Preface to the Second Edition	<i>xv</i>
Preface to the First Edition	<i>xvi</i>
Acknowledgments	<i>xvii</i>
About the Companion Website	<i>xix</i>

1	Acids, Bases, and Buffers	1
1.1	Learning Outcomes	1
1.2	Introduction	1
1.2.1	Acids	1
1.2.1.1	Food Acidulants	2
1.2.1.2	Reactions of Food Acids	3
1.2.2	Bases	3
1.2.3	Buffers	3
1.3	Apparatus and Instruments	3
1.4	Reagents and Materials	4
1.5	Procedures	5
1.5.1	Determining the pH of a Solid Food	5
1.5.2	Preparation of a Buffer and Determination of Buffer Capacity	5
1.6	Problem Set	5
1.7	References	6
1.8	Suggested Reading	6
	Answers to Problem Set	6
2	Chemical Leavening Agents	7
2.1	Learning Outcomes	7
2.2	Introduction	7
2.2.1	Chemical Leavening Agents	8
2.2.1.1	Baking Soda	8
2.2.1.2	Baking Powders	8
2.2.2	Neutralizing Values	10
2.2.3	Leavening Rates	11
2.2.4	Effect of Leavening Acid on Dough Rheology	11
2.3	Apparatus and Instruments	11

2.4	Reagents and Materials	12
2.5	Procedures	12
2.5.1	Determination of Leavening Rates	12
2.5.1.1	The Apparatus	12
2.5.1.2	Experimental Treatments and Controls	12
2.5.1.3	Protocol	13
2.5.1.4	Data Analysis	13
2.5.2	Chemically Leavened Biscuits	13
2.5.2.1	Biscuit Formula	13
2.5.2.2	Treatments	14
2.5.2.3	Protocol	14
2.5.2.4	Volume Determination of Biscuits	14
2.6	Problem Set	14
2.7	Useful Formulas and Values	15
2.8	References	16
2.9	Suggested Reading	16
	Answers to Problem Set	16
3	Properties of Sugars	19
3.1	Learning Outcomes	19
3.2	Introduction	19
3.3	Apparatus and Instruments	20
3.4	Reagents and Materials	21
3.5	Procedures	21
3.6	Study Questions	22
3.7	References	22
3.8	Suggested Reading	22
4	Nonenzymatic Browning	23
4.1	Learning Outcomes	23
4.2	Introduction	23
4.2.1	Caramelization	23
4.2.2	The Maillard Reaction	24
4.2.2.1	Sugar	25
4.2.2.2	Amine	25
4.2.2.3	Temperature	26
4.2.2.4	Concentration	27
4.2.2.5	pH	27
4.3	Apparatus and Instruments	27
4.4	Reagents and Materials	28
4.4.1	Reagents to Be Prepared by the Student	28
4.4.2	Reagents to Be Prepared by the Teaching Staff	28
4.5	Procedures	28
4.5.1	Preparation of a Glucose/Glycine Model System	28
4.5.2	Heating Experiment	29
4.5.3	Measurement of Extent of Browning	29

454	Browning in Nonfat Dry Milk (Demonstration)	29
455	Role of Milk in Crust Color of Bread (Demonstration)	29
456	Browning in Cookies	30
456.1	Sugar Cookie Formula	30
456.2	Baking Directions	30
46	Problem Set	31
47	Study Questions	31
48	References	31
49	Suggested Reading	32
	Answers to Problem Set	32
5	Food Hydrocolloids	33
5.1	Learning Outcomes	33
5.2	Introduction	33
5.2.1	Alginate	34
5.2.2	Alginate Gels	35
5.2.3	Carrageenan	36
5.2.4	Locust Bean Gum and Guar Gum	37
5.2.5	Xanthan Gum	39
5.3	Apparatus and Instruments	39
5.4	Reagents and Materials	39
5.5	Procedures	40
5.5.1	Effect of Heat Treatment on Gelation	40
5.5.2	Effect of Concentration on Viscosity	40
5.5.3	Emulsion Stability	40
5.5.4	Diffusion Setting and Internal Setting Alginate Gels	41
5.5.4.1	Diffusion Setting Gel	41
5.5.4.2	Internal Setting Gel	41
5.6	Study Questions	41
5.7	References	41
5.8	Suggested Reading	42
6	Functional Properties of Proteins	43
6.1	Learning Outcomes	43
6.2	Introduction	43
6.2.1	Soybean Processing: Soy Milk, Tofu, and Soybean Protein Isolate	44
6.2.2	Assaying Protein Concentration	45
6.3	Apparatus and Instruments	45
6.4	Reagents and Materials	46
6.5	Procedures	46
6.5.1	Standard Curve for the Bradford Protein Assay	46
6.5.2	Effect of pH on Protein Solubility	46
6.5.2.1	Preparation of Protein Extracts	46
6.5.2.2	Measurement of Protein Concentration in the Extracts	47
6.5.3	Preparation of Soy Protein Isolate and Tofu	47
6.5.3.1	Extraction	47

