

Contents

Preface — VII

Chapter 1

Introduction — 1

- 1.1 Silicon monomers — 3
- 1.2 Reactive silanes, siloxanes, and carbofunctional silanes — 8
 - 1.2.1 Carbofunctional silanes (CFS) — 10
 - 1.2.2 Synthesis of CFPS — 11
- 1.3 Silicon-containing polymers — 13
- References — 14

Chapter 2

Silicones (polysiloxanes) — 20

- 2.1 General properties of silicones — 22
- 2.2 Silicone oils — 24
- 2.3 Silicone elastomers and rubbers — 29
 - 2.3.1 Siloxane elastomer-based healing system — 41
 - 2.3.2 Newer applications of silicone elastomers and rubbers — 43
 - 2.3.3 Biomedical applications of silicone elastomers and rubbers — 45
- 2.4 Silicone resins — 46
 - 2.4.1 Miscellaneous and composite silicone resins — 61
- 2.5 Poly(silsesquioxanes) — 63
 - 2.5.1 Applications of POSS-modified thermoplastic polymers — 83
- 2.6 Copolymers containing siloxane linkages — 109
 - 2.6.1 Poly(siloxysilanes) — 110
 - 2.6.2 Copolymers containing polysiloxane, silsesquioxane, and carbosiloxane segments — 111
- 2.7 Antiadhesive, hydrophobic, and superhydrophobic properties of silicones — 132
- 2.8 Physiological properties of organosilicon compounds and silicones — 137
- 2.9 Biomedical and cosmetic applications of silicones and modified silica — 139
- 2.10 Applications of silane-modified thermoplastics in medicine — 143
- References — 146

Chapter 3

Modification of organic polymers with silanes, silicones, silica, and silicates — 183

- 3.1 Modification of polymer properties by application of CFS — 183
 - 3.1.1 Modification of polyolefin properties with silanes — 185
- 3.2 Applications of carbofunctional polysiloxanes (CFPS) — 189
 - 3.2.1 Copolymers containing acrylate units and reactive silyl groups or siloxane segments — 189
 - 3.2.2 Modification of thermoplastic polymers with silicones, CFS, and CFPS — 192
 - 3.2.3 Modifications of other polymers and polymeric materials by CFS and CFPS — 196
- 3.3 Composites and nanocomposites of thermoplastic polymers — 197
 - 3.3.1 Modification of fillers properties by CFS — 197
 - 3.3.2 Applications of silane-modified nanofillers in thermoplastic composites — 200
 - 3.3.3 Modification of thermoplastic polymers with POSS reagents and fillers — 203
 - 3.3.4 Composites based on epoxy resins modified with silanes, silicones, POSS, silica, and silicates — 206
- References — 211

Chapter 4

Polysilanes — 220

References — 228

Chapter 5

Polycarbosilanes — 236

References — 247

Chapter 6

Polysilazanes — 252

- 6.1 Polysilazanes and polycarbosilazanes — 252
- 6.2 Polysilylcarbodiimides — 261
- 6.3 Conclusions — 264
- References — 266

Chapter 7

Other silicon-containing polymers — 271

- 7.1 Poly(methylhydrosiloxane) copolymers — 271
 - 7.1.1 Methods of syntheses of poly(methylhydrosiloxanes) — 271

- 7.1.2 Chemical modifications of poly(methylhydrosiloxanes) and their copolymers — 276
- 7.1.3 Comprehensive applications of poly(methylhydrosiloxanes) — 287
- 7.2 Other copolymers containing siloxane segments — 289
 - 7.2.1 Copolymers containing only siloxane backbone — 289
 - 7.2.2 Copolymers of polysiloxanes with organic polymers — 294
- References — 320

Chapter 8

Ceramics derived from silicon polymers — 337

- 8.1 Polymer-derived silicon carbide ceramics — 339
- 8.2 Polymer-derived Si-C-O ceramics — 343
- 8.3 Polymer-derived Si_3N_4 , Si-C-N, and Si-C-N-O ceramics — 346
 - 8.3.1 The Si-C-N and Si-C-N-O ceramics derived from PSZ and PUSZ — 358
 - 8.3.2 The carbon-rich Si-C-N ceramics derived from polysilylcarbodiimides — 359
- 8.4 Polymer-derived Si-B-C-O ceramics — 360
- 8.5 Polymer-derived Si-B-C-N ceramics — 362
- References — 365

Chapter 9

Polycrystalline silicon, silicon nanoparticles and nanowires — 376

- 9.1 Polycrystalline silicon and silicon nanoparticles — 376
- 9.2 Silicon nanowires — 382
- References — 391

10 Summary — 401

Acknowledgments — 403

Index — 405
