

Contents

The Cambridge Encyclopedia of Language is organized in 11 parts, comprising 65 thematic sections. Each section is a self-contained presentation of a major theme in language study, with cross-references included to related sections and topics.

Preface to the first edition vi

Preface to the second edition vii

I Popular ideas about language 1

Widely held linguistic beliefs and attitudes, and the basic functions of language.

1 The prescriptive tradition 2

Popular notions of linguistic authority and correctness; purism and language change; the role of linguistic description.

2 The equality of languages 6

Myths about primitive languages and language superiority.

3 The magic of language 8

Linguistic superstitions and verbal taboos; the mystical power of proper names.

4 The functions of language 10

The many cultural, social, and personal roles which language performs.

5 Language and thought 14

The complex relationship between language and thinking; the notion of language relativity.

II Language and identity 17

The many ways in which language expresses a person's individuality or social identity.

6 Physical identity 18

The relationship between language and age, sex, physical type, and physical condition; voiceprints; male vs female speech.

7 Psychological identity 22

The relationship between language and personality, intelligence, and other psychological factors.

8 Geographical identity 24

The regional background of a speaker; accents, dialects, linguistic areas, and the study of dialectology.

9 Ethnic and national identity 34

Language, ethnicity, and nationalism; the problem of minority languages and dialects.

10 Social identity 38

Language and social stratification, class, status, role, solidarity, and distance; the problem of sexism; borrowings.

11 Contextual identity 50

Situationally determined varieties of speech and writing; restricted and secret language; verbal play and art; word games.

12 Stylistic identity and literature 68

The concept of style; authorship identity and forensic linguistics; literary language in poetry, drama, and prose.

III The structure of language 83

The dimensions of language analysis that underlie all forms of language, whether spoken, written, or signed.

13 Linguistic levels 84

The relationship between the main components of language analysis; models of linguistic structure.

14 Typology and universals 86

Analysing the structural similarities and differences among the languages of the world.

15 The statistical structure of language 90

The study of the statistical regularities found in language; the frequency of sounds, letters, and words.

16 Grammar 92

Syntax and morphology; the structure of words, phrases, clauses, and sentences.

17 Semantics 104

The study of meaning in language; the semantic analysis of words and sentences.

18 Dictionaries 112

The use and evaluation of dictionaries; the past, present, and future of lexicography.

19 Names 116

Patterns and trends in the use of personal names; place names and their history.

20 Discourse and text 120

The study of stretches of spoken and written language above the sentence; the nature of conversation; analysing textual structure.

21 Pragmatics 124

The factors that govern our choice of language in social interaction; speech acts and their analysis; effect of the Internet.

IV The medium of language: speaking and listening 129

The study of the auditory-vocal channel of communication; the production, transmission, and reception of speech.

22 The anatomy and physiology of speech 130

The vocal tract and vocal organs; the nature of articulation.

23 The acoustics of speech 138

The nature of sound waves and the way they transmit speech; the sound spectrograph and its use in speech sound analysis.

24 The instrumental analysis of speech 144

Some of the techniques used in the analysis of speech acoustics and physiology.

25 Speech reception 148

The ear, and the process of hearing; speech perception and its investigation.

26 Speech interaction with machines 155

The principles and practice of automatic speech recognition and speech synthesis.

27 The sounds of speech 160

Phonetics; the description of vowels and consonants; kinds of phonetic transcription.

28 The linguistic use of sound 168

Phonology; phonemes, distinctive features, and other models; comparing the sound systems of languages.

29 Suprasegmentals 177

The prosody of speech; the structure of intonation; tone languages; the relationship between speech and music.

30 Sound symbolism 182

The relationship between sounds and meaning; the role of onomatopoeia.

V The medium of language: writing and reading 185

The study of the development and functions of written language, in all its forms.

31 Written and spoken language 186

The relationship between speech and writing; how sound is portrayed in written language.

32 Graphic expression 190

The physical substance of written language; types of graphic expression; handwriting, print, typing, and electronic forms.

33 Graphology 204

The writing system of a language; the history of writing; the alphabet; spelling, punctuation, and other contrasts; systems of shorthand.

34 The process of reading and writing 218

Psychological accounts of the process of reading, writing, and spelling; spelling regularity and spelling reform.

