

Obsah

Introduction.....	8
Ultrasound = Ultrasonography = Sonography	9
Description of ultrasound images in gynaecology and obstetrics – clinical practice.....	14
Part I. Gynaecology.....	15
Vaginal probe.....	16
1. Anteverted anteflexed uterus – a woman in reproductive years.....	16
2. Anteverted anteflexed uterus – a woman in senium.....	17
3. A hyper anteverted anteflexed uterus	17
4. A retroverted retroflexed uterus.....	18
5. A hypoplastic uterus.....	18
6. A subseptate uterus.....	19
7. An ultrasound image of the cervix at the time of ovulation.....	19
8. The endocervix after sampling with an OC brush	20
9. Ovula Nabothi (ON, retention cysts of cervix).....	20
10. Solitary ovula Nabothi.....	21
11. Intrauterine adhesions in senium.....	21
12. Mucometra.....	22
13. Atherosclerotic calcification of the uterine vessels.....	22
14. Intrauterine device inside the uterine cavity	23
15. Intrauterine device in the abdominal cavity after an unsuccessful insertion.....	24
16. Calcifications in the uterine cavity with IUD.....	24
17. Endometrial hyperplasia (E) in senium	25
18. Endometrial carcinoma.....	25
19. Endometrial polyp	26
20. Endocervical polyp.....	26
21. Submucous myoma of the uterus.....	27
22. Intramural myoma of the uterus	28
23. Thickened posterior wall of the uterus.....	28
24. Subserous myoma of the uterus	29
25. Myoma of the uterus after delivery	29
26. Scar after a Caesarean section – granuloma	30
27. Thickening of the scar after a Caesarean section	30
28. Dilatation of the scar after a Caesarean section	31
29. Physiological ovary	31
30. State after a simple hysterectomy.....	32
31. State after a supracervical hysterectomy	32
32. Ovarian follicle.....	33
33. Polycystic ovary syndrome (PCOS)	33
34. Ovarian cysts	34
35. State after spontaneous rupture of the ovarian cyst	35

36. Serous cystadenoma	36
37. Endometrial cysts.....	36
38. Endometriosis in the subcutaneous tissue (extragenital endometriosis).....	37
39. Cystadenocarcinoma.....	37
40. Ascites, adhesions in the lesser pelvis.....	38
41. An adnexal tumour	38
42. A tumour in the lesser pelvis.....	39
43. Nephroptosis (floating kidney)	39
44. Alagille syndrome – arteriohepatal dysplasia.....	40
Abdominal probe	41
1. An ultrasound image of the uterus	41
2. An ultrasound image of the uterus and ovary	42
3. Foley catheter in the urinary bladder.....	42
4. Uterus and ovaries in a woman at a fertile age	43
5. Uterus and ovaries in a woman after postmenopause	43
6. An ultrasound image of a cyst of the right ovary.....	44
Perineal probe	45
1. Cystourethrography performed with the use of ultrasound	45
Part II. Obstetrics.....	47
1. Incipient pregnancy at the fifth week	48
2. Incipient pregnancy	48
3. Ultrasound image of pregnancy at the eighth week visualised with a vaginal probe.....	49
4. Foetus at the tenth gestational week visualised by vaginal probe.....	49
5. Foetus at the end of the first trimester visualised by vaginal probe	50
6. Foetus at thirteenth week visualised by vaginal probe	50
7. Foetus at thirteenth – fourteenth week visualised by vaginal probe	51
8. The pseudogestational sac in the uterine cavity in the terrain of ectopic pregnancy	52
9. Ovarian pregnancy.....	52
10. A missed abortion.....	53
11. A missed abortion – monochorionic monoamniotic pregnancy	53
12. Anembryonic pregnancy (eighth week), intramural myoma.....	54
13. Foetal death, anhydramnios.....	54
14. Monozygotic twins (ninth gestational week)	55
15. Fraternal (dizygotic) twins	55
16. Partial hydatidiform mole	56
17. Complete hydatidiform mole	57
18. Spontaneous abortion in progress – gestational sac localized in fundus	57
19. Spontaneous abortion in progress – gestational sac moved above internal os.....	58
20. Spontaneous abortion in progress – gestational sac moved into the cervical canal	58
21. Empty uterine cavity after instrumental revision performed at the seventh week of pregnancy due to an incomplete abortion	59
22. Retained products of conception after delivery.....	59
23. Are these retained products of conception, coagula or is it a myoma?.....	60

24. Lochiometra	61
25. Physiological ultrasound image acquired with the use of abdominal in a woman at the postpartum period	62
26. Physiological finding at day 16 after spontaneous delivery.....	62
27. Cervicometry	63
28. Cervicometry – threatened preterm labour.....	63
29. Placenta praevia	64
30. Foetus – male sex.....	64
31. Foetus – female sex.....	65
32. Face of the foetus	66
33. Limbs of the foetus	66
34. Hands of the foetus	67
Ultrasound biometry.....	68
1. Measurement of head.....	69
2. Measurement of AC (abdominal circumference).....	69
3. Measurement of FL (femur length)	70
Examples of spectral Doppler measurement of blood flow in the umbilical artery	71
Sonographic screening examination of the fetal heart.....	72
3D ultrasound	75
Conclusion	76
Abbreviations	77
Literature	78
