Preface ix

SECTION I

CELLULAR & MOLECULAR BASIS FOR MEDICAL PHYSIOLOGY 1

1. General Principles & Energy Production in Medical Physiology 1
2. Overview of Cellular Physiology in Medical Physiology 31
3. Immunity, Infection, & Inflammation 63

SECTION II

PHYSIOLOGY OF NERVE & MUSCLE CELLS 79

4. Excitable Tissue: Nerve 79
5. Excitable Tissue: Muscle 93
6. Synaptic & Junctional Transmission 115
7. Neurotransmitters & Neuromodulators 129
8. Properties of Sensory Receptors 149
9. Reflexes 157

SECTION III

CENTRAL & PERIPHERAL NEUROPHYSIOLOGY 167

10. Pain & Temperature 167
11. Somatosensory Pathways 173
12. Vision 181
13. Hearing & Equilibrium 203
14. Smell & Taste 219

15. Electrical Activity of the Brain, Sleep-Wake States, & Circadian Rhythms 229

16. Control of Posture & Movement 241

17. The Autonomic Nervous System 261

18. Hypothalamic Regulation of Hormonal Functions 273

19. Learning, Memory, Language, & Speech 289

SECTION IV

ENDOCRINE & REPRODUCTIVE PHYSIOLOGY 301

20. The Thyroid Gland 301

21. Endocrine Functions of the Pancreas & Regulation of Carbohydrate Metabolism 315

22. The Adrenal Medulla & Adrenal Cortex 337

23. Hormonal Control of Calcium and Phosphate Metabolism & the Physiology of Bone 363

24. The Pituitary Gland 377

25. The Gonads: Development & Function of the Reproductive System 391

SECTION V

GASTROINTESTINAL PHYSIOLOGY 429

26. Overview of Gastrointestinal Function & Regulation 429

27. Digestion, Absorption, & Nutritional Principles 451

28. Gastrointestinal Motility 469

29. Transport & Metabolic Functions of the Liver 479

SECTION VI

CARDIOVASCULAR PHYSIOLOGY 489

- 30. Origin of the Heartbeat & the Electrical Activity of the Heart 489**
- 31. The Heart as a Pump 507**
- 32. Blood as a Circulatory Fluid & the Dynamics of Blood & Lymph Flow 521**
- 33. Cardiovascular Regulatory Mechanisms 555**
- 34. Circulation Through Special Regions 569**

SUSAN M. BARMAN received her Ph.D. in Physiology from the University of California, Los Angeles (UCLA) in 1985. She completed her postdoctoral training at the University of Michigan in Ann Arbor, followed by a year of research at the National Institutes of Health (NIH) in Bethesda, Maryland. She joined the faculty of the University of Arizona in 1987, where she currently holds the rank of Professor of Physiology and Biophysics. Dr. Barman's research interests include the regulation of blood flow to the heart and brain, and the role of nitric oxide in cardiovascular function. She has published over 100 papers in peer-reviewed journals and has given numerous invited lectures at national and international meetings. Dr. Barman has served on the editorial boards of several journals, including *Journal of Applied Physiology*, *Journal of Cardiovascular Physiology*, and *Journal of Biomedicine and Biotechnology*. She is a member of the American Physiological Society, the American Heart Association, and the International Society for Cardiovascular Research.

SUSAN M. BARMAN to Gastrointestinal Physiology 489

In 1985, Dr. Barman began her postdoctoral training at the University of Michigan in Ann Arbor, followed by a year of research at the NIH in Bethesda, Maryland. She joined the faculty of the University of Arizona in 1987, where she currently holds the rank of Professor of Physiology and Biophysics. Dr. Barman's research interests include the regulation of blood flow to the heart and brain, and the role of nitric oxide in cardiovascular function. She has published over 100 papers in peer-reviewed journals and has given numerous invited lectures at national and international meetings. Dr. Barman has served on the editorial boards of several journals, including *Journal of Applied Physiology*, *Journal of Cardiovascular Physiology*, and *Journal of Biomedicine and Biotechnology*. She is a member of the American Physiological Society, the American Heart Association, and the International Society for Cardiovascular Research.