VI The medium of language: signing and seeing 229

The development and use of deaf sign languages.

35	Sign language	230	Popular fallacies about sign language; the development and use of signs by the deaf.
36	Sign language structure	232	The way signs are used to convey grammatical contrasts; American Sign Language.
37	Types of sign language	234	The range of contrived sign languages; finger spelling, cued speech, and other systems.
VII	Child language acquisition	237	
	The study of the way children learn to understand and speak their mother tongue – methods, theories, and findings; later language learning in school.		
38	Investigating children's language	238	Techniques for finding out about child language; speech production and comprehension; theories of language acquisition.
39	The first year	246	The development of infant vocalization; early speech perception and interaction.
40	Phonological development	250	The acquisition of the sound system; the learning of vowels, consonants, and intonation.
41	Grammatical development	252	The acquisition of grammar; growth in sentence length and complexity.
42	Semantic development	254	The acquisition of vocabulary; first words and their content; distinguishing the meanings of words.
43	Pragmatic development	256	The acquisition of conversational skills; the language of twins.
44	Language development in school	258	The study of language in school; later oral development; learning to read and write.
VIII	Language, brain, and disability	267	
	The neurological basis of language, and the range of physical or psychological problems that can give rise to disabilities in spoken, written, or signed language.		
45	Language and the brain	268	Brain structure and function; hemispheric dominance and localization; slips of the tongue and critical periods.
46	Language disability	274	Incidence, causation, and classification; deafness, aphasia, dyslexia, dysgraphia; disorders of voice, articulation, and fluency; language delay; alternative communication systems and aids.
IX	The languages of the world	293	
	The range of languages in past or present use – numbers, speakers, sources; identifying and explaining linguistic change.		
47	How many languages?	294	Identifying, counting, and classifying the languages of the world
48	How many speakers?	296	Determining how many people speak a language; the world's most widely used languages and families.
49	The origins of language	298	Myths and experiments about the origins of language; wolf children; humans and primates; the evidence of palaeontology.
50	Families of languages	302	Discovering the history of languages; comparative philology; the language families of the world.
51	The Indo-European family	306	The history of Indo-European languages, where they are spoken, and how they are classified.
52	Other families	314	The distribution, family grouping, and use of the world's languages (other than Indo-European).
53	Language isolates	336	Languages which cannot be related to any of the major families.
54	Language change	338	The identification of change in sounds, grammar, and vocabulary; glottochronology; explanations for language change.
55	Pidgins and creoles	344	The origins, distribution, and present-day use of the world's pidgins and creoles.
X	Language in the world	351	
	The problems of communication posed by the diversity of the world's languages and varieties, and the search for solutions.		
56	The language barrier	352	The problems caused by foreign languages in the field of international communication; language and the business world.
57	Translating and interpreting	354	The principles and practice of translating and interpreting; the role of machine translation.
58	Artificial languages	362	The history of artificial languages, and the present-day position; Esperanto, Basic English, and other systems.
59	World languages	367	The international use of languages; official languages; World English and its varieties.
60	Multilingualism	372	Causes and extent of bilingual attitudes and practice; language maintenance and shift; language switching.
61	Language planning	376	Government policies about language selection and use; bilingual educational programmes; endangered languages.
62	Foreign language learning and teaching	388	The role and status of foreign languages in school and society; theories of language learning, and methods of language teaching; language materials and laboratories.
63	Language for special purposes	398	The development of special varieties of language in science, medicine, religion, the law, the press, advertising, broadcasting, and the Internet; the related problems of intelligibility and change.
XI	Language and communication	419	
	The relationship between language and other systems of human and non-human communication, and the scientific study of language.		
64	Language and other communication systems	420	Language defined; chimpanzee communication; semiotics; communication by non-linguistic sound, face, gesture, and touch.
65	Linguistics	428	The history of ideas in language study; domains and personalities in 20th-century linguistics; linguistic methods; natural language processing.
	Appendices	439	
I	Glossary	440	
II	Special symbols and abbreviations used in the encyclopedia	462	
III	Table of the world's languages	465	
IV	Further reading	484	
V	References	489	
VI	Index of languages, families, dialects, and scripts	494	
VII	Index of authors and personalities	498	
VIII	Index of topics	501
