## Contents

<b>1</b>	<b>Rivers in the Anthropocene</b>	1
1.1	Structure and Function of River Systems	1
1.1.1	Physical Setting	1
1.1.2	The Fluvial Ecosystem	3
1.1.3	Vision of a Healthy River	5
1.2	Rivers in the Anthropocene	6
1.2.1	State of the world's River Systems	7
1.2.2	What is at Stake	10
1.2.3	What is to Be Done?	11
1.3	What to Expect in This Book	13
	References	16
<b>2</b>	<b>Streamflow</b>	19
2.1	The Water Cycle	19
2.1.1	Global Water Cycle	20
2.1.2	Water Balance of a Catchment	20
2.1.3	Surface Versus Groundwater Pathways	21
2.2	Streamflow	23
2.2.1	The Hydrograph	25
2.3	Flow Variation	26
2.3.1	The Likelihood of Extreme Events	27
2.3.2	Ecologically Relevant Flow Metrics	28
2.3.3	Hydrologic Classification	29
2.4	Human Influence on Streamflow	31
2.4.1	Dams and Impoundments	31
2.4.2	Effect of Land Use on Streamflow	34
2.4.3	Effect of Climate Change on Streamflow	36
2.5	Environmental Flows	38
2.6	Summary	41
	References	42
<b>3</b>	<b>Fluvial Geomorphology</b>	45
3.1	Geomorphological Features of a River System	45
3.1.1	The Drainage Network	46
3.1.2	The Stream Channel	47
3.1.3	Hydraulic Geometry	48
3.1.4	Channel Pattern	49
3.1.5	Pool-Riffle Features	50
3.1.6	The Floodplain	50

3.2	Sediments and Their Transport . . . . .	51
3.2.1	Bed Material . . . . .	52
3.2.2	Bank and Bed Erosion . . . . .	52
3.2.3	Particle Transport . . . . .	54
3.2.4	Sediment Load . . . . .	55
3.2.5	Factors Influencing Sediment Concentrations and Loads . . . . .	56
3.3	Fluvial Processes Along the River Continuum . . . . .	59
3.3.1	Fluvial Processes and Channel Morphologies . . . . .	60
3.3.2	Channel Dynamics Over Long Timeframes . . . . .	62
3.3.3	Channel Classifications and Their Uses . . . . .	62
3.4	Applications of Fluvial Geomorphology . . . . .	63
3.4.1	Dams . . . . .	64
3.4.2	Gravel Mining . . . . .	66
3.4.3	River Restoration . . . . .	66
3.5	Summary . . . . .	68
	References . . . . .	71
<b>4</b>	<b>Streamwater Chemistry . . . . .</b>	<b>75</b>
4.1	Dissolved Gases . . . . .	75
4.2	Major Dissolved Constituents of River Water . . . . .	78
4.2.1	Variability in Ionic Concentrations . . . . .	80
4.2.2	The Dissolved Load . . . . .	83
4.2.3	Chemical Classification of River Water . . . . .	84
4.3	The Bicarbonate Buffer System . . . . .	84
4.4	Biological Implications of Varying Ionic Concentrations . . . . .	86
4.4.1	Variation in Ionic Concentration . . . . .	86
4.4.2	Salinization and Alkalization of Freshwater Systems . . . . .	87
4.4.3	Effects of Acidity on Stream Ecosystems . . . . .	90
4.5	Legacy and Emerging Chemical Contaminants . . . . .	92
4.5.1	Legacy Contaminants in Rivers and Streams . . . . .	93
4.5.2	Emerging Contaminants in Running Waters . . . . .	93
4.6	Plastic Pollution in Freshwater Systems . . . . .	96
4.7	Summary . . . . .	97
	References . . . . .	98
<b>5</b>	<b>The Abiotic Environment . . . . .</b>	<b>101</b>
5.1	The Flow Environment . . . . .	102
5.1.1	Characterizing the Flow Environment . . . . .	104
5.1.2	Flows at the Scale of Organisms . . . . .	105
5.1.3	Influence of Extreme Flows . . . . .	109
5.1.4	Flow Management Applications . . . . .	111
5.2	Physical Habitat . . . . .	112
5.2.1	Inorganic Substrates . . . . .	113
5.2.2	Organic Substrates . . . . .	114
5.2.3	The Influence of Physical Habitat on Stream Assemblages . . . . .	114
5.2.4	Physical Habitat Restoration . . . . .	121
5.3	Temperature . . . . .	124
5.3.1	Shade . . . . .	127
5.3.2	Hydrologic Influences . . . . .	128
5.3.3	Urbanization . . . . .	128

