

# Contents

Dedication	v
List of Contributing Authors	vii
Preface	xv
<b>I CARCINOGENESIS AND CANCER GENETICS</b>	
1 Cancer: A Genetic Disorder	3
Robert A. Weinberg	
2 Oncogenes and Signal Transduction	17
Anna Bafico Luca Grumolato Stuart A. Aaronson	
3 Tumor Suppressor Genes	31
Arnold J. Levine Wenwei Hu Zhaohui Feng	
4 DNA Repair Pathways and Human Cancer	39
Alan D. D'Andrea	
5 Epigenetics and Cancer	57
Stephen B. Baylin	
6 Infectious Agents and Cancer	67
Peter M. Howley Joseph DeMasi	
7 Environmental Carcinogenesis	91
Erika L. Abel John DiGiovanni	
8 Animal Models: Flies, Fish, and Yeast	115
Elsbeth Payne Thomas Look	

9 Genetic Mouse Models of Cancer	129
Monte M. Winslow Tyler Jacks	

## II CANCER BIOLOGY

10 Cancer Stem Cells	141
Johanna Buchstaller Elsa Quintana Sean J. Morrison	
11 Signal Transduction by Growth Factor Receptors	155
Tony Pawson Claus Jorgensen	
12 Cell Growth	169
David A. Guertin David M. Sabatini	
13 Regulation of the Cell Cycle	177
Olena Barbash J. Alan Diehl	
14 Metabolism of Cell Growth and Proliferation	189
Ralph J. DeBerardinis Craig B. Thompson	
15 Apoptosis, Autophagy, and Necrosis	205
Frank C. Dorsey Meredith A. Steeves John L. Cleveland	
16 Cellular Senescence	221
Judith Campisi	

<b>17 The Tumor Microenvironment in Cancer Progression</b>	<b>229</b>	<b>27 Molecular Genetics of ALL</b>	<b>361</b>
Laurie E. Littlepage Mikala Egeblad Zena Werb		Karen R. Rabin Judith Margolin David G. Poplack	
<b>18 Tumor Angiogenesis</b>	<b>241</b>	<b>28 Biology of Chronic and Acute Myeloid Leukemia</b>	<b>371</b>
Brian Keith M. Celeste Simon		Alfonso Quintás-Cardama Jorge Cortes Hagop Kantarjian	
<b>19 Invasion and Metastasis</b>	<b>253</b>	<b>29 Molecular Biology of Childhood Neoplasms</b>	<b>385</b>
Lynn M. Matrisian Danny R. Welch		David Malkin	
<b>III MOLECULAR PATHOLOGY AND DIAGNOSTICS</b>		<b>30 Molecular Basis of Lung Cancer</b>	<b>397</b>
<b>20 Cancer Genomics</b>	<b>267</b>	Mitsuo Sato David S. Shames Luc Girard Adi F. Gazdar John D. Minna	
Paul T. Spellman Joseph F. Costello Joe W. Gray		<b>31 Molecular Abnormalities in Colon and Rectal Cancer</b>	<b>409</b>
<b>21 Transcriptome Analysis</b>	<b>283</b>	Guido T. Bommer Eric R. Fearon	
Jen-Tsan Ashley Chi Joseph R. Nevins Phillip G. Febbo		<b>32 Breast Cancer</b>	<b>423</b>
<b>22 Mass Spectrometry in Cancer Biology</b>	<b>293</b>	Bradley A. Arrick	
Pierre Chaurand David B. Friedman Richard M. Caprioli		<b>33 Molecular Basis of Prostate Cancer</b>	<b>431</b>
<b>23 Imaging and Cancer</b>	<b>309</b>	Kirsten L. Greene Long-Cheng Li Steven T. Okino Peter R. Carroll	
Shahriar S. Yaghoubi Sanjiv Sam Gambhir		<b>34 Molecular Pathogenesis of Epithelial Ovarian Cancer</b>	<b>441</b>
<b>24 Bioinformatics</b>	<b>325</b>	Robert C. Bast, Jr. Gordon B. Mills	
Kenneth H. Buetow		<b>35 Molecular Pathogenesis of Pancreatic Adenocarcinoma</b>	<b>455</b>
<b>25 Early Detection of Cancer: Molecular Screening</b>	<b>335</b>	Henry Q. Xiong James L. Abbruzzese	
Bryan Hennessy Robert C. Bast, Jr. Ana Maria Gonzalez-Angulo Gordon B. Mills		<b>36 Molecular Biology of Melanoma</b>	<b>463</b>
<b>IV MOLECULAR PATHOGENESIS OF SPECIFIC MALIGNANCIES</b>		Taha Merghoub David Polsky Alan N. Houghton	
<b>26 Lymphoma/Myeloma</b>	<b>351</b>	<b>37 Soft-Tissue Sarcomas</b>	<b>471</b>
Giovanni Tonon Kenneth C. Anderson		Julie D.R. Reimann Christopher D.M. Fletcher	

