<i>List of Figures and Tables</i>	xi
<i>About the Author</i>	xiii
<i>Acknowledgements</i>	xv
<i>Foreword</i>	xvii
1 Cooking, medicine and evidence	1
The moral of the burnt steak...	1
Why masterchefs have it easier than teachers	2
Further thinking: Why the education pyramid cannot be right	2
Frustration	3
Further thinking: Jill Watson	4
A cause for optimism	5
Further thinking: How can you best help your child with their homework?	7
Evidence-based versus evidence-informed	8
A plea for the informed amateur	11
What this book is and is not	12
To cut it short	12
2 Prior knowledge: how learning begins	15
The spam-filter in our head	15
Further thinking: Working memory and short-term memory: synonyms?	17
Why is prior information important?	17
Further thinking: One of the oldest didactic principles: relate your teaching to the environment of the learner	18
Choosing the right situational methods for Ann and David	19

Further thinking: What is direct instruction and what is (self-)discovery learning?	19
Further thinking: Perhaps the most important graphic from PISA 2015	22
How can we make a valid choice between teaching methods in terms of the pupil's prior knowledge?	23
Further thinking: What is an advanced organizer?	24
What if the prior knowledge contains errors?	25
The danger of focusing on the learner's personal environment	26
To cut it short	29
3 The subject matter knowledge of the teacher	31
Further thinking: Difficult words don't make you seem any smarter	32
How can you best use your subject matter knowledge in the classroom?	33
Scaffolding: the right support and the right time	33
Further thinking: Zone of proximal development, zone of proximal learning or rather scaffolding?	35
Subject matter knowledge as a minimum requirement for class management	36
Further thinking: The imposter syndrome	36
Subject matter knowledge as an element in the relationship between pupils and teachers	37
When can subject matter knowledge hinder learning?	37
Further thinking: Is subject matter similarly important for different subjects?	38
To cut it short	39
4 Make them think!	41
Do you always have to think to learn?	43
Further thinking: Why fluorescent pens don't work	44
Using your brain optimally	45
Make everyone think	45
A problem as the starting-point for learning	46
The limitations of thinking	48
To cut it short	49

5 Repeat, pause, repeat, linger, pause, repeat	51
How can you use spaced repetition in lessons?	53
How can you integrate this easily into your lessons?	54
Repetition by testing: the testing effect	54
Further thinking: How old is the testing effect?	55
Further thinking: Remembering better with Amazon?	55
How can you use spaced repetition as a pupil or student?	57
Further thinking: How long should you study?	57
What are the possible problems with spaced repetition?	58
Further thinking: Don't let yourself be (mis)led by repetition	58
To cut it short	60
6 The importance of practice	63
Help, I'm standing in front of a door!	63
Further thinking: The importance of early automation for further learning in other subjects	64
Deliberate practice	65
Further thinking: Nature or nurture	65
Can you practise everything with this gold standard of deliberate practice?	68
Further thinking: Is deliberate practice best done alone or in a group?	69
Is practice enough?	69
To cut it short	70
7 Metacognition: teaching your pupils and students how to learn	73
Sigh	73
What is metacognition?	74
Further thinking: Who actually directs learning?	75
For whom is metacognition important?	76
How can you best work at improving metacognition?	77
Is working at metacognition the same for every subject and learners of every age?	79

Further thinking: Executive functions	80
How you should <i>not</i> work at metacognition	80
To cut it short	81
8 Evaluate and give feedback	83
Different forms of evaluation	83
Further thinking: Quality criteria for good evaluation	85
The dream they call feedback	87
Conditions for optimal feedback	87
What is the best way to give feedback?	88
When is feedback not effective?	91
Further thinking: Giving marks?	92
To cut it short	92
9 Use multimedia, but use it wisely	95
Do I need to draw you a picture?	95
Further thinking: The origin of the dual-coding theory	96
Further thinking: Dual coding as a study method	98
Should there be no text at all on the screen?	99
What does this mean for practice?	99
Further thinking: Build up diagrams and schedules together with your pupils	101
Dual channel and learning languages	101
Further thinking: A study method from classical antiquity that still works!	102
When does the dual channel theory not work?	103
To cut it short	104
10 Have a vision (and it doesn't matter which one)	107
Why is having a vision so important?	108
Further thinking: Effective professionalization?	109
The huge impact of good leadership on learning at school	110
Further thinking: What is a good learning climate?	111
Do some visions have more effect than others?	111
Further thinking: Problems of scaling-up	113
But... don't be too fanatical	113
To cut it short	114

Further thinking: Executive functions	80
How you should <i>not</i> work at metacognition	80
To cut it short	81
8 Evaluate and give feedback	83
Different forms of evaluation	83
Further thinking: Quality criteria for good evaluation	85
The dream they call feedback	87
Conditions for optimal feedback	87
What is the best way to give feedback?	88
When is feedback not effective?	91
Further thinking: Giving marks?	92
To cut it short	92
9 Use multimedia, but use it wisely	95
Do I need to draw you a picture?	95
Further thinking: The origin of the dual-coding theory	96
Further thinking: Dual coding as a study method	98
Should there be no text at all on the screen?	99
What does this mean for practice?	99
Further thinking: Build up diagrams and schedules together with your pupils	101
Dual channel and learning languages	101
Further thinking: A study method from classical antiquity that still works!	102
When does the dual channel theory not work?	103
To cut it short	104
10 Have a vision (and it doesn't matter which one)	107
Why is having a vision so important?	108
Further thinking: Effective professionalization?	109
The huge impact of good leadership on learning at school	110
Further thinking: What is a good learning climate?	111
Do some visions have more effect than others?	111
Further thinking: Problems of scaling-up	113
But... don't be too fanatical	113
To cut it short	114

11 Like your pupils	117
Further thinking: classroom climate	118
What does a good relationship look like?	119
How can you work at this kind of relationship?	120
Further thinking: The importance of class management	121
When can a relationship go wrong?	122
To cut it short	123
12 Underlying themes	127
Students often don't know what is best for them...	127
Work towards objectives	128
Further thinking: 10 instructional principles for teachers	129
Transfer is difficult	130
Rhythm is important	130
Further thinking: Interleaving	131
The Matthew effect	131
A final underlying theme: Cognitive load theory	134
