Foreword	10
For whom the book is intended	11
What you can and can't find here	12
Part One	
The history and technology that header bidding builds on	13
Chapter 0: Programmatic buying	14
RTB	14
Technology	15
Demand partners	17
Conclusion of the chapter: Programmatic buying	17
Chapter 1: History of header bidding	18
Mass expansion of header bidding	20
Financial benefits of header bidding for publishers	21
Header Bidding as an answer to Google	
Dynamic Allocation	23
Conclusion of the chapter: History of header bidding	23
Chapter 2: Waterfall	24
History and reason for the creation of the waterfall	24
Functioning of the waterfall	26
Advantages and disadvantages of waterfall	27
Waterfall integration options	28
Passback	29
Header bidding versus waterfall	32
The future of the waterfall	32
Conclusion of the chapter: Waterfall	33
Chapter 3: Types of auctions by first vs second price	34
Floor price	34
Second price auction	35
First price auction	36
The difference between First price and Second price auctions	38
Problems of the second price model	38
Problems of the first price model	39
Hard and soft floor price	40
Bid shading	41

Floor price setting strategy	43
Conclusion of the chapter:	
Types of auctions by first vs second price	43
Part Two	
Header bidding solutions	45
Chapter 4: Header bidding	46
Principle	46
Client-side vs Server-side header bidding	48
Client-side header bidding (C2S)	48
Server-side header bidding (S2S)	51
Difference between C2S and S2S – advantages and disadvantages	53
The rise of S2S	55
Hybrid header bidding	57
Google's solution	57
Open Bidding	57
Advantages and disadvantages of Open Bidding	58
Dynamic Allocation	59
Amazon's solution	59
Unified Ad Marketplace (UAM)	60
Transparent Ad Marketplace (TAM)	60
The difference between UAM a TAM	61
Video header bidding	61
Types of video ads	62
How the auction works	63
Solution for AMP sites and Real-time configuration (RTC)	65
In-app bidding	65
Setting the auction type by price	69
Floor price settings	71
Floor price at the level of the demand partner	71
Floor price at header bidding level	72
Floor price at ad server level	72
Rule Priorities	72
Post-bid	73
The post-bid principle	73

Advantages and disadvantages of post-bid	74
Comparison of post-bid and header bidding	75
Footer bidding	76
Benefits of header bidding for publishers	78
Benefits of header bidding for advertisers	80
What else the advertiser should know	80
Chapter conclusion: Header bidding	81
Chapter 5: Wrapper	82
Types of wrappers	82
Most used wrappers	83
Main functions of the wrapper	85
Common timeout	86
Asynchronous functionality	86
Connection to the ad server	86
Easy management of demand partners	86
Transparency and independent monitoring	87
Price adjustment of bids	87
Connection of other functions	87
Floor price definition	87
Special rules for displaying ads	88
The main disadvantages of wrappers	88
Installation and setup	88
Upgrades	88
Barriers between technologies	89
Response time control	89
Involvement of demand partners	90
Conclusion of the chapter: Wrapper	95
Chapter 6: Statistics related to header bidding	96
Bids data	97
Bid request	97
Bid response	97
Timeout rate	98
Bid rate	99
Impression	99
Win rate	100

Fill rate	100
Revenue	100
eCPM	100
Visible impressions	101
Viewability rate	101
Clicks	101
Discrepancy report	102
Bid Latency	102
Evaluating statistics	104
Conclusion of the chapter: statistics related to header bidding	105
Chapter 7: Ad server	106
Sales strategy	106
Ad server	107
eCPM	107
First look options	107
How the ad server works	108
Ad server settings related to header bidding	109
Setting price levels	109
Setting other parameters in the ad server	110
Setting up multiple header bidding solutions	111
How to connect an ad server to header bidding	112
Ad server takes priority	112
Header bidding takes priority	112
Hybrid engagement	112
The problem of set priorities	112
Ad server as an auction participant	114
Why it is good to have a direct sales and ad server	116
Conclusion of the chapter: Ad server	117
Part Three	
Areas with a strong relationship to header bidding	
Chapter 8: Cookies and other user ID solutions	120
What are Cookies?	122
How cookies are classified	123
Why third-party cookies will disappear	123
Impact of cookies on publishers' revenues	124

Cookie Matching (Cookie Syncing)	125
Alternative solution to Cookies – User ID	127
Deterministic and probabilistic matching	128
SharedID (PubCommonID)	128
Unified ID 2.0 from The TradeDesk (UID 2.0)	129
Universal ID from ID5	129
Interoperability	129
Effect of Cookie and user ID on header bidding	130
Google Privacy Sandbox	131
Relationship of user identity to header bidding	132
Chapter conclusion: Cookies and other solutions for user ID	133
Chapter 9: Protecting user rights	134
General Data Protection Regulation (GDPR)	136
Content of the GDPR	136
What preceded the GDPR	137
Opt-in versus Opt-out	137
Relationship of GDPR to header bidding	139
Transparency and Consent Framework (TCF)	140
Consent Management Platform (CMP)	142
Checking the settings	144
CMP and the world beyond header bidding	146
Chapter conclusion: Protecting user rights	147
Chapter 10: Supply Path Optimization and Demand Path Optimization	148
The principle of SPO	149
The SPO procedures	153
Food chain	154
Transparency projects	155
Ads.txt	155
Sellers.json and supply chain	159
Ads.cert	161
Tools for supply chain control	161
The Demand Path Optimization (DPO)	161
Conclusion of the chapter: Supply Path Optimization and Demand Path Optimization	163

Chapter 11: Page load speed 164

Latency 164

Studies on speed 165

How to increase the speed of ads 167

How to increase the speed of the whole page 169

Tools for analyzing ad loading speed 170

Google SpeedPage Insight 170

ChromeDevTools 170

Headerbid Expert 172

Conclusion of the chapter: Page load speed 173

Chapter 12: Viewability 174

Viewability is important 174

Above-the-fold and Below-the-fold 176

How to increase ad visibility 177

Lazy load 178

Advantages of lazy load 179

Possible complications of lazy load 179

General uses of lazy load 180

Sticky ads 181

Refreshing ads 181

Bid caching 182

Combination of functions in header bidding 183

Conclusion of the chapter: Visibility 183

Conclusion 184

Used terms 186
