

CONTENTS

INTRODUCTION	7
1. BLADES	9
1.1. RESEARCH ON THE MANUFACTURE OF NINTH- TO MID-SIXTEENTH-CENTURY BLADES	9
1.1.1. Methods of researching sword-blade manufacturing techniques and their limits.....	9
1.1.2. Definition of bladesmithing types describing construction, resulting redistribution of steel and heat treatment evidenced in sword blades.....	15
1.2. CHANGES IN SWORD-BLADE MANUFACTURING TRADITIONS	21
1.2.1. Sword-blade manufacturing techniques documented for swords found in Czech territory	21
1.2.2. Chronological tracking of bladesmithing types in medieval and early Renaissance Europe	26
1.2.3. Changes in sword-blade constructions	28
1.2.4. Changes in the distribution of steel across the blade	35
1.2.5. Changes in sword-blade heat treatment	38
1.3. CHANGES IN DIMENSIONS OF BLADES	40
1.4. SHAPE OF EIGHTH- TO TENTH-CENTURY BLADES	47
1.4.1. Current typology of early medieval blades and problems in its application to swords from Czech territory	52
1.4.2. Relationship between the length and width of blades	54
1.4.3. The course of blade tapering.....	61
1.4.4. The shape of a point	63
1.4.5. Fullers	64
1.4.6. Sword weight and balance	68
1.4.7. Summary of ninth- and tenth-century sword-blade development documented in Czech territory	70
1.5. EVOLUTION OF SWORD-BLADE MANUFACTURING TRADITIONS IN MEDIEVAL AND EARLY RENAISSANCE EUROPE	73
1.5.1. Blade manufacture between the late fifth and early eighth centuries.....	74
1.5.2. Blade manufacture between the second half of the eighth and early eleventh centuries	76
1.5.2.1. Phenomenon of hypereutectoid steels in the 9th and 10th centuries.....	84
1.5.3. Blade manufacture between the eleventh and thirteenth centuries	87
1.5.4. Blade manufacture between the late thirteenth and mid-sixteenth centuries	92
1.6. PATTERN-WELDING	97
1.7. SIGNS – MARKS AND INSCRIPTIONS ON BLADES	109
1.7.1. Significance and general trends of development of mediaeval signs on blades	109
1.7.2. Types of signs on early medieval sword blades from Czech territory	112
1.7.2.1. Simple pattern-welded marks	116
1.7.2.2. Inscriptions of the Ulfberht group.....	123
1.7.2.3. Inscription of the Fecit group	136
1.7.2.4. Geometric composite marks.....	139
1.7.2.5. Other composite marks or inscriptions.....	143
1.7.2.6. Signs of non-ferrous metals on early medieval sword blades.....	145
1.7.3. Marks on high medieval to early Renaissance sword blades from Czech territory	148
1.7.3.1. Marks in the form of a heart and equilateral cross	151
1.7.3.2. Marks in the form of a cross emerging from a heart.....	157

1.7.3.3.	Marks in the form of a cross	161
1.7.3.4.	Marks in the form of an imperial orb or a Calvary cross	165
1.7.3.5.	Marks in the form of a bishop's crosier	169
1.7.3.6.	Marks in the form of the so-called Passau wolf and unicorn	173
1.7.3.7.	Inscriptions on 11th-century and later blades	180
1.7.3.8.	Other types of signatures	195
1.7.3.9.	The testimony of marks on the origin and trade in weapons.....	202
1.7.4.	Marks on sword tangs.....	219
2.	HILTS	227
2.1.	TRENDS IN PREFERRED DIMENSIONS OF HILTS	228
2.2.	FUNCTION OF UPPER HILTS AND POMMELS	233
2.3.	GRIPS	239
2.4.	HILTS OF EARLY MEDIEVAL SWORDS	250
2.4.1.	Materials used for the manufacture of hilts.....	250
2.4.1.1.	Hilts from organic materials (swords found without a hilt)	252
2.4.1.2.	Hilts with components consisting of a non-metallic core supplemented with metallic elements.....	253
2.4.2.	Techniques of decoration applied to hilts	256
2.4.3.	Construction of upper hilts	261
2.4.4.	Construction of crossguards	274
2.4.5.	Typology of hilts of ninth to tenth-century swords from Czech territory	277
2.4.5.1.	Swords with a triangular pommel.....	278
2.4.5.2.	Carolingian swords with a three-lobed pommel	291
2.4.5.3.	Petersen Type K.....	297
2.4.5.4.	Petersen Type N	299
2.4.5.5.	Petersen Type X.....	302
2.4.5.6.	Petersen Type Y	309
2.4.5.7.	Crossguard fragment from Spytihněv and Petersen Type L-III	314
2.4.5.8.	Sword from Lázně Toušeň and Petersen Type S.....	316
2.4.5.9.	The St Stephen's Sword and Petersen Type T.....	319
2.4.5.10.	Sword from Olomouc – Univerzitní St. and Petersen Type V.....	322
2.4.5.11.	Fragment of an upper guard from Břeclav-Pohansko and Petersen Type W	324
2.4.5.12.	Hybrid sword from Boleradice	326
2.4.5.13.	Conclusion on the typology of hilts from the 9th and 10th centuries	327
2.5.	POMMELS OF HIGH MEDIEVAL TO EARLY MODERN SWORDS	330
2.5.1.	Pommels made of inorganic materials, organic materials and non-ferrous metals.....	330
2.5.2.	Construction and the attachment of pommels	335
2.5.3.	Decorated pommels of eleventh- to mid-sixteenth-century swords.....	341
2.5.4.	Typology of high medieval to early modern pommels.....	356
2.6.	CROSSGUARDS AND PROTECTIVE BASKETS OF HIGH MEDIEVAL TO EARLY MODERN SWORDS	384
2.6.1.	Typology of crossguards and protective baskets.....	386
3.	SPECIFIC TYPES OF SWORDS	403
3.1.	WOODEN SWORDS.....	403
3.2.	COMBAT, HUNTING AND OTHER SPECIAL SWORDS	407
3.3.	MAGISTRATES' SWORDS	413

4. SYMBOLISM OF THE SWORD	419
CONCLUSIONS	445
APPENDIX	449
