

	page
L1-01 Discovering the general architecture of protein families with OverProt <i>Midlik Adam, CEITEC, Masaryk University</i>	7
L1-02 Protein structure quality trends <i>Svobodová Radka, Masaryk University, CEITEC</i>	8
L1-03 A Structure Validation Concept Beyond the Static Resolution in Polymers <i>Sychrovský Vladimír, UOCHB AV CR</i>	9
L1-04 Advanced Computational Protocol for Atomistic Understanding and Modulation of Insulin Binding to Insulin Receptor <i>Yurenko Yevgen, IOCB Prague</i>	10
L2-01 SeqUIa: a software platform for GUI based next-generation sequencing data analysis <i>Bystry Vojtech, CEITEC MU</i>	13
L2-02 Deep Learning the binding patterns of RNA-binding proteins using ENNGene <i>Chalupová Eliška, Masaryk University</i>	14
L2-03 HiC-TE: a pipeline for HiC data analysis in the context of repeats and genome organization <i>Lexa Matej, Masaryk University</i>	15
L2-04 Unsupervised automated population detection and immunophenotypisation tool for analysis of multiparameter flow cytometric data <i>Podolská Tereza, Second Faculty of Medicine, Charles University and University Hospital Motol, Prague, Czech Republic</i>	16
L2-05 NarCoS: Integrating genomic surveillance of SARS-CoV-2 positive clinical samples in Slovak republic <i>Szemes Tomáš, Vedecky park Univerzity Komenskeho</i>	18

## LIST OF LECTURES

	page
L3-01 Towards the interpretation of tandem mass spectra with self-supervised machine learning <i>Bushuiev Roman, IOCB</i>	21
L3-02 Machine learning estimated docking scores <i>Clarová Kamila, UCT Prague</i>	22
L3-03 Feature interrelation profiling <i>Čmelo Ivan, VŠCHT Praha</i>	23
L3-04 Circular fingerprint inversion: an algorithmic approach <i>Dehaen Wim, University of Chemistry and Technology, Prague</i>	24
L3-05 On the Importance of Physically Correct Models for Describing Protein/Ion/Ligand Binding <i>Lepšík Martin, Inst. Org Chem Biochem, Czech Academy of Sciences</i>	25
L3-06 Multiple instance learning: a new method for 3D QSAR modelling <i>Matveieva Maria, VŠCHT Praha</i>	26
L3-07 Nature-Inspired Antivirals with Distinctive Mechanisms of Action: Focus on HIV and SARS-CoV-2 <i>Ntie-Kang Fidele, University of Buea</i>	27
L3-08 Techniques for improving optimization performance of molecular generators <i>Pešina František, UCT</i>	28
L4-01 Prediction of terpene synthase activity using self-supervised deep learning <i>Pluskal Tomáš, IOCB Prague</i>	31
L4-02 Using ChIP-nexus to decipher the architecture of transcription factor complexes <i>Převorovský Martin, Charles University, Faculty of Science</i>	32

## LIST OF LECTURES

	page
L4-03 Transformer Language Models for Genomic Sequences <i>Simecek Petr, CEITEC MU</i>	33
L4-04 Modelling of Ago2 Binding using CLASH <i>Alexiou Panagiotis, CEITEC-MU</i>	34
L4-05 Prediction of sequence divergence from the quality of mapping <i>Kovacova Viera, IBP, University of Cologne, Germany</i>	35
L4-06 Interpreting uncertainty in differential expression with DESeq2 <i>Modrák Martin, Institute of Microbiology of the Czech Academy of Sciences</i>	36
L4-07 GC content of transposons and of their (animal) host genomes <i>Symonova Radka, Institute of Hydrobiology, Biology Center, Czech Academy of Sciences</i>	37

	page
P-01	41
The use of a targeted RNA sequencing-based approach for the detection of clinically relevant fusion genes in pediatric cancer patients	
<i>Al Tukmachi Dagmar, CEITEC, Masaryk University, Brno</i>	
P-02	65
Detection of tail fibre proteins via machine learning methods	
<i>Baláž Andrej, Geneton s.r.o.</i>	
P-03	43
PENGUINN-RNA: prediction of RNA G-quadruplexes using interpretable Neural Networks	
<i>Bhagat Kriti, Masaryk University</i>	
P-04	66
Bioinformatics workflow for reliable detection of SARS-CoV-2 variants in wastewater data generated by massively parallel sequencing	
<i>Böhmer Miroslav, Comenius University Science Park</i>	
P-05	44
Computational method for the detection of microsatellite instability in tumor tissue samples	
<i>Budiš Jaroslav, Geneton Ltd.</i>	
P-06	67
Mining novel terpene synthases from large-scale sequence repositories	
<i>Čalounová Tereza, Ústav organické chemie a biochemie AV ČR</i>	
P-07	45
Bioinformatics tools for Non-Invasive Prenatal Testing	
<i>Dohnalová Hana, GENNET, s.r.o.</i>	
P-08	68
ExP Heatmap: visualization of high-dimensional pairwise genomic data	
<i>Ehler Edvard, Ústav molekulární genetiky AV ČR, v. v. i.</i>	
P-09	46
Paperfly: ab initio binding site reconstruction	
<i>Faltejsková Kateřina, Ústav organické chemie a biochemie AV ČR</i>	

