ords originally inscribed in gold on the promaos of the

INIT I: Sense of Being: The Concept of Self and Self/Nonself Recognition

Chapter 1: The Need for Self-Recognition

Chapter 2: Antigens and Receptors 11

INIT II: The Innate Immune System

Chapter 3: Barriers to Infection 25 Chapter 4: Cells of the Innate Immune System 34

Chapter 5: Innate Immune Function 42

INIT III: The Adaptive Immune System

- Chapter 6: Molecules of Adaptive Immunity 59
- Chapter 7: Cells and Organs 79
- Chapter 8: Generation of Immune Diversity: Lymphocyte Antigen Receptors 91
- Chapter 9: Lymphocyte Development 113
- Chapter 10: Lymphocyte Activation 123
- Chapter 11: Lymphocyte Effector Functions 141
- Chapter 12: Regulation of Adaptive Responses 158

LINIT IV: Clinical Aspects of Immunity

Chapter 13: The Well Patient: How Innate and Adaptive Immune Responses Maintain Health 169
Chapter 14: Hypersensitivity Reactions 200
Chapter 15: Immune Deficiency 219

Chapter 16: Autoimmunity 243 Chapter 17: Transplantation 260 Chapter 18: Immune Pharmacotherapy 283 Chapter 19: Tumor Immunity 298 Chapter 20: Measurement of Immune Function 312 Review Questions 330 Abbreviations 343

Glossary 348 Index 371

combining to form lichens, humans and normal bacterial flora in the combining to form lichens, humans and normal bacterial flora in the loss the skin) required yet more questions: If there is an intruder, does out a threat or can it sately be ignored? If it represents a threat, what is a done to eliminate it?

Shorts are the starting points from which the immune system opertermum immune system uses various methods to ask and answer these 50me of these methods have been widely used for eons, others have aloped more recently by more restricted groups of organisms. This unit is how the numan immune system deals with these questions.