- 6.5.3.2 Soy Protein Isolation 47
- 6.5.3.3 Production of Tofu 47
- 6.6 Problem Set 48
- 6.7 Study Questions 48
- 6.8 References 48
- 6.9 Suggested Reading 49
- Answers to Problem Set 49

7 Lactose 51

- 7.1 Learning Outcomes 51
- 7.2 Introduction 51
 - 7.2.1 Lactose Assay 53
- 7.3 Apparatus and Instruments 54
- 7.4 Reagents and Materials 55
- 7.5 Procedures 55
 - 7.5.1 Lactose and D-galactose Assay Protocol 55
 - 7.5.2 Lactase Assay 55
- 7.6 Experimental Design 55
- 7.7 Study Questions 56
- 7.8 References 56
- 7.9 Suggested Reading 56

8 Enzymatic Browning: Kinetics of Polyphenoloxidase 57

- 8.1 Learning Outcomes 57
- 8.2 Introduction 57
 - 8.2.1 Enzyme Kinetics 57
 - 8.2.2 PPO Assay 61
 - 8.2.3 Control of Enzymatic Browning 62
- 8.3 Apparatus and Instruments 62
- 8.4 Reagents and Materials 63
- 8.5 Procedures 63
 - 8.5.1 Preparation of Crude Enzyme Extract 63
 - 8.5.2 Enzyme Assay 63
 - 8.5.3 Data Treatment 64
 - 8.5.4 Required Notebook Entries 64
- 8.6 Problem Set 64
- 8.7 Study Questions 65
- 8.8 References 66
- Answers to Problem Set 66

9 Blanching Effectiveness 67

- 9.1 Learning Outcomes 67
- 9.2 Introduction 67
- 9.3 Apparatus and Instruments 69
- 9.4 Reagents and Materials 69
- 9.5 Procedures 70
- 9.6 Study Questions 70

9.7	References	70	11.8
9.8	Suggested Reading	70	11.9
10	Lipid Oxidation	71	12.1
10.1	Learning Outcomes	71	12.2
10.2	Introduction	71	12.3
10.2.1	The Chemistry of Lipid Oxidation	71	12.4
10.2.2	Control of Lipid Oxidation	75	12.5
10.2.2.1	Elimination of Oxygen	75	12.6
10.2.2.2	Scavenging of Free Radicals	75	12.7
10.2.2.3	Chelation of Metal Ions	76	12.8
10.2.3	Measurement of Lipid Oxidation in Foods	76	12.9
10.2.3.1	Thiobarbituric Acid Test (TBA Test)	76	12.10
10.2.3.2	Peroxide Value	77	13.1
10.2.3.3	Conjugated Diene Methods	77	13.2
10.2.3.4	Oxygen Bomb Test	77	13.3
10.2.3.5	Total and Volatile Carbonyl Compounds	77	13.4
10.2.3.6	Anisidine Value Test	77	13.5
10.3	Apparatus and Instruments	78	13.6
10.4	Reagents and Materials	78	13.7
10.5	Procedures: Lipid Oxidation in Turkey Meat	78	13.8
10.6	Problem Set: Calculation of TBARS	79	13.9
10.7	Study Questions	80	14.1
10.8	References	81	14.2
10.9	Suggested Reading	81	14.3
	Answers to Problem Set	82	14.4
11	Ascorbic Acid: Stability and Leachability	83	14.5
11.1	Learning Outcomes	83	14.6
11.2	Introduction	83	14.7
11.2.1	Chemistry	83	14.8
11.2.2	Functions of Ascorbic Acid in Foods	85	14.9
11.2.2.1	Oxygen Scavenger	85	15.1
11.2.2.2	Free Radical Scavenger	86	15.2
11.2.2.3	Control of Enzymatic Browning	86	15.3
11.2.2.4	Dough Improver	87	15.4
11.2.3	Stability of Ascorbic Acid	87	15.5
11.2.4	Rationale for the Experiment	88	15.6
11.3	Apparatus and Instruments	88	15.7
11.4	Reagents and Materials	89	15.8
11.5	Procedures	89	15.9
11.5.1	Ascorbic Acid Standard Curve	89	16.1
11.5.2	Effect of pH on Ascorbic Acid Stability	89	16.2
11.5.3	Effects of Temperature, pH, and Cu^{2+} on the Stability of Ascorbic Acid	90	16.3
11.5.4	Effect of Cooking on the Ascorbic Acid Content of Cabbage	90	16.4
11.6	Problem Set	90	16.5
11.7	Study Questions	91	16.6

