

metrologia

Volume 58

Number 5

October 2021

REVIEW ARTICLES

- 052001 Proposal for the dimensionally consistent treatment of angle and solid angle by the International System of Units (SI)**
B P Leonard
- 052002 The new *mise en pratique* for the metre—a review of approaches for the practical realization of traceable length metrology from 10^{-11} m to 10^{13} m**
René Schödel, Andrew Yacoot and Andrew Lewis

LETTERS TO THE EDITOR

- 053001 Angular frequency in the International System of Units. Physicist's view**
M I Kalinin
- 053002 Angles in the SI: a detailed proposal for solving the problem**
Paul Quincey

SPECIAL ISSUE ARTICLES

- 054001 A proposal for designing the source mass to accurately determine G with atom interferometry**
Miao-Miao Zhao, Yu-Jie Tan, Pan-Pan Wang, Cheng-Gang Shao and Zhong-Kun Hu
- 054002 Precise measurement of the thickness of silicon wafers by double-sided interferometer and bilateral comparison**
Akiko Hirai, Youichi Bitou, Jaeseok Bae, Jungjae Park and Jonghan Jin

PAPERS

- 055001 Terahertz frequency counter based on a semiconductor-superlattice harmonic mixer with four-octave measurable bandwidth and 16-digit precision**
Shigeo Nagano, Motohiro Kumagai, Hiroyuki Ito, Yuko Hanado and Tetsuya Ido
- 055002 Interlaboratory consensus building**
G Mana
- 055003 Remote time and frequency calibration with holdover traceability from a new treatment of non-white noise in rubidium clocks**
Rob Douglas, André Charboneau and Marina Gertsvolf
- 055004 ITS-90 reproducibility, xenon fixed point substitution and new interpolating equations between 13.8033 K and 273.16 K**
P M C Rourke
- 055005 Verification of an *in situ* calibrated optomechanical accelerometer for use as a strong ground motion seismic reference**
Jon R Pratt, Stephan Schlamminger, Frank Seifert and David B Newell
- 055006 Observation of systematic deviations between Faraday cup aerosol electrometers for varying particle sizes and flow rates—results of the AEROMET FCAE workshop**
Ajit Ahlawat, Stefan Seeger, Martin Gottschalk, Thomas Tuch and Alfred Wiedensohler
- 055007 Absolute frequency measurement of the ^{171}Yb optical lattice clock at KRISS using TAI for over a year**
Huidong Kim, Myoung-Sun Heo, Chang Yong Park, Dai-Hyuk Yu and Won-Kyu Lee
- 055008 Increased detector response in optical overfilled measurements due to gas lens formation by nitrogen flow through the entrance aperture**
J Askola, K Maham, P Kärhä and E Ikonen

- 055009** **Development of the primary standard for low-energy and W/Mo mammography x-rays at OAP, Thailand**
P Rindhatayathon, K Koonkana and V Pungkun
- 055010** **High amplification laser-pressure optic enables ultra-low uncertainty measurements of optical laser power at kilowatt levels**
Alexandra B Artusio-Glimpse, Kyle A Rogers, Paul A Williams and John H Lehman
- 055011** **A bilateral comparison of NIST and PTB laser power standards for scale realization confidence by gravitational wave observatories**
Matthew Spidell, John Lehman, Marco López, Holger Lecher, Stefan Kück, Dripta Bhattacharjee, Yannick Lecoeuche and Richard Savage
- 055012** **Characterization of predictable quantum efficient detector in terms of optical non-linearity in the visible to near-infrared range**
Minoru Tanabe, Hiroshi Shitomi, Timo Dönsberg and Erkki Ikonen

CORRIGENDUM

- 059501** **Corrigendum: Measurement of thermodynamic temperature between 5 K and 24.5 K with Single-Pressure Refractive-Index Gas Thermometry (2020 *Metrologia* 57 065006)**
Bo Gao, Haiyang Zhang, Dongxu Han, Changzhao Pan, Hui Chen, Yaonan Song, Wenjing Liu, Jiangfeng Hu, Xiangjie Kong, Fernando Sparasci, Mark Plimmer, Ercang Luo and Laurent Pitre
