

# Table of Contents

<b>Preface</b> .....	<b>vii</b>
<b>1. Introduction</b> .....	<b>1</b>
Analyzing Relationships to Understand People and Groups	2
Binary and Valued Relationships	2
Symmetric and Asymmetric Relationships	3
Multimode Relationships	3
From Relationships to Networks—More Than Meets the Eye	3
Social Networks vs. Link Analysis	4
The Power of Informal Networks	6
Terrorists and Revolutionaries: The Power of Social Networks	10
Social Networks in Prison	10
Informal Networks in Terrorist Cells	11
The Revolution Will Be Tweeted	14
<b>2. Graph Theory—A Quick Introduction</b> .....	<b>19</b>
What Is a Graph?	19
Adjacency Matrices	21
Edge-Lists and Adjacency Lists	22
7 Bridges of Königsberg	23
Graph Traversals and Distances	25
Depth-First Traversal	27
Breadth-First Traversal	30
Paths and Walks	31
Dijkstra's Algorithm	33
Graph Distance	35
Graph Diameter	36
Why This Matters	36
6 Degrees of Separation is a Myth!	37
Small World Networks	37

<b>3. Centrality, Power, and Bottlenecks .....</b>	<b>39</b>
Sample Data: The Russians are Coming!	39
Get Oriented in Python and NetworkX	39
Read Nodes and Edges from LiveJournal	41
Snowball Sampling	43
Saving and Loading a Sample Dataset from a File	44
Centrality	45
Who Is More Important in this Network?	45
Find the “Celebrities”	45
Find the Gossipmongers	49
Find the Communication Bottlenecks and/or Community Bridges	51
Putting It Together	54
Who Is a “Gray Cardinal?”	55
Klout Score	57
PageRank—How Google Measures Centrality	58
What Can’t Centrality Metrics Tell Us?	60
<b>4. Cliques, Clusters and Components .....</b>	<b>61</b>
Components and Subgraphs	61
Analyzing Components with Python	62
Islands in the Net	62
Subgraphs—Ego Networks	65
Extracting and Visualizing Ego Networks with Python	65
Triads	67
Fraternity Study—Tie Stability and Triads	68
Triads and Terrorists	68
The “Forbidden Triad” and Structural Holes	72
Structural Holes and Boundary Spanning	73
Triads in Politics	74
Directed Triads	76
Analyzing Triads in Real Networks	77
Real Data	79
Cliques	79
Detecting Cliques	79
Hierarchical Clustering	81
The Algorithm	82
Clustering Cities	83
Preparing Data and Clustering	84
Block Models	86
Triads, Network Density, and Conflict	88
<b>5. 2-Mode Networks .....</b>	<b>93</b>
Does Campaign Finance Influence Elections?	93

Theory of 2-Mode Networks	96
Affiliation Networks	96
Attribute Networks	98
A Little Math	98
2-Mode Networks in Practice	100
PAC Networks	102
Candidate Networks	102
Expanding Multimode Networks	105
Exercise	107
<b>6. Going Viral! Information Diffusion .....</b>	<b>109</b>
Anatomy of a Viral Video	109
What Did Facebook Do Right?	110
How Do You Estimate Critical Mass?	111
Wikinomics of Critical Mass	112
Content is (Still) King	113
How Does Information Shape Networks (and Vice Versa)?	116
Birds of a Feather?	117
Homophily vs. Curiosity	117
Weak Ties	119
Dunbar Number and Weak Ties	119
A Simple Dynamic Model in Python	121
Influencers in the Midst	125
Exercises for the Reader	127
Coevolution of Networks and Information	127
Exercises for the Reader	133
Why Model Networks?	134
<b>7. Graph Data in the Real World .....</b>	<b>137</b>
Medium Data: The Tradition	138
Big Data: The Future, Starting Today	138
“Small Data”—Flat File Representations	139
EdgeList Files	139
.net Format	140
GML, GraphML, and other XML Formats	141
Ancient Binary Format—##h Files	142
“Medium Data”: Database Representation	142
What are Cursors?	143
What are Transactions?	144
Names	144
Nodes as Data, Attributes as ?	145
The Class	145
Functions and Decorators	146

The Adaptor	148
Working with 2-Mode Data	150
Exercises for the Reader	151
Social Networks and Big Data	151
NoSQL	152
Structural Realities	153
Computational Complexities	156
Big Data is Big	156
Big Data at Work	156
What Are We Distributing?	157
Hadoop, S3, and MapReduce	157
Hive	158
SQL is Still Our Friend	160
<b>A. Data Collection</b>	<b>161</b>
<b>B. Installing Software</b>	<b>171</b>
Components and Subgraphs	171
Analyzing Components with Python	171
Islands in the Net	179
Subgraphs—Ego Networks	181
Extracting and Visualizing Ego Networks	182
Triads	187
Fraternity Study—Ties and Intergenerational	187
Triads and Terrorists	193
The "Forbidden Triad" and Structural Holes	194
Structural Holes and Boundary Spanners	197
Triads in Politics	197
Directed Triads	198
Analyzing Triads in Real Networks	198
Real Data	199
Cliques	199
Detecting Cliques	199
Hierarchical Clustering	199
The Algorithm	199
Clustering Cities	199
Preparing Data and Clustering	199
Block Models	199
Triads in Networks	199
Nodes as Data, Attributes as ?	199
The Class	199
Functions and Decorators	199
