for Tourism	260
16.5 The Green Gate of Kashubia (Kaszuby in Polish)	262
16.6 Legionowo Energy Cluster	264
16.7 SuPREME Project—Works at CB KEZO	267
17 Summary and Acknowledgements	271