<b>38 Head and Neck Squamous Cell Carcinoma</b>	<b>479</b>	<b>48 Cancer Therapeutics</b>	<b>571</b>
Matthew G. Fury David G. Pfister		William N. Hait Eric Rubin Joseph R. Bertino	
<b>39 Primary Brain Tumors</b>	<b>487</b>	<b>49 Natural and Acquired Resistance to Cancer Therapies</b>	<b>583</b>
Matthew C. Havrda Mark A. Israel		Branimir I. Sikic	
<b>40 Epithelial Skin Cancer</b>	<b>495</b>	<b>50 Molecular Basis of Radiation Therapy</b>	<b>593</b>
Adam B. Glick Stuart H. Yuspa		Wendy A. Woodward James D. Cox	
<b>41 Endocrine Cancer</b>	<b>503</b>	<b>51 Hematopoietic Growth Factors and Cytokines</b>	<b>605</b>
Priya Kundra Kenneth D. Burman		Suhendan Ekmekcioglu Razelle Kurzrock Elizabeth A. Grimm	
<b>42 Gastric and Gastroesophageal Adenocarcinoma</b>	<b>511</b>	<b>52 Interferons</b>	<b>621</b>
Manish A. Shah David P. Kelsen		Ernest C. Borden Robert H. Silverman Ganes Sen	
<b>V MOLECULAR BASIS OF CANCER THERAPY</b>		<b>53 Cancer and the Cellular Immune Response</b>	<b>635</b>
<b>43 From Bench to Bedside with Targeted Therapies</b>	<b>521</b>	Yong-Jun Liu Patrick Hwu	
John Mendelsohn Garth Powis		<b>54 Cancer-Specific Vaccines</b>	<b>649</b>
<b>44 Screening Strategies for Targeted Therapeutics</b>	<b>531</b>	Drew M. Pardoll	
Robert H. Shoemaker Edward A. Sausville		<b>55 Monoclonal Antibody Therapy of Cancer</b>	<b>671</b>
<b>45 Animal Models to Predict Anticancer Efficacy</b>	<b>539</b>	Juan Gonzales Posada, Jr. Arthur E. Frankel	
Christopher L. Morton Peter J. Houghton		<b>56 Gene Therapy and Oncolytic Viruses</b>	<b>679</b>
<b>46 Pharmacokinetics, Pharmacodynamics, and Pharmacogenetics</b>	<b>547</b>	Frank McCormick W. Michael Korn	
Jerry M. Collins		<b>57 RNA as a Therapeutic Molecule</b>	<b>691</b>
<b>47 Phase 1 Trials Today</b>	<b>553</b>	George Adrian Calin Carlo Maria Croce	
Patricia M. LoRusso B. Nebiyu Bekele Scott A. Boerner Darren W. Davis Jeffrey L. Evelhoch Roy S. Herbst		<b>58 Heat Shock Protein 90 and the Proteasome</b>	<b>701</b>
		Len Neckers	
		<b>59 Cancer Chemoprevention</b>	<b>711</b>
		Scott M. Lippman J. Jack Lee	
		<b>Index</b>	<b>721</b>
