INTRODUCTION

An Introduction to Exercise and Sport Physiology **xx**

Focus of Exercise and Sport Physiology	3
Acute and Chronic Responses to Exercise	3
The Evolution of Exercise Physiology	4
Exercise Physiology in the 21st Century	14
Research: Turning Curiosity Into Science	16

PART I Exercising Muscle

CHAPTER 1

Structure and Function of Exercising Muscle **26**

Anatomy of Skeletal Muscle	29
Muscle Fiber Contraction	35
Muscle Fiber Types	39
Skeletal Muscle and Exercise	43

CHAPTER 2

Fuel for Exercise: Bioenergetics and Muscle Metabolism **50**

Energy Substrates	52
Controlling the Rate of Energy Production	54
Storing Energy: High-Energy Phosphates	56
The Basic Energy Systems	57
Interaction of the Energy Systems	69
The Crossover Concept	69
The Oxidative Capacity of Muscle	70

CHAPTER 3

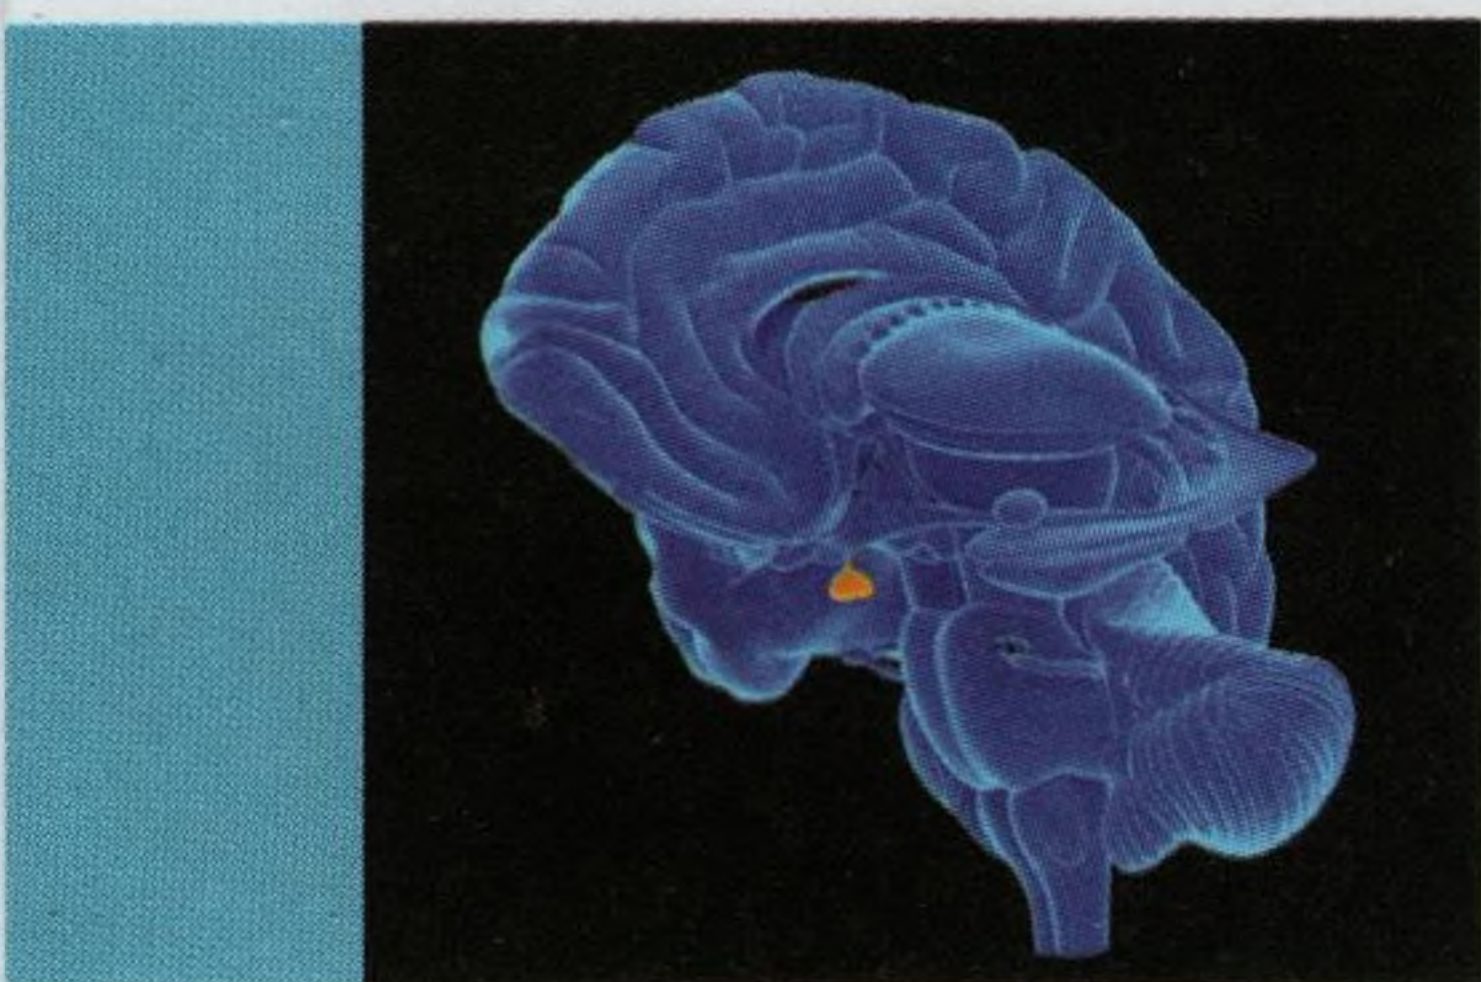

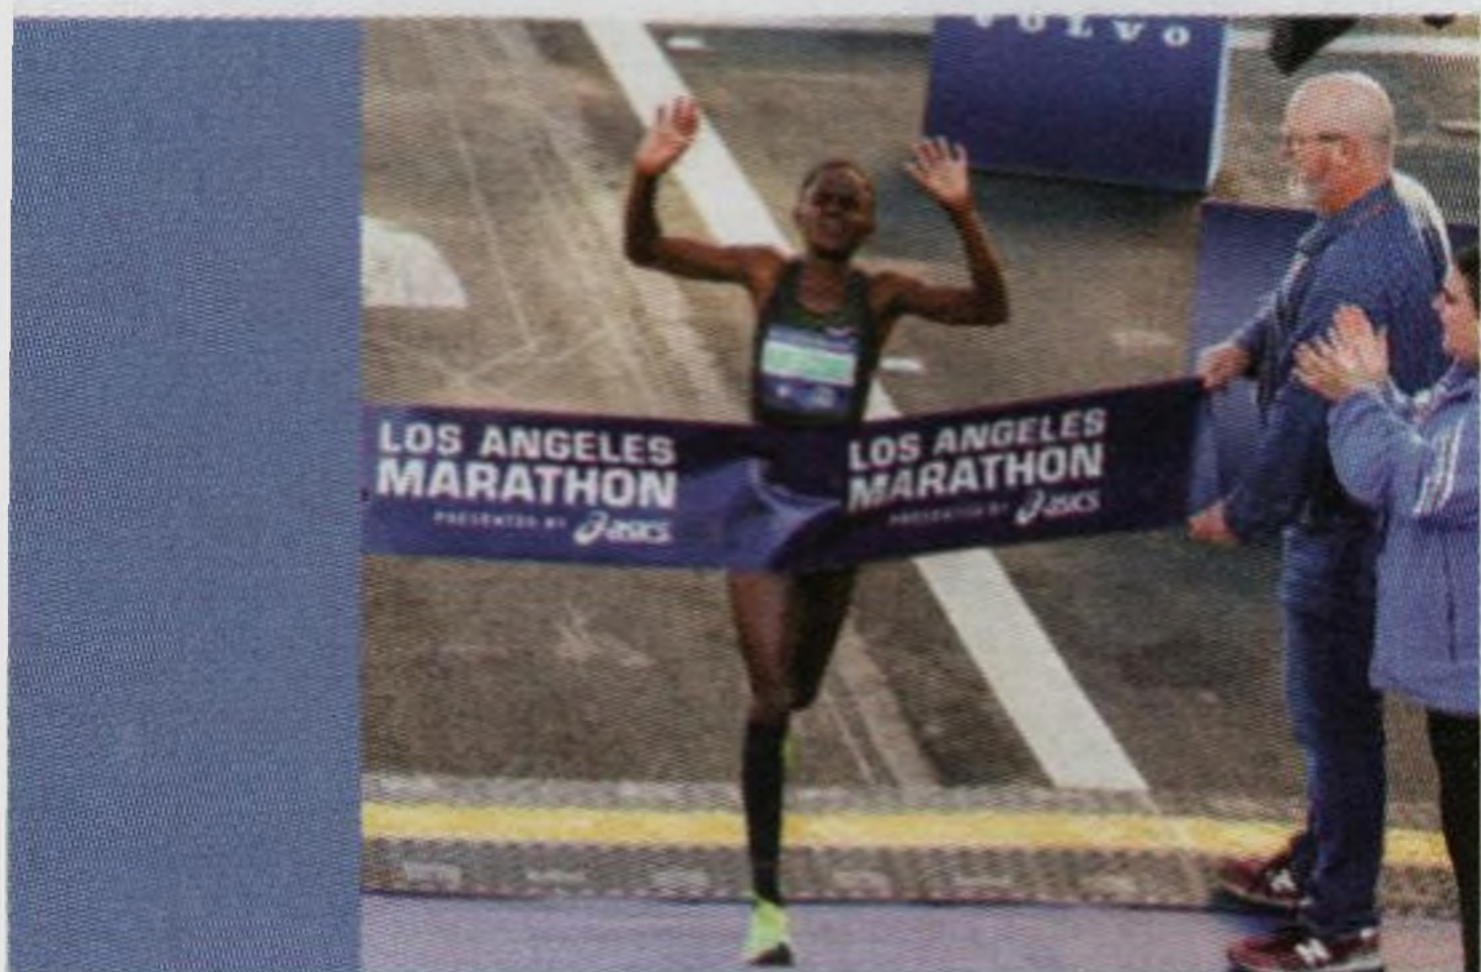

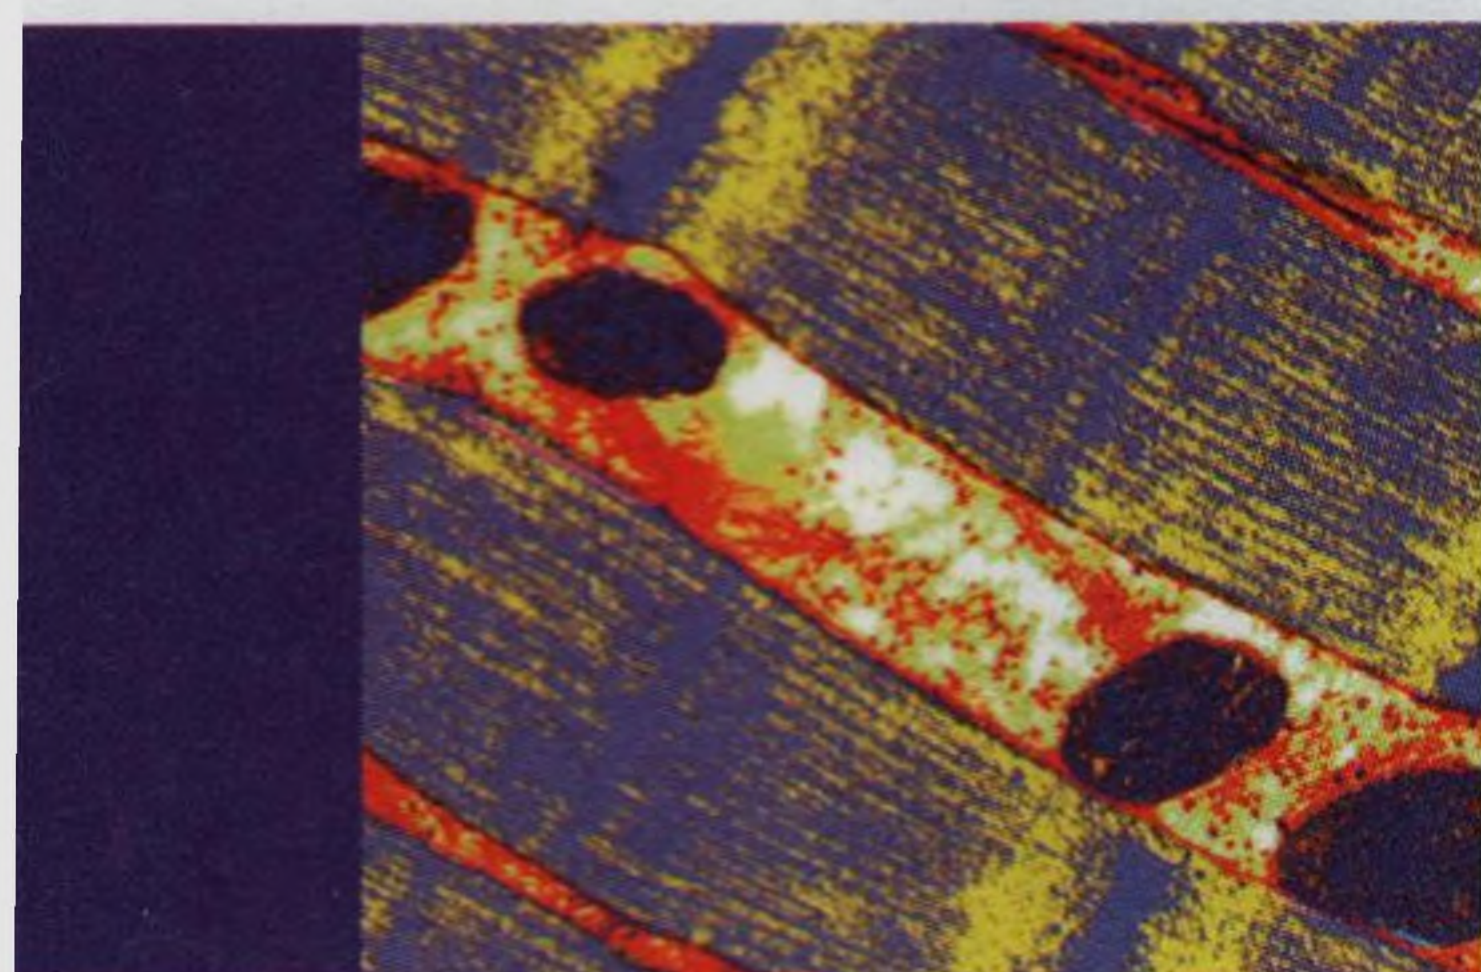

Neural Control of Exercising Muscle **74**

Structure and Function of the Nervous System	76
Central Nervous System	84
Peripheral Nervous System	87
Sensory-Motor Integration	89

CHAPTER 4

Hormonal Control During Exercise **96**

The Endocrine System	98
Endocrine Glands and Their Hormones: An Overview	102
Hormonal Regulation of Metabolism During Exercise	105
Hormonal Regulation of Fluid and Electrolytes During Exercise	112
Hormonal Regulation of Caloric Intake	118

