Preface xi

Acknowledgments xiii

1 Data: Types and Presentation 1
- 1.1 Types of Biological Data . . . 2
- 1.2 Accuracy and Significant Figures . . . 5
- 1.3 Frequency Distributions . . . 6
- 1.4 Cumulative Frequency Distributions . . . 14

2 Populations and Samples 16
- 2.1 Populations . . . 16
- 2.2 Samples from Populations . . . 16
- 2.3 Random Sampling . . . 17
- 2.4 Parameters and Statistics . . . 18
- 2.5 Outliers . . . 19

3 Measures of Central Tendency 21
- 3.1 The Arithmetic Mean . . . 21
- 3.2 The Median . . . 24
- 3.3 The Mode . . . 27
- 3.4 Other Measures of Central Tendency . . . 28
- 3.5 Coding Data . . . 30

4 Measures of Variability and Dispersion 33
- 4.1 The Range . . . 33
- 4.2 Dispersion Measured with Quantiles . . . 35
- 4.3 The Mean Deviation . . . 37
- 4.4 The Variance . . . 37
- 4.5 The Standard Deviation . . . 41
- 4.6 The Coefficient of Variation . . . 42
- 4.7 Indices of Diversity . . . 42
- 4.8 Coding Data . . . 46

5 Probabilities 49
- 5.1 Counting Possible Outcomes . . . 49
- 5.2 Permutations . . . 51
- 5.3 Combinations . . . 55
- 5.4 Sets . . . 57
- 5.5 Probability of an Event . . . 59
- 5.6 Adding Probabilities . . . 60
- 5.7 Multiplying Probabilities . . . 63
- 5.8 Conditional Probabilities . . . 63

6 The Normal Distribution 66
- 6.1 Proportions of a Normal Distribution . . . 68
- 6.2 The Distribution of Means . . . 72

6.3 Introduction to Statistical Hypothesis Testing 74
6.4 Confidence Limits 85
6.5 Symmetry and Kurtosis 87
6.6 Assessing Departures from Normality 91

7 One-Sample Hypotheses **97**
7.1 Two-Tailed Hypotheses Concerning the Mean 97
7.2 One-Tailed Hypotheses Concerning the Mean 103
7.3 Confidence Limits for the Population Mean 105
7.4 Reporting Variability Around the Mean 108
7.5 Reporting Variability Around the Median 112
7.6 Sample Size and Estimation of the Population Mean 114
7.7 Sample Size, Detectable Difference, and Power in Tests Concerning the Mean 115
7.8 Sampling Finite Populations 118
7.9 Hypotheses Concerning the Median 120
7.10 Confidence Limits for the Population Median 120
7.11 Hypotheses Concerning the Variance 121
7.12 Confidence Limits for the Population Variance 122
7.13 Power and Sample Size in Tests Concerning the Variance 124
7.14 Hypotheses Concerning the Coefficient of Variation 125
7.15 Confidence Limits for the Population Coefficient of Variation . . . 126
7.16 Hypotheses Concerning Symmetry and Kurtosis 126

8 Two-Sample Hypotheses **130**
8.1 Testing for Difference Between Two Means 130
8.2 Confidence Limits for Population Means 142
8.3 Sample Size and Estimation of the Difference Between Two Population Means 146
8.4 Sample Size, Detectable Difference, and Power in Tests for Difference between Two Means 147
8.5 Testing for Difference Between Two Variances 151
8.6 Confidence Limits for Population Variances and the Population Variance Ratio 157
8.7 Sample Size and Power in Tests for Difference Between Two Variances 158
8.8 Testing for Difference Between Two Coefficients of Variation . . . 159
8.9 Confidence Limits for the Difference Between Two Coefficients of Variation 162
8.10 Nonparametric Statistical Methods 162
8.11 Two-Sample Rank Testing 163
8.12 Testing for Difference Between Two Medians 172
8.13 Two-Sample Testing of Nominal-Scale Data 174
8.14 Testing for Difference Between Two Diversity Indices 174
8.15 Coding Data 176

9 Paired-Sample Hypotheses **179**
9.1 Testing Mean Difference Between Paired Samples 179
9.2 Confidence Limits for the Population Mean Difference 182
9.3 Power, Detectable Difference and Sample Size in Paired-Sample Testing of Means 182

9.4 Testing for Difference Between Variances from Two Correlated Populations 182
9.5 Paired-Sample Testing by Ranks 183
9.6 Confidence Limits for the Population Median Difference 188

10 Multisample Hypotheses and the Analysis of Variance 189
10.1 Single-Factor Analysis of Variance 190
10.2 Confidence Limits for Population Means 206
10.3 Sample Size, Detectable Difference, and Power in Analysis of Variance 207
10.4 Nonparametric Analysis of Variance 214
10.5 Testing for Difference Among Several Medians 219
10.6 Homogeneity of Variances 220
10.7 Homogeneity of Coefficients of Variation 221
10.8 Coding Data 224
10.9 Multisample Testing for Nominal-Scale Data 224

