Introduction – The History 1

1	The First Steps	1
2	Other Boundary Value Problems	5
3	Maximal and Minimal Solution	7
4	The Nagumo Condition	8
5	Degree Theory	11
6	Non Well-ordered Lower and Upper Solutions	12
7	Variational Methods	13
8	Monotone Methods	15
9	Applications	19

I The Periodic Problem 25

1	A First Approach of Lower and Upper Solutions	25
2	Existence of C^2 -Solutions	31
3	Existence of $W^{2,1}$ -Solutions	37
4	<i>A Priori</i> Bound on the Derivative	42
5	BVP with Derivative Dependence : C^2 -Solutions	53
6	BVP with Derivative Dependence : $W^{2,1}$ -Solutions	59

II The Separated BVP 75

1	C^2 -Solutions	75
2	$W^{2,1}$ -Solutions	88
3	One-Sided Nagumo Condition	97
4	Dirichlet Problem	102
5	Other Boundary Value Problems	114

6	PDE Problems	126
III	Relation with Degree Theory	135
1	The Periodic Problem	135
2	The Dirichlet Problem	156
3	Non Well-ordered Lower and Upper Solutions	168
IV	Variational Methods	189
1	The Minimization Method	189
2	Local Minimum of the Functional	195
3	The Minimax Method	202
4	A Reduction Method	224
V	Monotone Iterative Methods	241
1	An Abstract Formulation	241
2	Well-ordered Lower and Upper Solutions	243
3	Lower and Upper Solutions in Reversed Order	259
4	A Mixed Approximation Scheme	272
VI	Parametric Multiplicity Problems	279
1	Periodic Solutions of the Liénard Equation	279
2	Periodic Solutions of the Rayleigh Equation	285
3	A Two Parameters Dirichlet Problem	294
4	Strong Resonance Problems	304
VII	Resonance and Non-resonance	315
1	A Periodic Non-resonant Problem	315
2	Resonance Conditions for the Periodic Problem	319
3	A Non-resonant Dirichlet Problem	321
4	Landesman-Lazer conditions for the Dirichlet problem	326
5	Other Resonance Conditions	330
6	Fredholm Alternative Results	333
7	Derivative Dependent Dirichlet Problem	337
VIII	Positive Solutions	345
1	Existence of One Solution	345
2	Some Multiplicity Results	358
3	Parametric Problems	365

IX	Problems with Singular Forces	375
1	A Periodic Problem	375
2	A Sublinear Dirichlet Problem	388
3	A Derivative Dependent Dirichlet Problem	396
4	A Multiplicity Result	399
X	Singular Perturbations	405
1	Boundary Layers at One End Point	405
2	Boundary Layers at Both End Points	413
3	Angular Solutions	415
4	Algebraic Boundary Layers	421
XI	Bibliographical Notes	425
1	Notes on Chapters 1 and 2	425
2	Notes on Chapter 3	427
3	Notes on Chapter 4	428
4	Notes on Chapter 5	429
5	Notes on Chapter 6	430
6	Notes on Chapter 7	431
7	Notes on Chapter 8	432
8	Notes on Chapter 9	432
9	Notes on Chapter 10	433
10	Notes on the Appendix	433
	Appendix	435
1	Degree Theory	435
2	Variational Methods	438
3	Spectral Results	441
4	Inequalities	452
5	Maximum Principle	456
6	Anti-maximum Principle	459
	Bibliography	463
	Index	488