SUSAN M. BARMAN to Endocrinology & Reproductive Physiology 501

In 1985, Dr. Barman began her postdoctoral training at the University of Michigan in Ann Arbor, followed by a year of research at the NIH in Bethesda, Maryland. She joined the faculty of the University of Arizona in 1987, where she currently holds the rank of Professor of Physiology and Biophysics. Dr. Barman's research interests include the regulation of blood flow to the heart and brain, and the role of nitric oxide in cardiovascular function. She has published over 100 papers in peer-reviewed journals and has given numerous invited lectures at national and international meetings. Dr. Barman has served on the editorial boards of several journals, including *Journal of Applied Physiology*, *Journal of Cardiovascular Physiology*, and *Journal of Biomedicine and Biotechnology*. She is a member of the American Physiological Society, the American Heart Association, and the International Society for Cardiovascular Research.

SUSAN M. BARMAN to Renal Physiology 521

In 1985, Dr. Barman began her postdoctoral training at the University of Michigan in Ann Arbor, followed by a year of research at the NIH in Bethesda, Maryland. She joined the faculty of the University of Arizona in 1987, where she currently holds the rank of Professor of Physiology and Biophysics. Dr. Barman's research interests include the regulation of blood flow to the heart and brain, and the role of nitric oxide in cardiovascular function. She has published over 100 papers in peer-reviewed journals and has given numerous invited lectures at national and international meetings. Dr. Barman has served on the editorial boards of several journals, including *Journal of Applied Physiology*, *Journal of Cardiovascular Physiology*, and *Journal of Biomedicine and Biotechnology*. She is a member of the American Physiological Society, the American Heart Association, and the International Society for Cardiovascular Research.

SUSAN M. BARMAN to Neurophysiology 541

In 1985, Dr. Barman began her postdoctoral training at the University of Michigan in Ann Arbor, followed by a year of research at the NIH in Bethesda, Maryland. She joined the faculty of the University of Arizona in 1987, where she currently holds the rank of Professor of Physiology and Biophysics. Dr. Barman's research interests include the regulation of blood flow to the heart and brain, and the role of nitric oxide in cardiovascular function. She has published over 100 papers in peer-reviewed journals and has given numerous invited lectures at national and international meetings. Dr. Barman has served on the editorial boards of several journals, including *Journal of Applied Physiology*, *Journal of Cardiovascular Physiology*, and *Journal of Biomedicine and Biotechnology*. She is a member of the American Physiological Society, the American Heart Association, and the International Society for Cardiovascular Research.

SUSAN M. BARMAN to Immunophysiology 561

In 1985, Dr. Barman began her postdoctoral training at the University of Michigan in Ann Arbor, followed by a year of research at the NIH in Bethesda, Maryland. She joined the faculty of the University of Arizona in 1987, where she currently holds the rank of Professor of Physiology and Biophysics. Dr. Barman's research interests include the regulation of blood flow to the heart and brain, and the role of nitric oxide in cardiovascular function. She has published over 100 papers in peer-reviewed journals and has given numerous invited lectures at national and international meetings. Dr. Barman has served on the editorial boards of several journals, including *Journal of Applied Physiology*, *Journal of Cardiovascular Physiology*, and *Journal of Biomedicine and Biotechnology*. She is a member of the American Physiological Society, the American Heart Association, and the International Society for Cardiovascular Research.

SECTION VII

RESPIRATORY PHYSIOLOGY 587

35. Pulmonary Function 587

36. Gas Transport & pH in the Lung 609

37. Regulation of Respiration 625

SECTION VIII

RENAL PHYSIOLOGY 639

38. Renal Function & Micturition 639

39. Regulation of Extracellular Fluid Composition & Volume 665

40. Acidification of the Urine & Bicarbonate Excretion 679

Answers to Multiple Choice Questions 687

Index 689