11 Multiple Comparisons 226
11.1 Testing All Pairs of Means 227
11.2 Confidence Intervals for Multiple Comparisons 232
11.3 Testing a Control Mean Against Each Other Mean 234
11.4 Multiple Contrasts 237
11.5 Nonparametric Multiple Comparisons 239
11.6 Nonparametric Multiple Contrasts 243
11.7 Multiple Comparisons Among Medians 244
11.8 Multiple Comparisons Among Variances 244

12 Two-Factor Analysis of Variance 249
12.1 Two-Factor Analysis of Variance with Equal Replication 250
12.2 Two-Factor Analysis of Variance with Unequal Replication 265
12.3 Two-Factor Analysis of Variance Without Replication 267
12.4 Two-Factor Analysis of Variance with Randomized Blocks or Repeated Measures 270
12.5 Multiple Comparisons and Confidence Intervals in Two-Factor Analysis of Variance 274
12.6 Sample Size, Detectable Difference, and Power in Two-Factor Analysis of Variance 275
12.7 Nonparametric Randomized-Block or Repeated-Measures Analysis of Variance 277
12.8 Dichotomous Nominal-Scale Data in Randomized Blocks or from Repeated Measures 281
12.9 Multiple Comparisons with Dichotomous Randomized-Block or Repeated-Measures Data 283
12.10 Introduction to Analysis of Covariance 284

13 Data Transformations 286
13.1 The Logarithmic Transformation 287
13.2 The Square-Root Transformation 291
13.3 The Arcsine Transformation 291
13.4 Other Transformations 295

14 Multiway Factorial Analysis of Variance **296**
14.1 Three-Factor Analysis of Variance 296
14.2 The Latin-Square Experimental Design 299
14.3 Higher-Order Factorial Analysis of Variance 303
14.4 Multiway Analysis of Variance with Blocks or Repeated Measures 304
14.5 Factorial Analysis of Variance with Unequal Replication 304
14.6 Multiple Comparisons and Confidence Intervals in Multiway Analysis of Variance 305
14.7 Power, Detectable Difference, and Sample Size in Multiway Analysis of Variance 305

15 Nested (Hierarchical) Analysis of Variance **307**
15.1 Nesting Within One Factor 307
15.2 Nesting in Factorial Experimental Designs 313
15.3 Multiple Comparisons and Confidence Intervals 314
15.4 Power, Detectable Difference, and Sample Size in Nested Analysis of Variance 315

16 Multivariate Analysis of Variance **316**
16.1 The Multivariate Normal Distribution 316
16.2 Multivariate Analysis of Variance Hypothesis Testing 319
16.3 Further Analysis 326
16.4 Other Experimental Designs 326

17 Simple Linear Regression **328**
17.1 Regression versus Correlation 328
17.2 The Simple Linear Regression Equation 330
17.3 Testing the Significance of a Regression 337
17.4 Interpretations of Regression Functions 341
17.5 Confidence Intervals in Regression 342
17.6 Inverse Prediction 347
17.7 Regression with Replication and Testing for Linearity 349
17.8 Power and Sample Size in Regression 355
17.9 Regression Through the Origin 355
17.10 Data Transformations in Regression 357
17.11 The Effect of Coding Data 361

18 Comparing Simple Linear Regression Equations **363**
18.1 Comparing Two Slopes 363
18.2 Comparing Two Elevations 367
18.3 Comparing Points on Two Regression Lines 371
18.4 Comparing More Than Two Slopes 372
18.5 Comparing More Than Two Elevations 375
18.6 Multiple Comparisons Among Slopes 375
18.7 Multiple Comparisons Among Elevations 376
18.8 Multiple Comparisons of Points Among Regression Lines 377
18.9 An Overall Test for Coincidental Regressions 378

19 Simple Linear Correlation **379**
19.1 The Correlation Coefficient 379
19.2 Hypotheses About the Correlation Coefficient 383

19.3 Confidence Intervals for the Population Correlation Coefficient . . 386
19.4 Power and Sample Size in Correlation 386
19.5 Comparing Two Correlation Coefficients 390
19.6 Power and Sample Size in Comparing Two Correlation Coefficients 392
19.7 Comparing More Than Two Correlation Coefficients 393
19.8 Multiple Comparisons Among Correlation Coefficients 396
19.9 Rank Correlation 398
19.10 Weighted Rank Correlation 402
19.11 Correlation with Nominal-Scale Data 405
19.12 Intraclass Correlation 411
19.13 Concordance Correlation 414
19.14 The Effect of Coding 417

