

CONTENTS

1. INTRODUCTION	7	4.2.4. Hydrochemistry	47
2. METHODS OF HYDROGEOLOGICAL SYNTHESIS	8	4.2.5. Groundwater utilization	47
2.1. Geological setting	10	4.3. Balance unit 3 – Cretaceous sediments of the České středohoří Mts.	47
2.2. Definition of aquifers and aquitards	10	4.3.1. Definition of the balance unit	47
2.3. Groundwater flow systems	10	4.3.2. Hydrogeology	48
2.4. Model solutions	11	4.3.2.1. Aquifer A	49
2.5. Boundaries of balance units and hydrogeological units	11	4.3.2.2. Aquifer BC	50
2.6. Hydrochemistry	12	4.3.2.3. Aquifer D	51
2.7. Groundwater resources	12	4.3.2.4. Groundwater flow in aquifer A	51
3. GEOLOGY OF THE BOHEMIAN CRETACEOUS BASIN	14	4.3.2.5. Groundwater flow in aquifer BC	52
3.1. Principal geological characteristics of the Bohemian Cretaceous Basin	14	4.3.2.6. Groundwater flow in aquifer D	53
3.2. Stratigraphy and lithofacies development of the Cretaceous Basin	16	4.3.3. Hydrology	53
3.2.1. Peruc-Korycany Formation	16	4.3.4. Hydrochemistry	53
3.2.2. Bílá hora Formation	19	4.3.4.1. Aquifer A	53
3.2.3. Jizera Formation	20	4.3.4.2. Aquifer BC	54
3.2.4. Teplice Formation and Rohatce Member	24	4.3.4.3. Aquifer D	54
3.2.5. Březno Formation	25	4.3.5. Groundwater utilization	54
3.2.6. Merboltice Formation	28	4.4. Balance unit 4 – Cretaceous sediments of left-sided tributaries of the Labe River between Ústí nad Labem and Český Brod	55
3.3. Structural and tectonic setting	29	4.4.1. Definition of the balance unit	55
3.3.1. Segment A	30	4.4.2. Hydrogeology	56
3.3.2. Segment B	30	4.4.2.1. Aquifers and aquitards	56
3.3.3. Segment C	31	4.4.2.2. Groundwater flow	57
3.3.4. Segment D	33	4.4.3. Hydrology	58
3.3.5. Segment E	33	4.4.4. Hydrochemistry	58
3.3.6. Segment F	34	4.4.5. Groundwater utilization	59
3.3.7. Summary	34	4.5. Balance unit 5 – Cretaceous sediments of the Železné hory Mts. slopes, Čáslavská kotlina Valley and Dlouhá mez	59
4. HYDROGEOLOGY OF THE BOHEMIAN CRETACEOUS BASIN	36	4.5.1. Definition of the balance unit	59
4.1. Balance unit 1 – Cretaceous sediments of right-sided tributaries of the Labe River between Brandýs nad Labem and Lovosice	38	4.5.2. Hydrogeology	59
4.1.1. Definition of the balance unit	38	4.5.2.1. Aquifers and aquitards	59
4.1.2. Hydrogeology	38	4.5.2.2. Groundwater flow	60
4.1.2.1. Aquifers and aquitards	38	4.5.3. Hydrology	61
4.1.2.2. Groundwater flow in aquifer A	40	4.5.4. Hydrochemistry	62
4.1.2.3. Groundwater flow in aquifer C	41	4.5.5. Groundwater utilization	62
4.1.3. Hydrology	42	4.6. Balance unit 6 – Vysoké Mýto Syncline 4.6.1. Definition of the balance unit	62
4.1.4. Hydrochemistry	42	4.6.2. Hydrogeology	63
4.1.5. Groundwater utilization	42	4.6.2.1. Aquifers and aquitards	63
4.2. Balance unit 2 – Cretaceous sediments of the Jizera River basin	43	4.6.2.2. Groundwater flow in aquifer B	64
4.2.1. Definition of the balance unit	43	4.6.2.3. Groundwater flow in aquifer Ca	65
4.2.2. Hydrogeology	44	4.6.2.4. Groundwater flow in aquifer Cb	65
4.2.2.1. Aquifers and aquitards	44	4.6.3. Hydrology	66
4.2.2.2. Groundwater flow in aquifer A	45	4.6.4. Hydrochemistry	66
4.2.2.3. Groundwater flow in aquifer C	45	4.6.5. Groundwater utilization	66
4.2.2.4. Groundwater flow in aquifer D	45	4.7. Balance unit 7 – Ústí Syncline 4.7.1. Definition of the balance unit	67
4.2.3. Hydrology	46	4.7.2. Hydrogeology	67
		4.7.2.1. Aquifers and aquitards	67
		4.7.2.2. Groundwater flow in aquifer B	69
		4.7.2.3. Groundwater flow in aquifer C	70
		4.7.3. Hydrology	71
		4.7.4. Hydrochemistry	71
		4.7.5. Groundwater utilization	71
		4.8. Balance unit 8 – Kyšperk Syncline 4.8.1. Definition of the balance unit	72

4.8.2. Hydrogeology	72	4.10.1. Definition of the balance unit	80
4.8.2.1. <i>Aquifers and aquitards</i>	72	4.10.2. Hydrogeology	80
4.8.2.2. <i>Groundwater flow</i>	73	4.10.2.1. <i>Aquifers and aquitards</i>	80
4.8.3. Hydrology	74	4.10.2.2. <i>Groundwater flow</i>	81
4.8.4. Hydrochemistry	74	4.10.3. Hydrology	81
4.8.5. Groundwater utilization	75	4.10.4. Hydrochemistry	81
4.9. Balance unit 9 – Cretaceous sediments north of the Jílovce Fault	76	4.10.5. Groundwater utilization	82
4.9.1. Definition of the balance unit	76	5. EVALUATION OF GROUNDWATER BASINS	83
4.9.2. Hydrogeology	76	5.1. Hydrological parameters of groundwater resources	83
4.9.2.1. <i>Aquifers and aquitards</i>	76	5.2. Residence time of groundwater	84
4.9.2.2. <i>Groundwater flow</i>	77	6. GROUNDWATER RESOURCES	87
4.9.3. Hydrology	79	REFERENCES	88
4.9.4. Hydrochemistry	79		
4.9.5. Groundwater utilization	79		
4.10. Balance unit 10 – Cretaceous sediments of the middle Labe River	80