	page
P-10	69
Formalized machine-assisted flow cytometry immunophenotyping <i>Fišer Karel, Second Faculty of Medicine, Charles University, Prague, Czech Republic</i>	
P-11	47
Accessing chemical and biological datasets through SPARQL endpoints <i>Galgonek Jakub, Institute of Organic Chemistry and Biochemistry of the Czech Academy of Sciences</i>	
P-12	71
miRBind: a Deep Learning method for miRNA binding classification <i>Giassa Ilektra-Chara, CEITEC Masaryk University</i>	
P-13	48
Genomic Benchmarks: A Collection of Datasets for Genomic Sequence Classification <i>Grešová Katarína, CEITEC-MU</i>	
P-14	72
Diversity and transcriptome analysis of the maize B chromosome <i>Hloušková Lucie, Institute of Experimental Botany AS CR, v. v. i.</i>	
P-15	49
Mining data from sweet cherry resequencing <i>Holušová Katerina, Institute of Experimental Botany AS CR, v. v. i.</i>	
P-16	73
NanoLuc luciferase may not be as "nano" as thought <i>Horáčková Jana, Masaryk University</i>	
P-17	50
Can structural information help with phosphorylation prediction? <i>Kiefl Yannick, Ludwigs Maximilians University, Technical University of Munich, Charles University</i>	
P-18	74
Comparison of characteristics of cfDNA fragments between patients with severe SARS-COV-2 infection and healthy control group <i>Krampl Werner, Geneton s.r.o.</i>	
P-19	51
Reproducible PDX Genomic Data Analysis <i>Křenek Aleš, CESNET</i>	

P-20	75
PrankWeb3 - binding site predictions for experimental and predicted protein structures <i>Krivák Radoslav, Charles University</i>	
P-21	52
Decoding differentially expressed genes in artificial light at night (ALAN) induced zebrafish ovary and development of a possible major lifestyle diseases gene signature <i>Labala Rajendra, Institute of Molecular Genetics of the Czech Academy of Sciences</i>	
P-22	76
HCV IRES Secondary Structure Search in Human 5'UTRs <i>Le Anh Vu, Czech Technical University</i>	
P-23	54
scdrake: a reproducible and scalable pipeline for scRNA-seq data analysis <i>Novotný Jiří, Institute of Molecular Genetics of the Czech Academy of Sciences</i>	
P-24	77
Investigating the Interaction Between Human DHX15 Helicase and Viral G-Patch Domain Within the Virions of Mason-Pfizer Monkey Virus Using UV Crosslinking and Immunoprecipitation <i>Pavlů Anna, UCT Prague</i>	
P-25	55
Exosomes produced by melanoma cells significantly influence the biological properties of normal and cancer-associated fibroblasts <i>Pfeiferová Lucie, IMG, Laboratory of Genomics and Bioinformatics</i>	
P-26	78
Atomic Charge Calculator II – a web service for calculating partial atomic charges <i>Raček Tomáš, CEITEC Masarykova Univerzita</i>	
P-27	56
QM-like partial atomic charges for AlphaFold available online <i>Schindler Ondřej, Masaryk University</i>	
P-28	79
Exploring possibility of reusing LIGR-seq datasets for biological data supported RNA secondary structure prediction <i>Schwarz Marek, Institute of Microbiology</i>	

## LIST OF POSTERS

	page
P-29	57
Measures of quality of clusters in hierarchical clustering of flow cytometry data <i>Sieger Tomáš, ČVUT v Praze, Fakulta elektrotechnická</i>	
P-30	80
Probes & Drugs Portal in 2022: A Hub for the Integration of High-quality Bioactive Compound Sets <i>Škuta Ctibor, IMG CAS</i>	
P-31	58
Combination of expert decision systems with artificial intelligence leads to superior accuracy of automated prediction of clinical effect of copy number variation <i>Sládeček Tomáš, Geneton</i>	
P-32	81
Exploring the possibilities of formulation the rules for permeation enhancement <i>Storchmannová Kateřina, Palacký University in Olomouc</i>	
P-33	59
PredictSNP ONCO: A Web Server for Rapid Structural Bioinformatics Analysis of the Effect of Cancer-associated Mutations <i>Štourač Jan, Mezinárodní centrum klinického výzkumu Fakultní nemocnice u sv. Anny v Brně</i>	
P-34	82
NextDOM 2.0: Detector of Somatic Point Mutations in Leukemias Resistant to Therapy <i>Suchánková Pavla, Ústav Hematologie a krevní transfuze</i>	
P-35	60
Analysis of sequencing data from reprogramming of immortalized cell line <i>Svatoňová Petra, Institute of Molecular Genetics</i>	
P-36	83
Analysis of Molecular Simulation by adversarial Autoencoder <i>Tedeschi Guglielmo, University of Chemistry and Technology</i>	
P-37	61
Bioinformatic pipeline for comprehensive analysis of various small RNAs through RNA sequencing <i>Trachtova Karolina, CEITEC</i>	

## LIST OF POSTERS