20 Multiple Regression and Correlation **419**
20.1 Intermediate Computational Steps 420
20.2 The Multiple-Regression Equation 423
20.3 Analysis of Variance of Multiple Regression or Correlation 426
20.4 Hypotheses Concerning Partial Regression Coefficients 430
20.5 Standardized Partial Regression Coefficients 433
20.6 Selecting Independent Variables 433
20.7 Partial Correlation 438
20.8 Predicting *Y* Values 440
20.9 Testing Difference Between Two Partial Regression Coefficients 442
20.10 "Dummy" Variables 443
20.11 Interaction of Independent Variables 444
20.12 Comparing Multiple Regression Equations 444
20.13 Multiple Regression Through The Origin 446
20.14 Nonlinear Regression 447
20.15 Descriptive Versus Predictive Models 448
20.16 Concordance: Rank Correlation Among Several Variables 449

21 Polynomial Regression **458**
21.1 Polynomial Curve Fitting 458
21.2 Quadratic Regression 463

22 Testing for Goodness of Fit **466**
22.1 Chi-Square Goodness of Fit for Two Categories 467
22.2 Chi-Square Correction for Continuity 469
22.3 Chi-Square Goodness of Fit for More Than Two Categories 470
22.4 Subdividing Chi-Square Goodness of Fit 472
22.5 Chi-Square Goodness of Fit with Small Frequencies 473
22.6 Heterogeneity Chi-Square Testing for Goodness of Fit 474
22.7 The Log-Likelihood Ratio for Goodness of Fit 478
22.8 Kolmogorov-Smirnov Goodness of Fit 481

23 Contingency Tables **490**
23.1 Chi-Square Analysis of Contingency Tables 492
23.2 Visualizing Contingency-Table Data 494

23.3 2 × 2 Contingency Tables 497
23.4 Contingency Tables with Small Frequencies 503
23.5 Heterogeneity Testing of 2 × 2 Tables 504
23.6 Subdividing Contingency Tables 506
23.7 The Log-Likelihood Ratio for Contingency Tables 508
23.8 Multidimensional Contingency Tables 510

24 Dichotomous Variables **518**
24.1 Binomial Probabilities 519
24.2 The Hypergeometric Distribution 524
24.3 Sampling a Binomial Population 526
24.4 Goodness of Fit for the Binomial Distribution 529
24.5 The Binomial Test and One-Sample Test of a Proportion 532
24.6 The Sign Test 537
24.7 Power, Detectable Difference, and Sample Size for the Binomial and Sign Tests 539
24.8 Confidence Limits for a Population Proportion 543
24.9 Confidence Interval for a Population Median 548
24.10 Testing for Difference Between Two Proportions 549
24.11 Confidence Limits for the Difference Between Proportions 551
24.12 Power, Detectable Difference, and Sample Size in Testing Difference Between Two Proportions 552
24.13 Comparing More Than Two Proportions 555
24.14 Multiple Comparisons for Proportions 557
24.15 Trends Among Proportions 559
24.16 The Fisher Exact Test 561
24.17 Paired-Sample Testing of Nominal-Scale Data 569
24.18 Logistic Regression 577

25 Testing for Randomness **585**
25.1 Poisson Probabilities 585
25.2 Confidence Limits for the Poisson Parameter 587
25.3 Goodness of Fit for the Poisson Distribution 589
25.4 The Poisson Distribution for the Binomial Test 592
25.5 Comparing Two Poisson Counts 595
25.6 Serial Randomness of Nominal-Scale Categories 597
25.7 Serial Randomness of Measurements: Parametric Testing 599
25.8 Serial Randomness of Measurements: Nonparametric Testing 601

26 Circular Distributions: Descriptive Statistics **605**
26.1 Data on a Circular Scale 605
26.2 Graphical Presentation of Circular Data 607
26.3 Trigonometric Functions 610
26.4 The Mean Angle 612
26.5 Angular Dispersion 615
26.6 The Median and Modal Angles 617
26.7 Confidence Limits for the Population Mean and Median Angles 618
26.8 Axial Data 619
26.9 The Mean of Mean Angles 621

27 Circular Distributions: Hypothesis Testing **624**
27.1 Testing Significance of the Mean Angle 624
27.2 Testing Significance of the Median Angle 629
27.3 Testing Symmetry Around the Median Angle 631
27.4 Two-Sample and Multisample Testing of Mean Angles 632
27.5 Nonparametric Two-Sample and Multisample Testing of Angles . . 637
27.6 Two-Sample and Multisample Testing of Median Angles 642
27.7 Two-Sample and Multisample Testing of Angular Distances 642
27.8 Two-Sample and Multisample Testing of Angular Dispersion 644
27.9 Parametric Analysis of the Mean of Mean Angles 645
27.10 Nonparametric Analysis of the Mean of Mean Angles 646
27.11 Parametric Two-Sample Analysis of the Mean of Mean Angles . . . 647
27.12 Nonparametric Two-Sample Analysis of the Mean of Mean Angles 649
27.13 Parametric Paired-Sample Testing with Angles 652
27.14 Nonparametric Paired-Sample Testing with Angles 654
27.15 Parametric Angular Correlation and Regression 654
27.16 Nonparametric Angular Correlation 660
27.17 Goodness-of-Fit Testing for Circular Distributions 662
27.18 Serial Randomness of Nominal-Scale Categories on a Circle 665