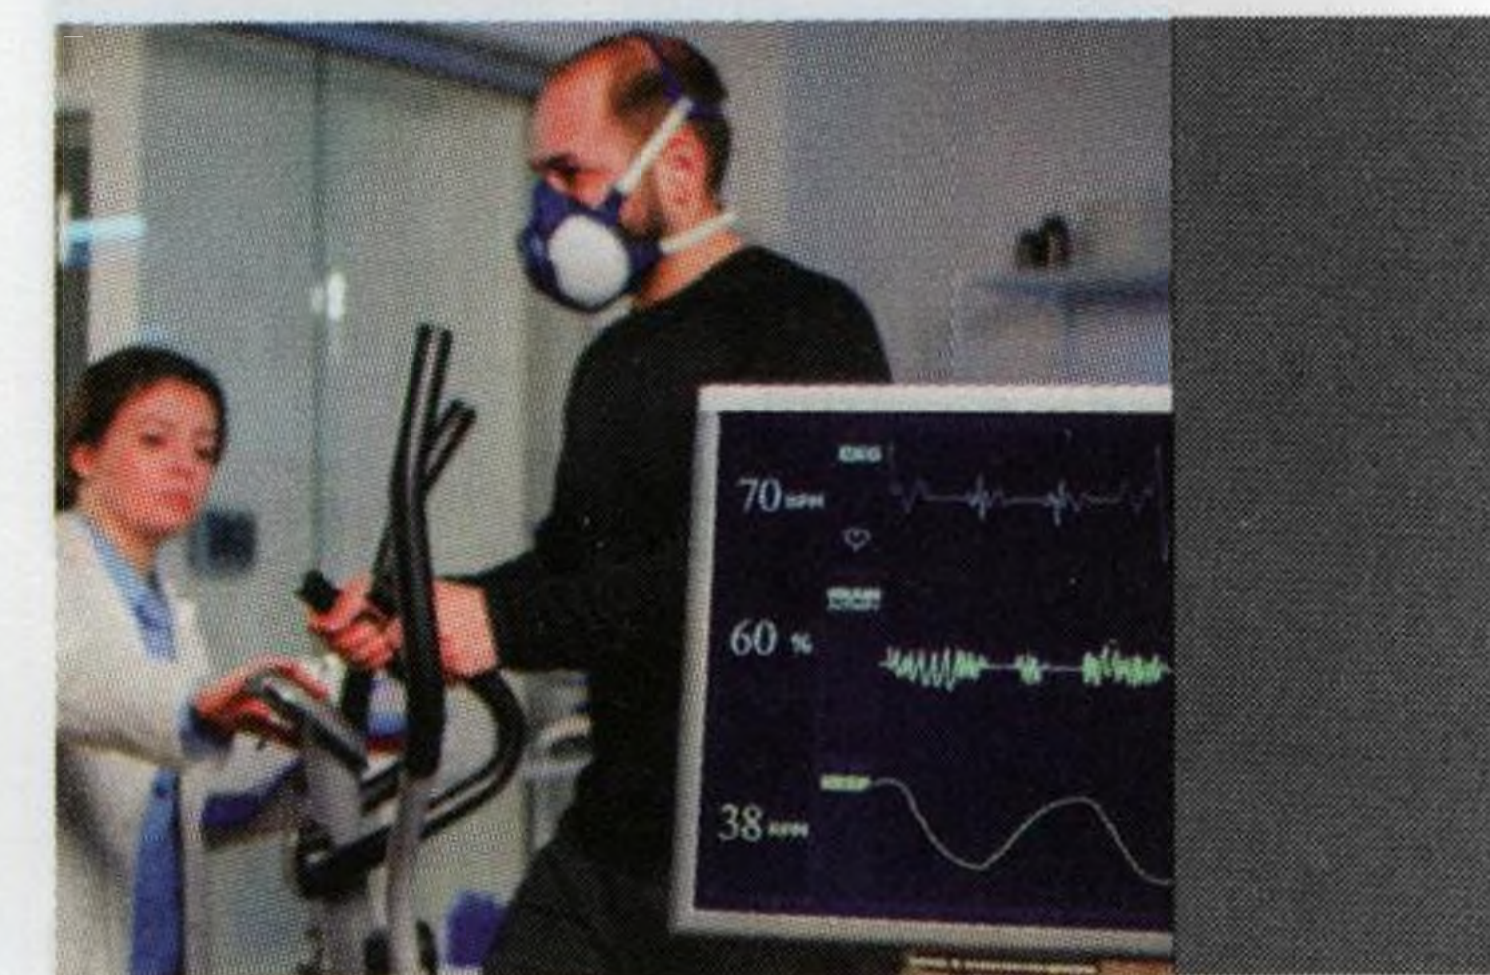

PART II Muscle Energy

CHAPTER 5

Energy Expenditure 122

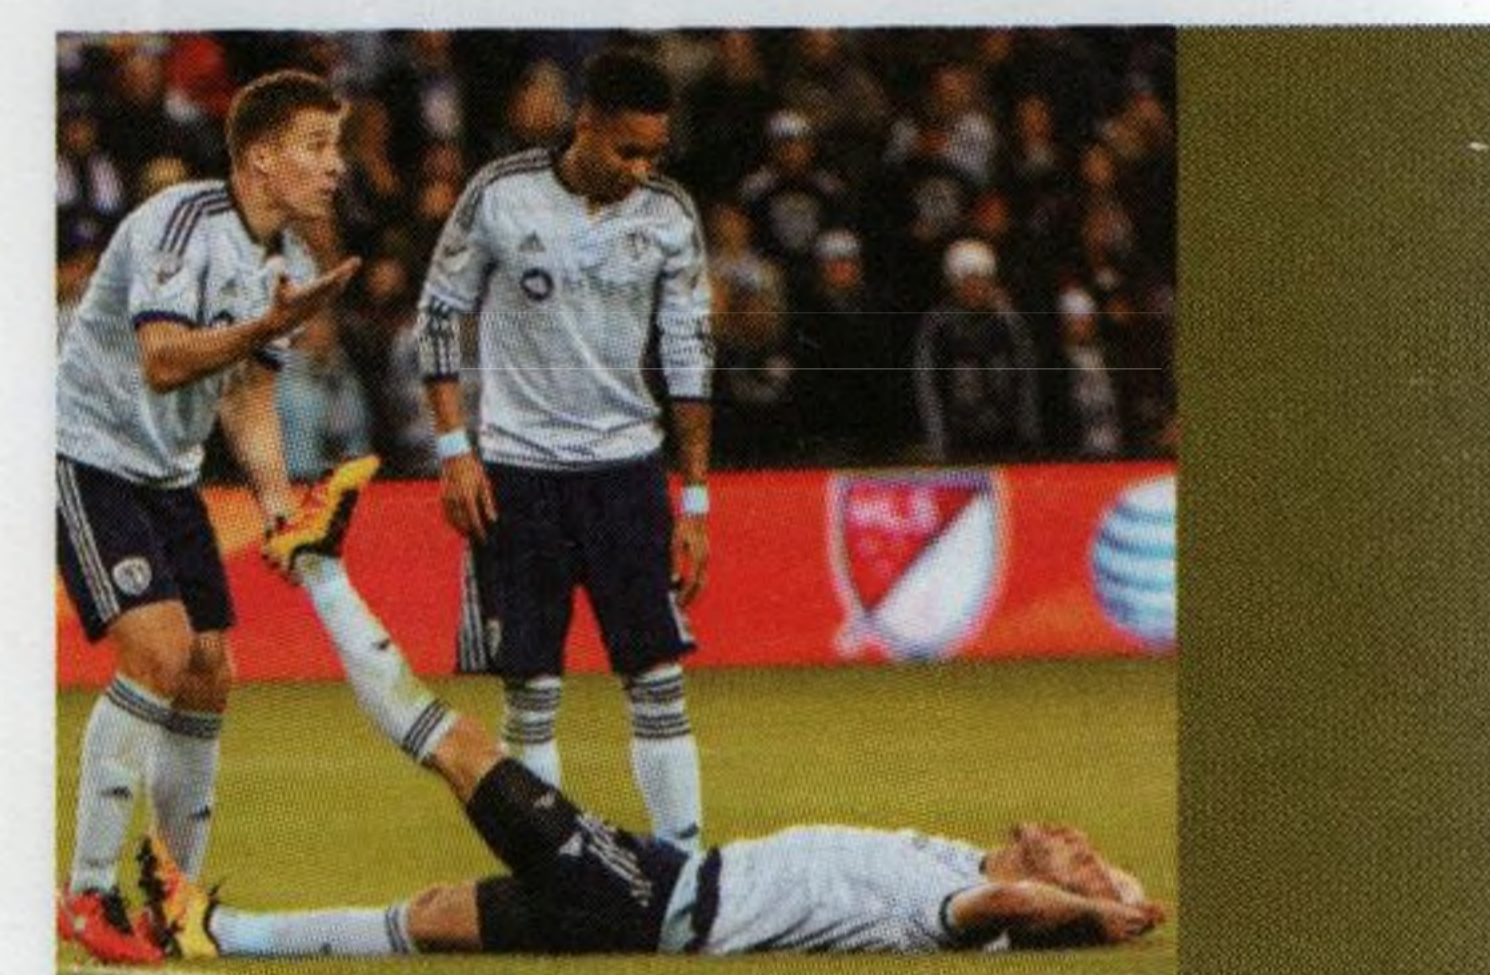

- Measuring Energy Expenditure 124
- Estimating Energy Expenditure 130
- Predicting Energy Expenditure 132
- Energy Expenditure at Rest and During Exercise 135

CHAPTER 6

Fatigue, Muscle Soreness, and Muscle Cramps 144

- Fatigue and Its Causes 146
- Critical Power: The Link Between Energy Expenditure and Fatigue 155
- Muscle Soreness 156
- Exercise-Induced Muscle Cramps 161

