

## Contents

LIST OF CONTRIBUTORS .....	v
CONTENTS OF PREVIOUS VOLUMES .....	xi

### The Cortical and Subcortical Cytoplasm of the *Lymnaea* Egg

CHRISTIAAN P. RAVEN

I. Introduction .....	1
II. The Cortical Cytoplasm .....	3
III. The Subcortical Cytoplasm .....	18
IV. The Cortical Field .....	32
V. Discussion .....	37
References .....	42

### The Environment and Function of Invertebrate Nerve Cells

J. E. TREHERNE AND R. B. MORETON

I. Introduction .....	45
II. Structural Considerations .....	46
III. Distribution and Exchanges of Inorganic Ions and Molecules .....	64
IV. The Ionic Requirements for Electrical Activity .....	70
V. General Conclusions .....	84
References .....	85

### Virus Uptake, Cell Wall Regeneration, and Virus Multiplication in Isolated Plant Protoplasts

E. C. COCKING

I. Introduction: The Isolated Protoplast System .....	89
II. Uptake of Viruses by Isolated Protoplasts .....	92
III. Cell Wall Regeneration .....	108
IV. Virus Multiplication .....	115
References .....	122

## The Meiotic Behavior of the *Drosophila* Oocyte

ROBERT C. KING

I.	Introduction .....	125
II.	The Morphology of the <i>Drosophila</i> Ovary .....	127
III.	The Cytology of the <i>Drosophila</i> Oocyte Nucleus .....	129
IV.	Mitotic Crossing-over without Synaptonemal Complexes .....	134
V.	The Formulation of a Hypothesis concerning the Origin and Functioning of Synaptonemal Complexes .....	135
VI.	Nondisjunction in Meiotic Mutants Affecting Crossing-over .....	160
VII.	Summary .....	164
	References .....	165

## The Nucleus: Action of Chemical and Physical Agents

RENÉ SIMARD

I.	Introduction .....	169
II.	Normal Nuclear Fine Structure .....	170
III.	Structural Support for RNA Synthesis in the Nucleus .....	174
IV.	Agents That Primarily Affect the Nucleolus .....	175
V.	Agents That Primarily Affect the Nucleus .....	195
VI.	Summary and Concluding Remarks .....	203
	References .....	205

## The Origin of Bone Cells

MAUREEN OWEN

I.	Introduction .....	213
II.	Osteoprogenitor Cells .....	216
III.	Other Cells with Potential for Bone Formation .....	229
IV.	Concluding Remarks .....	234
	References .....	236

## Regeneration and Differentiation of Sieve Tube Elements

WILLIAM P. JACOBS

I.	Introduction .....	239
II.	Regeneration of Sieve Tubes .....	241

III.	Differentiation of Sieve Tubes in Organ or Tissue Culture .....	264
IV.	Normal Differentiation of Sieve Tubes .....	266
V.	Conclusions .....	270
	References .....	271

### Cells, Solutes, and Growth: Salt Accumulation in Plants Reexamined

F. C. STEWARD AND R. L. MOTT

I.	Introduction—The Solutes in Cells: Their Composition and Accumulation ..	276
II.	The System Involved: Its Membranes and Fine Structure .....	285
III.	Physiological Studies on Salt Accumulation in Plant Cells: Past and Recent Trends .....	294
IV.	The Growth Requirement of Cells: Their Implications for Solute Uptake ...	310
V.	Absorption Studies with Cultured Cells and Tissue Explants .....	317
VI.	Salient Features of Solute Accumulations in Cells: Perspectives and Prospects	355
	References .....	365
AUTHOR INDEX .....		371
SUBJECT INDEX .....		385
