

# Content

INTRODUCTION .....	5
1. HEAT OUTPUT OF SOLAR RADIATION IN THE VICINITY OF KOSICE .....	6
1.1. Basic Data about the Sun .....	6
1.2. The intensity of solar radiation in the vicinity of Kosice .....	6
1.2.1. Theoretical calculation of the intensity of solar radiation in the vicinity of Kosice .....	8
2. DESIGN AND DIMENSIONING OF SOLAR SYSTEMS .....	21
2.1. The procedure for designing .....	21
2.1.1. Concept determination .....	21
2.1.2. Data collection .....	21
2.1.3. Examining the boundary conditions .....	23
2.1.4. Condition of the building .....	23
2.1.5. Next steps in designing .....	23
3. FLUID SOLAR SYSTEMS .....	24
4. SOLAR COLLECTORS .....	28
4.1. Flat liquid solar collectors with transparent cover .....	30
4.1.1. Transparent absorber cover .....	32
4.1.2. Thermal insulation of the collector .....	33
4.1.3. Collector box .....	33
4.2. Operating parameters of flat solar collectors .....	33
4.2.1. Degree of utilization of solar collector .....	33
4.2.2. Thermal characteristics of collectors .....	34
4.2.3. 4.2.3. Some notions and definitions .....	35
5. COMPOSITIONS OF LIQUID SOLAR SYSTEMS .....	37
5.1. Heat storage tank .....	37
5.1.1. Capacity of HW storage tank .....	37
5.1.2. Size determination of solar storage tank .....	39
5.2. The heat exchanger .....	40
5.3. Circulator pumps .....	42
5.3.1. Alternating current powered pumps .....	43
5.3.2. Direct current powered pumps .....	43
5.4. Electrical regulation devices .....	43
5.5. Pipe material .....	43
5.5.1. Thermal insulation .....	44
5.6. Heat transfer fluid .....	45
6. ASSESSMENT OF OPERATIONAL PARAMETERS OF SOLAR COLLECTORS .....	47
6.1. Practical measures of solar collectors energy values .....	47
6.2. Analysis and processing of measured data .....	47
6.3. Development of methods for the evaluation of selected criteria .....	47
7. MEASURING THE ENERGY VALUES OF SOLAR COLLECTORS .....	48
7.1. Description of the technological device .....	49
7.1.1. Solar panels of thermic system .....	49

7.2. Monitoring and archive system .....	54
7.2.1. Description of program SOLARTHERM .....	54
7.2.2. SCANTHERM program setup .....	55
7.3. Data Collection .....	56
<b>8. ANALYSIS AND PROCESSING OF MEASURED DATA .....</b>	<b>58</b>
8.1. Determination of the effective power of collectors .....	58
8.2. Heat losses of solar collectors .....	63
<b>9. ASSESSMENT METHOD FOR SELECTED CRITERIA .....</b>	<b>65</b>
9.1. Criteria assessment procedure .....	65
<b>10. CONCLUSION .....</b>	<b>68</b>
<b>Bibliography .....</b>	<b>69</b>
