

Contents

<i>Preface</i>	VII
<i>List of Symbols and Notations</i>	XIV
<i>Chapter I Preliminaries</i>	1
1. Selection of Basic Concepts from Algebra	1
A. Matrices and Determinants	1
B. Vectors in Three-dimensional Euclidean Space	7
C. Vector Spaces	15
D. Mappings of Sets and Vector Spaces	21
2. Basic Concepts from Group Theory	28
3. Basic Topological Concepts	35
4. Differential Geometry of Curves and Ruled Surfaces in E_3	49
5. Differentiable Manifolds, Lie Groups	69
<i>Chapter II Motion on the Unit Sphere</i>	94
1. Definition of Spherical Motion	94
2. Various Ways of Representing Motion, Euler Angles	107
A. Relations between the Groups $O(3)$, J , $SU(2)$	107
B. Introducing Euler Angles	109
3. Directing Cones, Centroides, and Invariants of Spherical Motion	119
4. Invariants of the Trajectory of a Point, Special Motions	163
5. Kinematics of Spherical Motion	189
<i>Chapter III Kinematics of Space Motion</i>	197
1. Lie Group of Congruences of E_3 and its Lie Algebra	197
2. Klein Quadrics	206
3. Representation of Space Motion, Associated Spherical Motion	212
4. Directing Cones of Space Motion, Axoids, Elementary Motions	223
5. Invariants of Motion	239
6. Invariants of Axoids and Relations between the Invariants of Motion and the Invariants of Axoids	262
7. Trajectory of a Point	270

8. Special Motions	294
9. Dual Vectors and Trajectories of Lines	318
10. Fields of Velocities and Acceleration	345
11. Kinematic Generation of Average Envelopes	365
12. Application of Average Envelopes	372
A. Conjugate Surfaces of the Tool and Workpiece	372
B. Average Envelopes in Gearing Theory	394
<i>References</i>	410
<i>Subject Index</i>	419