- 11.8 References 91
- Answers to Problem Set 92

- 12 Hydrolytic Rancidity in Milk 93**
- 12.1 Learning Outcomes 93
- 12.2 Introduction 93
- 12.2.1 The Copper Soap Solvent Extraction Method 94
- 12.3 Apparatus and Instruments 96
- 12.4 Reagents and Materials 96
- 12.5 Treatments and Controls 96
- 12.6 Procedures 97
- 12.6.1 Standard Curve 97
- 12.6.2 Free Fatty Acids in Milk 97
- 12.6.3 Calculations 97
- 12.7 Problem Set 98
- 12.8 Study Questions 98
- 12.9 References 98
- 12.10 Suggested Reading 98
- Answers to Problem Set 99

- 13 Caffeine in Beverages 101**
- 13.1 Learning Outcomes 101
- 13.2 Introduction 101
- 13.3 Apparatus and Instruments 103
- 13.4 Reagents and Materials 103
- 13.5 Operation of the HPLC 103
- 13.6 Procedures 104
- 13.6.1 Standard Curve 104
- 13.6.2 Caffeine in Soda and Energy Drinks 105
- 13.6.3 Caffeine in Coffee 105
- 13.6.4 Caffeine in Tea 105
- 13.7 Data Analysis 105
- 13.8 References 105
- 13.9 Suggested Reading 106

- 14 Color Additives 107**
- 14.1 Learning Outcomes 107
- 14.2 Introduction 107
- 14.2.1 Binding to Wool 110
- 14.2.2 Removal from Wool 110
- 14.2.3 Solid-Phase Extraction (SPE) 110
- 14.2.4 Separation and Identification 111
- 14.3 Apparatus and Instruments 111
- 14.4 Reagents and Materials 112
- 14.5 Procedures 112
- 14.5.1 Qualitative Identification of Artificial Colors from Food Products 112
- 14.5.2 Separation and Identification of the Extracted Colors 113

14.5.3	Quantitative Analysis of FD&C Red Dye # 40 in Cranberry Juice	113
14.6	Study Questions	114
14.7	References	114
14.8	Suggested Reading	114
15	Plant Pigments	115
15.1	Learning Outcomes	115
15.2	Introduction	115
15.3	Apparatus and Instruments	119
15.4	Reagents and Materials	119
15.5	Procedures	120
15.5.1	Extraction and Separation of Lipid Soluble Plant Pigments	120
15.5.2	Extraction of Water Soluble Plant Pigments	120
15.5.3	Effect of pH on the Color of Water Soluble Plant Pigments	120
15.5.4	Demonstration	121
15.6	Study Questions	121
15.7	References	121
15.8	Suggested Reading	121
16	Meat Pigments	123
16.1	Learning Outcomes	123
16.2	Introduction	123
16.2.1	Meat Curing	125
16.2.2	Effect of Cooking on Meat Color	126
16.3	Apparatus and Instruments	127
16.4	Reagents and Materials	127
16.5	Procedures	127
16.5.1	Preparation and Spectral Analysis of Myoglobin, Oxymyoglobin, and Metmyoglobin	127
16.5.2	Preparation and Spectral Analysis of Nitric Oxide Myoglobin	128
16.5.3	Concentration of Metmyoglobin, Myoglobin, and Oxymyoglobin	128
16.5.4	Demonstration	129
16.6	Study Questions	129
16.7	References	129
16.8	Suggested Reading	130
17	Meat Tenderizers	131
17.1	Learning Outcomes	131
17.2	Introduction	131
17.3	Apparatus and Instruments	132
17.4	Reagents and Materials	133
17.5	Procedures	133
17.5.1	Preparation of Samples and Standards	133
17.5.1.1	Sample Treatments	133
17.5.1.2	Protein Extraction and Preparation for Electrophoresis	134
17.5.1.3	Preparation of SDS-PAGE Standards for Electrophoresis.	134
17.5.2	Electrophoresis	134