APPENDICES

A The Greek Alphabet **669**

B Statistical Tables and Graphs **671**
Table B.1 Critical Values of the Chi-Square (χ^2) Distribution 672
Table B.2 Proportions of the Normal Curve (One-Tailed) 676
Table B.3 Critical Values of the t Distribution 678
Table B.4 Critical Values of the F Distribution 680
Table B.5 Critical Values of the q Distribution, for the Tukey Test . . . 717
Table B.6 Critical Values of q' for the One-Tailed Dunnett's Test . . . 733
Table B.7 Critical Values of q' for the Two-Tailed Dunnett's Test . . . 735
Table B.8 Critical Values of $d_{\max}$ for the Kolmogorov-Smirnov Goodness-of-Fit for Discrete or Grouped Data 736
Table B.9 Critical Values of D for the Kolmogorov-Smirnov Goodness-of-Fit Test for Continuous Distributions 741
Table B.10 Critical Values of D_δ for the δ-Corrected Kolmogorov-Smirnov Goodness-of-Fit Test for Continuous Distributions 745
Table B.11 Critical Values of the Mann-Whitney U Distribution 747
Table B.12 Critical Values of the Wilcoxon T Distribution 758
Table B.13 Critical Values of the Kruskal-Wallis H Distribution 761
Table B.14 Critical Values of the Friedman χ_r^2 Distribution 763
Table B.15 Critical Values of Q for Nonparametric Multiple-Comparison Testing 764
Table B.16 Critical Values of Q' for Nonparametric Multiple-Comparison Testing with a Control 765
Table B.17 Critical Values of the Correlation Coefficient, r 766
Table B.18 Fisher's z Transformation for Correlation Coefficients, r . . . 768

Table B.19 Correlation Coefficients, r, Corresponding to Fisher's z Transformation 770
Table B.20 Critical Values of the Spearman Rank-Correlation Coefficient, r_s 773
Table B.21 Critical Values of the Top-Down Correlation Coefficient, r_T 775
Table B.22 Critical Values of the Symmetry Measure, $\sqrt{b_1}$ 776
Table B.23 Critical Values of the Kurtosis Measure, b_2 777
Table B.24 The Arcsine Transformation, p' 778
Table B.25 Proportions, p, Corresponding to Arcsine Transformations, p' 780
Table B.26a Binomial Coefficients, ${}_nC_X$ 782
Table B.26b Proportions of the Binomial Distribution for $p = q = 0.5$ . . 785
Table B.27 Critical Values of C for the Sign Test or the Binomial Test with $p = 0.5$ 786
Table B.28 Critical Values for Fisher's Exact Test 795
Table B.29 Critical Values of u for the Runs Test 826
Table B.30 Critical Values of C for the Mean Square Successive Difference Test 835
Table B.31 Critical Values, u, for the Runs-Up-and-Down Test 837
Table B.32 Angular Deviation, s, As a Function of Vector Length, r . . . 838
Table B.33 Circular Standard Deviation, s_0, as a Function of Vector Length, r 840
Table B.34 Circular Values of z for Rayleigh's Test for Circular Uniformity 842
Table B.35 Critical Values of u for the V Test of Circular Uniformity . . 844
Table B.36 Critical Values of m for the Hodges-Ajne Test for Circular Uniformity 845
Table B.37 Correction Factor, K, for the Watson and Williams Test . . . 847
Table B.38a Critical Values of Watson's Two-Sample U^2 849
Table B.38b Critical Values of Watson's One-Sample U^2 853
Table B.39 Critical Values of R' for the Moore Test for Circular Uniformity 853
Table B.40 Common Logarithms of Factorials 854
Table B.41 Ten Thousand Random Digits 856
Figure B.1 Power and Sample Size in Analysis of Variance 859

C The Effects of Coding Data **867**

D Analysis-of-Variance Hypothesis Testing **869**
D.1 Determination of Appropriate Fs and Degrees of Freedom 869
D.2 Two-Factor Analysis of Variance 872
D.3 Three-Factor Analysis of Variance 872
D.4 Nested Analysis of Variance 873

Answers to Exercises **875**

Literature Cited **886**

Author Index **923**

Subject Index **931**
