

## CONTENTS

FOREWORD .....	V
INTRODUCTION .....	VI
ACKNOWLEDGEMENTS .....	XI
CHRONOLOGICAL TABLE .....	XIII
LIST OF TEXT-FIGURES .....	XIV
LIST OF GRAPHS .....	XX
LIST OF TABLES .....	XXII
LIST OF PLATES .....	251
1 HISTORY OF RESEARCH .....	1
1.1 L'homme fossile n'existe pas .....	1
1.2 The earliest records .....	2
1.3 Discovery of <i>Dryopithecus</i> and its effects on research .....	5
1.4 The Siwalik expeditions .....	11
1.5 Africa - the cradle of Hominids? .....	15
1.6 Back to Europe .....	17
1.6.1 New localities .....	17
1.6.2 <i>Ramapithecus</i> rehabilitated .....	19
1.6.3 Rudabánya and the Balcans .....	20
1.7 Bridge between Africa and Eurasia .....	21
1.8 Progress from the Siwaliks? .....	23
1.9 The model is valid no longer .....	24
1.9.1 New flow from South China .....	27
1.9.2 No facts - many theories .....	29
2 THE CHANGING STAMMBAUM .....	31
2.1 The theoreticians .....	31
2.1.1 Haeckel 1866, 1895 .....	31
2.1.2 Ameghino 1884, 1889 .....	32
2.2 No theories .....	32
2.2.1 Schlosser 1887 .....	32
2.3 Anthropologists begin to think in time .....	34
2.3.1 Bonarelli 1909 .....	34
2.4 Increasing of documentary elements .....	35
2.4.1 Pilgrim 1915 .....	35
2.4.2 Gregory 1916, 1920 .....	37
2.4.3 Remane, 1921 .....	37
2.4.4 Gregory and Hellman 1926 .....	38
2.4.5 Pilgrim 1927 .....	39
2.4.6 Osborn 1927 .....	39
2.4.7 Naef 1933 .....	40
2.4.8 Weinert 1935, 1941 .....	40
2.5 Model - instead of stammbaum .....	40
2.6 The <i>Oreopithecus intermezzo</i> .....	42
2.6.1 Hürzeler 1962, 1968 .....	42
2.7 The framework of a phyletic tree .....	43
2.7.1 Szalay 1976 .....	44
2.7.2 Gingerich 1976 .....	44
2.7.3 Delson 1977 .....	45
2.8 The "counter-stammbaum" .....	46
2.8.1 Pilbeam 1979 .....	46
2.8.2 Ginsburg and Mein 1980 .....	47
2.9 The "balanced" stammbaum .....	49
2.9.1 Howell 1980 .....	49
2.9.2 Uncertainty in the formation of humans .....	50

3	RUDABÁNYA - THE LOCALITY OF THE HOMINOIDS .....	
3.1	The geological framework.....	
3.2	Geographical and stratigraphical conditions at the fauna.....	
3.3	Sedimentary relationships.....	
3.4	The Lower Pannonian flora and fauna at Rudabánya .....	
3.4.1	The flora .....	
3.4.1.1	The macroflora .....	
3.4.1.2	Palynology .....	
3.4.2	The fauna .....	
3.4.2.1	Invertebrates.....	
3.4.2.2	The vertebrate fauna .....	
3.4.2.3	The ecological picture suggested by the vertebrate fauna .....	
4	THE FOSSIL HOMINOIDEA OF RUDABÁNYA .....	
4.1	The fossil record .....	
4.2	Cranials.....	
4.2.1	Frontals.....	
4.2.2	The nasal root .....	
4.2.3	The maxillary surface.....	
4.2.4	The Highmore cavities.....	
4.2.5	Apertura pyriformis.....	
4.2.6	Praemaxillare.....	
4.2.7	The palatal vault .....	
4.2.8	The mandible.....	
4.2.8.1	Corpus.....	
4.2.8.2	Symphysis and mentum.....	
4.2.8.3	Ramus ascendens.....	
4.3	The dental material.....	
4.3.1	Incisors .....	
4.3.2	Canines.....	
4.3.3	Premolars .....	
4.3.4	Molars.....	
4.4	The dentition .....	
4.4.1	The dental arcade .....	
4.4.2	Tooth eruption.....	
4.4.3	Occlusion .....	
4.4.4	Chewing.....	
4.4.5	Enamel thickness .....	
4.5	Postcranials .....	
4.5.1	The humerus fragment .....	
4.5.2	The ulna fragment .....	
4.5.3	Caput femoris .....	
4.5.4	The patella .....	
4.5.5	The knee joint .....	
4.5.6	Astragalus .....	
4.5.7	Phalanges.....	
5	COEXISTENCE - CENOLOGY - TAPHONOMY .....	
6	THE RUDABÁNYA HOMINOID POPULATION .....	
6.1	Individual count .....	
6.2	Age classes .....	
6.3	Sexual dimorphism.....	
6.4	Metrical differences .....	
7	THE PRESENT STATE OF HOMINOID TAXONOMY .....	
7.1	Taxonal nomenclature .....	
7.2	Principal distinctions and the system .....	
7.3	Paleogeographical connections and chronological evidence.....	
8	OUTLOOK.....	
9	CLOSING COMMENTS .....	
	LITERATURE.....	
	PLATES.....
