

# CONTENTS

<b>PREFACE</b> .....	<b>vii</b>
----------------------	------------

<b>1 BASIC FORMULAS</b> .....	<b>1</b>
-------------------------------	----------

Pressure Gradient 1. Hydrostatic Pressure 2. Converting Pressure into Mud Weight 3. Specific Gravity 4. Equivalent Circulating Density 5. Maximum Allowable Mud Weight 5. Pump Output 6. Annular Velocity 8. Capacity Formulas 10. Control Drilling 17. Buoyancy Factor 18. Hydrostatic Pressure Decrease When Pulling Pipe Out of the Hole 18. Loss of Overbalance Due to Falling Mud Level 20. Formation Temperature 21. Hydraulic Horsepower 22. Drill Pipe/Drill Collar Calculations 22. Pump Pressure/Pump Stroke Relationship 24. Cost Per Foot 25. Temperature Conversion Formulas 26.

<b>2 BASIC CALCULATIONS</b> .....	<b>29</b>
-----------------------------------	-----------

Volumes and Strokes 29. Slug Calculations 31. Accumulator Capacity 35. Bulk Density of Cuttings 38. Drill String Design (Limitations) 39. Ton-Mile Calculations 41. Cementing Calculations 44. Weighted Cement Calculations 50. Calculations for the Number of Sacks of Cement Required 51. Calculations for the Number of Feet to Be Cemented 54. Setting a Balanced Cement Plug 58. Differential Hydrostatic Pressure Between Cement in the Annulus and Mud Inside the Casing 62. Hydraulicing Casing 63. Depth of a Washout 67. Lost Returns—Loss of Overbalance 68. Stuck Pipe Calculations 69. Calculations Required for Spotting Pills 72. Pressure Required to Break Circulation 76.

<b>3 DRILLING FLUIDS .....</b>	<b>79</b>
Increase Mud Density 79. Dilution 83. Mixing Fluids of Different Densities 83. Oil Based Mud Calculations 85. Solids Analysis 89. Solids Fractions 93. Dilution of Mud System 94. Displacement—Barrels of Water/Slurry Required 95. Evaluation of Hydrocyclone 95. Evaluation of Centrifuge 97.	
<b>4 PRESSURE CONTROL.....</b>	<b>101</b>
Kill Sheets and Related Calculations 101. Prerecorded Information 113. Kick Analysis 122. Pressure Analysis 135. Stripping/Snubbing Calculations 137. Subsea Considerations 142. Workover Operations 151.	
<b>5 ENGINEERING CALCULATIONS.....</b>	<b>157</b>
Bit Nozzle Selection—Optimized Hydraulics 157. Hydraulics Analysis 161. Critical Annular Velocity and Critical Flow Rate 165. “d” Exponent 166. Cuttings Slip Velocity 167. Surge and Swab Pressures 171. Equivalent Circulation Density 179. Fracture Gradient Determination—Surface Application 182. Fracture Gradient Determination—Subsea Application 186. Directional Drilling Calculations 189. Miscellaneous Equations and Calculations 195.	
<b>APPENDIX A.....</b>	<b>201</b>
<b>APPENDIX B.....</b>	<b>209</b>
<b>INDEX .....</b>	<b>213</b>