5.3.4	Climate Change . . . . .	129
5.3.5	Temperature and Ecological Processes . . . . .	129
5.4	Summary . . . . .	133
	References . . . . .	134
<b>6</b>	<b>Primary Producers . . . . .</b>	<b>141</b>
6.1	Benthic Algae . . . . .	142
6.1.1	Factors Influencing Benthic Algae . . . . .	144
6.1.2	Temporal and Spatial Variation in Benthic Algae . . . . .	156
6.2	Macrophytes . . . . .	157
6.2.1	Limiting Factors for Macrophytes . . . . .	159
6.3	Phytoplankton . . . . .	161
6.3.1	Limiting Factors for Phytoplankton . . . . .	163
6.4	Human Influence . . . . .	165
6.5	Summary . . . . .	168
	References . . . . .	168
<b>7</b>	<b>Detrital Energy and the Decomposition of Organic Matter . . . . .</b>	<b>177</b>
7.1	Inputs, Storage and Transport of CPOM . . . . .	178
7.1.1	Sources of CPOM . . . . .	178
7.1.2	Storage of CPOM . . . . .	181
7.1.3	Anthropogenic Activities and CPOM Inputs . . . . .	183
7.1.4	Transport of CPOM . . . . .	184
7.2	The Decomposition of Organic Matter . . . . .	185
7.2.1	Breakdown and Decomposition of Coarse Particulates . . . . .	186
7.2.2	Physical and Chemical Conditions Influencing OM Decomposition . . . . .	186
7.2.3	The Lability of Organic Matter . . . . .	189
7.2.4	Microbial Succession and Decomposition Rates . . . . .	193
7.2.5	Decomposition of Macrophytes, Wood, and Other Sources of CPOM . . . . .	195
7.2.6	Macroconsumers and Detritivory . . . . .	196
7.2.7	Anthropogenic Change and Decomposition . . . . .	200
7.3	Sources and Processing of Fine Particulate Organic Matter . . . . .	202
7.3.1	Temporal and Spatial Variation in FPOM . . . . .	202
7.3.2	Storage and Transport of FPOM . . . . .	204
7.3.3	Lability of FPOM . . . . .	205
7.3.4	The Influence of Anthropogenic Activities on Fine Particulates . . . . .	207
7.4	Sources and Processing of Dissolved Organic Matter . . . . .	207
7.4.1	Sources of DOM . . . . .	209
7.4.2	Spatial and Temporal Variability in DOM . . . . .	211
7.4.3	Lability and Uptake of DOM . . . . .	211
7.4.4	Anthropogenic Influences on DOM . . . . .	213
7.5	Outgassing of Carbon from River Networks . . . . .	214
7.6	Summary . . . . .	215
	References . . . . .	216
<b>8</b>	<b>Stream Microbial Ecology . . . . .</b>	<b>225</b>
8.1	The Microbial Loop . . . . .	226
8.2	The Ecology of Biofilms . . . . .	230
8.3	Bacterioplankton . . . . .	237
8.4	Summary . . . . .	240
	References . . . . .	241