17.5.2.1	Loading and Running the Gel	134
17.5.2.2	Staining the Gel	134
17.5.3	Demonstration	134
17.6	Study Questions	134
17.7	References	135
17.8	Suggested Reading	135
18	Detection of Genetically Engineered Maize Varieties	137
18.1	Learning Outcomes	137
18.2	Introduction	137
18.2.1	Detection of a GE Protein by Immunoassay	140
18.2.2	Detection of a Trans Gene by PCR	141
18.3	Apparatus and Instruments	143
18.4	Reagents and Materials	143
18.5	Procedures	144
18.6	Study Questions	145
18.7	References	145
18.8	Suggested Reading	146
19	Food Emulsions and Surfactants	147
19.1	Learning Outcomes	147
19.2	Introduction	147
19.2.1	Emulsions	147
19.2.2	Surfactants	147
19.2.3	Surfactants in Food Systems	148
19.3	Part I – Butter Churning (Phase Inversion)	150
19.3.1	Materials and Methods	150
19.3.1.1	Materials for Buttermaking	150
19.3.1.2	Buttermaking Procedure	150
19.3.2	Study Questions	151
19.4	Part II – Margarine Manufacture (Use of Surfactant for Semi-solid Foods)	151
19.4.1	Materials and Methods	151
19.4.1.1	Materials for Margarine Manufacture	151
19.4.1.2	Manufacture Procedure	152
19.4.2	Study Questions	152
19.5	Part III – Dispersion of Eugenol in Water (Surfactant Solubilization Capacity)	152
19.5.1	Materials and Methods	153
19.5.1.1	Materials for Dispersion Experiment	153
19.5.1.2	Experimental Procedure	153
19.5.2	Study Questions	154
19.6	Part IV – Mayonnaise Stability	155
19.6.1	Materials and Methods	155
19.6.1.1	Materials for Mayonnaise Experiment	155
19.6.1.2	Experimental Procedure	155
19.6.2	Study Questions	156
19.7	References	156
19.8	Suggested Reading	158

Appendix I 159**Conversion Factors 159****Appendix II 161****Concentration 161**

Definition 161

Suggested Reading 162

Appendix III 163**Acids, Bases, Buffers, and pH Measurement 163**

Review of pH and Acid–Base Equilibria 163

Acids and Bases 163

Acid/Base Equilibria 163

The pH Scale 165

pK 165

Buffers: Functions and Uses 166

Problems 167

Choosing a Buffer System 169

Preparation of Buffers 171

Activity and Ionic Strength 173

pH Measurement 174

Making pH Measurements 175

References 176

Suggested Reading 176

Appendix IV 177**Spectrophotometry 177**

Introduction 177

Operation of a Spectrophotometer 180

Notes for Operators 180

Problem Set 180

References 181

Answers to Problem Set 181

Appendix V 183**Chromatography 183**

What Is Chromatography? 183

Chromatography Terminology 183

Types of Chromatography 184

Adsorption Chromatography (AC) 185

Liquid–Liquid Partition Chromatography (LLPC) 185

Bonded Phase Chromatography (BPC) 185

Ion-Exchange Chromatography (IEC) 185

Gel Permeation Chromatography (GPC) 185

High-Performance Liquid Chromatography 186

The HPLC System 187

References 188

Suggested Reading 189

Appendix VI 191
Electrophoresis 191
Introduction 191
References 195
Suggested Reading 196

Appendix VII 197
Glossary 197

Appendix I 199
Conversion Factors 199
Appendix II 191
Concentration 191
Definition 191
Suggested Reading 193
Appendix III 193
Acid-Base Buffers and pH Measurements 193
Review of pH and Acid-Base Equilibria 193
Acids and Bases 193
Acid-Base Equilibria 193
The pH Scale 193
pH 193
Buffers: Functions and Uses 196
Problems 197
Choosing a Buffer System 199
Preparation of Buffers 199
Activity and Ionic Strength 199
pH Measurement 199
Making pH Measurements 199
References 199
Suggested Reading 199
Appendix IV 197
Spectrophotometry 197
Introduction 197
Operation of a Spectrophotometer 199
Notes for Operators 199
Problem Set 199
References 199
Answers to Problem Set 199