<b>9 Trophic Relationships</b>	247
9.1 Invertebrate Feeding Roles	248
9.1.1 Consumers of CPOM	249
9.1.2 Consumers of FPOM	253
9.1.3 Herbivory	256
9.1.4 Predaceous Invertebrates	258
9.1.5 Patterns in FFG Composition	260
9.1.6 Assimilation-Based Analyses of Feeding Roles	262
9.2 Trophic Roles of Lotic Fishes	264
9.2.1 Fish Trophic Categories	264
9.2.2 Patterns in Fish Trophic Composition	267
9.2.3 Feeding Mode and Morphology	268
9.2.4 Challenges of Fish Trophic Categorization	273
9.3 Other Vertebrates	274
9.4 Summary	277
References	279
<b>10 Species Interactions</b>	285
10.1 Herbivory	285
10.1.1 Direct Interactions Between Consumers and Producers	285
10.1.2 Indirect Effects of Grazer-Resource Interaction	292
10.1.3 Disturbance and Herbivory	294
10.2 Predation	295
10.2.1 The Predator-Prey Interaction	295
10.2.2 Effects of Predation on Prey Populations	301
10.3 Competition	305
10.3.1 Resource Partitioning	306
10.3.2 Experimental Studies of Competition	310
10.4 Parasitism	313
10.4.1 Direct and Indirect Effects	317
10.5 Summary	318
References	320
<b>11 Lotic Communities</b>	325
11.1 Global and Regional Patterns in Species Diversity	326
11.1.1 Species-Area Relationships	326
11.1.2 Latitudinal Diversity Gradients	328
11.1.3 Historical Explanations	329
11.2 Local Patterns in Species Diversity	332
11.2.1 Influence of the Regional Species Pool	332
11.2.2 Influence of Sampling Effort	334
11.2.3 Common and Rare Species	335
11.3 Local and Regional Controls of Community Assemblages	337
11.3.1 Consistency in Assemblage Composition	338
11.3.2 Local Environmental Factors and Spatial Characteristics of River Networks	338
11.3.3 The Habitat Template and Species Traits	341
11.4 Disturbance, Diversity, and Community Structure	344
11.4.1 The Influence of Extreme Events	346
11.4.2 Disturbance Frequency and Biotic Responses	347
11.5 Summary	350
References	351

<b>12 Energy Flow and Nutrient Cycling in Aquatic Communities . . . . .</b>	357
12.1 Food Web Ecology . . . . .	357
12.1.1 Assessing Energy Flow Through Food Webs . . . . .	358
12.1.2 Variability in Food Web Structure . . . . .	360
12.1.3 Factors Influencing Secondary Production . . . . .	361
12.1.4 Spatial Subsidies and Aquatic Community Response . . . . .	363
12.1.5 Flow Food Webs and Ecosystem Processes . . . . .	366
12.2 Aquatic Communities and Ecosystem Function . . . . .	370
12.2.1 Biodiversity and Ecosystem Function . . . . .	370
12.2.2 Temporal and Spatial Variation in Ecosystem-Level Effects . . . . .	372
12.2.3 Community-Driven Nutrient Dynamics . . . . .	373
12.3 Summary . . . . .	376
References . . . . .	378
<b>13 Nutrient Dynamics . . . . .</b>	383
13.1 Sources and Cycling of Nitrogen and Phosphorus . . . . .	384
13.1.1 Nitrogen Sources . . . . .	384
13.1.2 Nitrogen Cycling . . . . .	387
13.1.3 Phosphorus Sources . . . . .	388
13.1.4 Phosphorus Cycling . . . . .	391
13.2 Transport and Spiraling . . . . .	391
13.2.1 Physical Transport . . . . .	392
13.2.2 Nutrient Spiraling . . . . .	393
13.3 Factors Influencing Nutrient Dynamics . . . . .	396
13.3.1 Ambient Nutrient Concentrations . . . . .	396
13.3.2 Physical-Chemical Controls . . . . .	397
13.3.3 Hydrologic Controls . . . . .	399
13.3.4 Biotic Controls of Nutrient Cycling . . . . .	402
13.4 Global Trends in Stream Nutrient Dynamics . . . . .	407
13.4.1 Nitrogen . . . . .	409
13.4.2 Phosphorus . . . . .	411
13.5 Summary . . . . .	413
References . . . . .	414
<b>14 Carbon Dynamics and Stream Ecosystem Metabolism . . . . .</b>	421
14.1 Energy Flow in Lotic Systems . . . . .	421
14.2 Stream Ecosystem Metabolism . . . . .	428
14.2.1 Factors Controlling Autochthonous Production . . . . .	429
14.2.2 Factors Controlling Ecosystem Respiration . . . . .	429
14.2.3 Factors Controlling Gas Exchange . . . . .	430
14.2.4 Methods to Estimate Stream Metabolism . . . . .	430
14.2.5 Interpretation of Relationships Between Productivity and Respiration . . . . .	432
14.2.6 Patterns in Stream Metabolism . . . . .	433
14.2.7 Additional Factors Influencing Metabolic Processes . . . . .	435
14.3 Organic Matter Budgets . . . . .	440
14.4 Carbon Spiraling . . . . .	445
14.5 Summary . . . . .	447
References . . . . .	449
<b>15 How We Manage Rivers, and Why . . . . .</b>	453
15.1 Benefits from Intact Rivers . . . . .	454
15.1.1 Ecosystem Services . . . . .	454
15.1.2 Rheophilia . . . . .	456