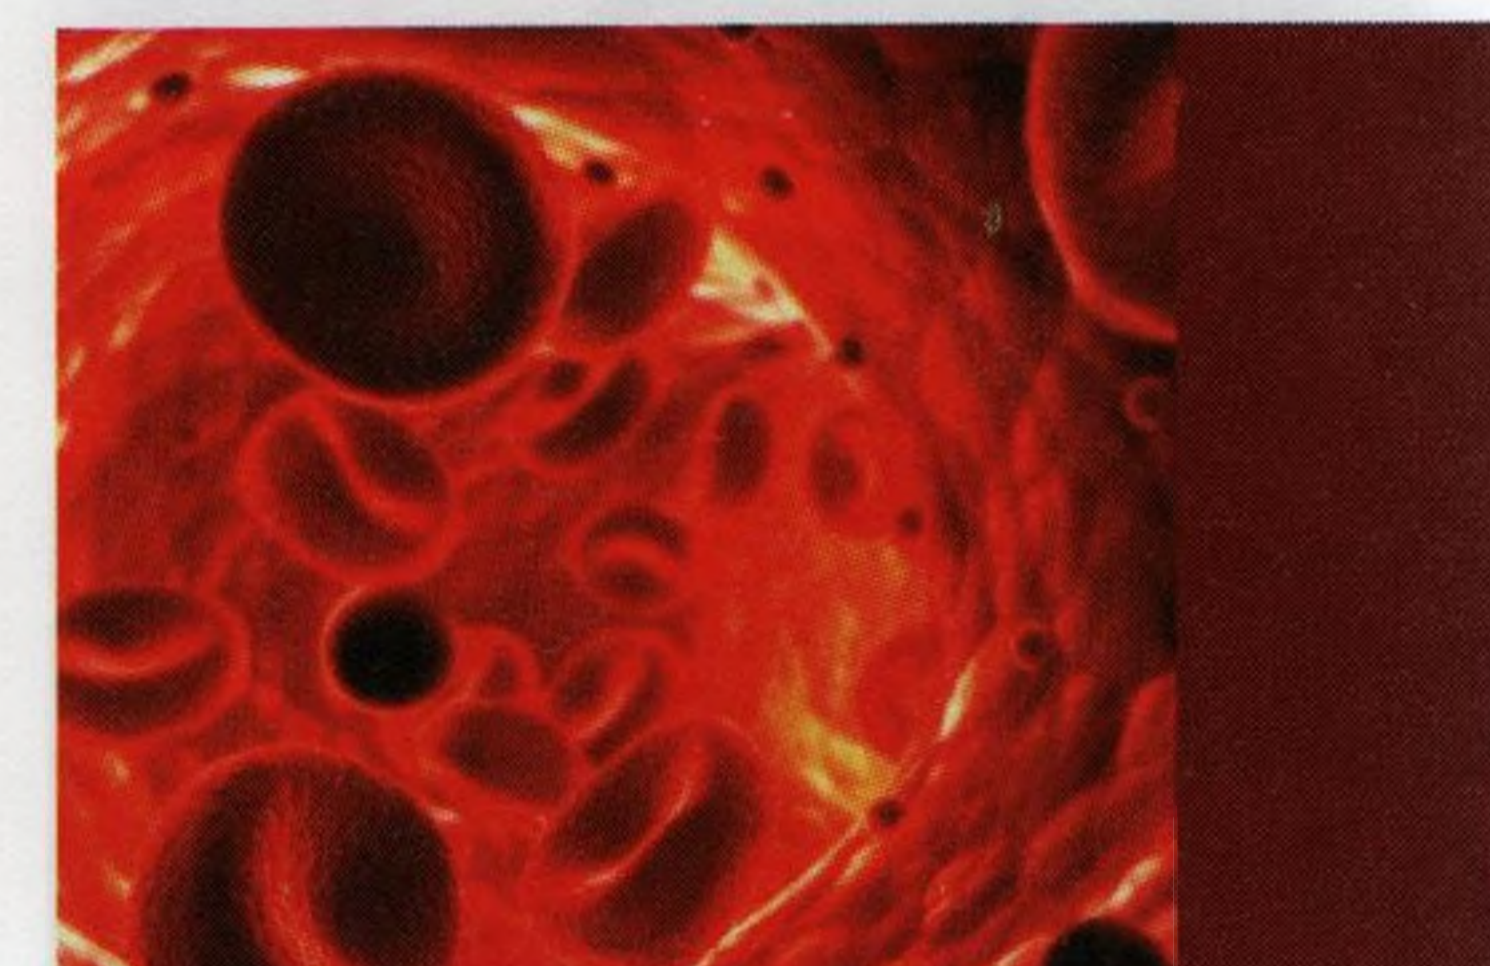

PART III Cardiovascular and Respiratory Function

CHAPTER 7

The Cardiovascular System and Its Control 166

- The Heart 168
- Vascular System 180
- Blood 186

CHAPTER 8

The Respiratory System and Its Regulation 190

- Pulmonary Ventilation 192
- Pulmonary Volumes 194
- Pulmonary Diffusion 196
- Transport of Oxygen and Carbon Dioxide in the Blood 202
- Gas Exchange at the Muscles 204
- Regulation of Pulmonary Ventilation 206
- Afferent Feedback From Exercising Limbs 207
- Exercise Training and Respiratory Function 209

CHAPTER 9

Cardiorespiratory Responses to Acute Exercise 214

- Cardiovascular Responses to Acute Exercise 216
- Respiratory Responses to Acute Exercise 230
- Recovery From Acute Exercise 238

PART IV Exercise Training

CHAPTER 10

Principles of Exercise Training 242

Terminology	244
General Principles of Training	246
Resistance Training Programs	248
Anaerobic and Aerobic Power Training Programs	253

CHAPTER 11

Adaptations to Resistance Training 262

Resistance Training and Gains in Muscular Fitness	264
Mechanisms of Gains in Muscle Strength	264
Interaction Between Resistance Training and Diet	274
Resistance Training for Special Populations	276

CHAPTER 12

Adaptations to Aerobic and Anaerobic Training 282

Adaptations to Aerobic Training	284
Adaptations to Anaerobic Training	310
Adaptations to High-Intensity Interval Training	312
Specificity of Training and Cross-Training	313

CHAPTER 13

Prescription of Exercise for Health and Fitness 316

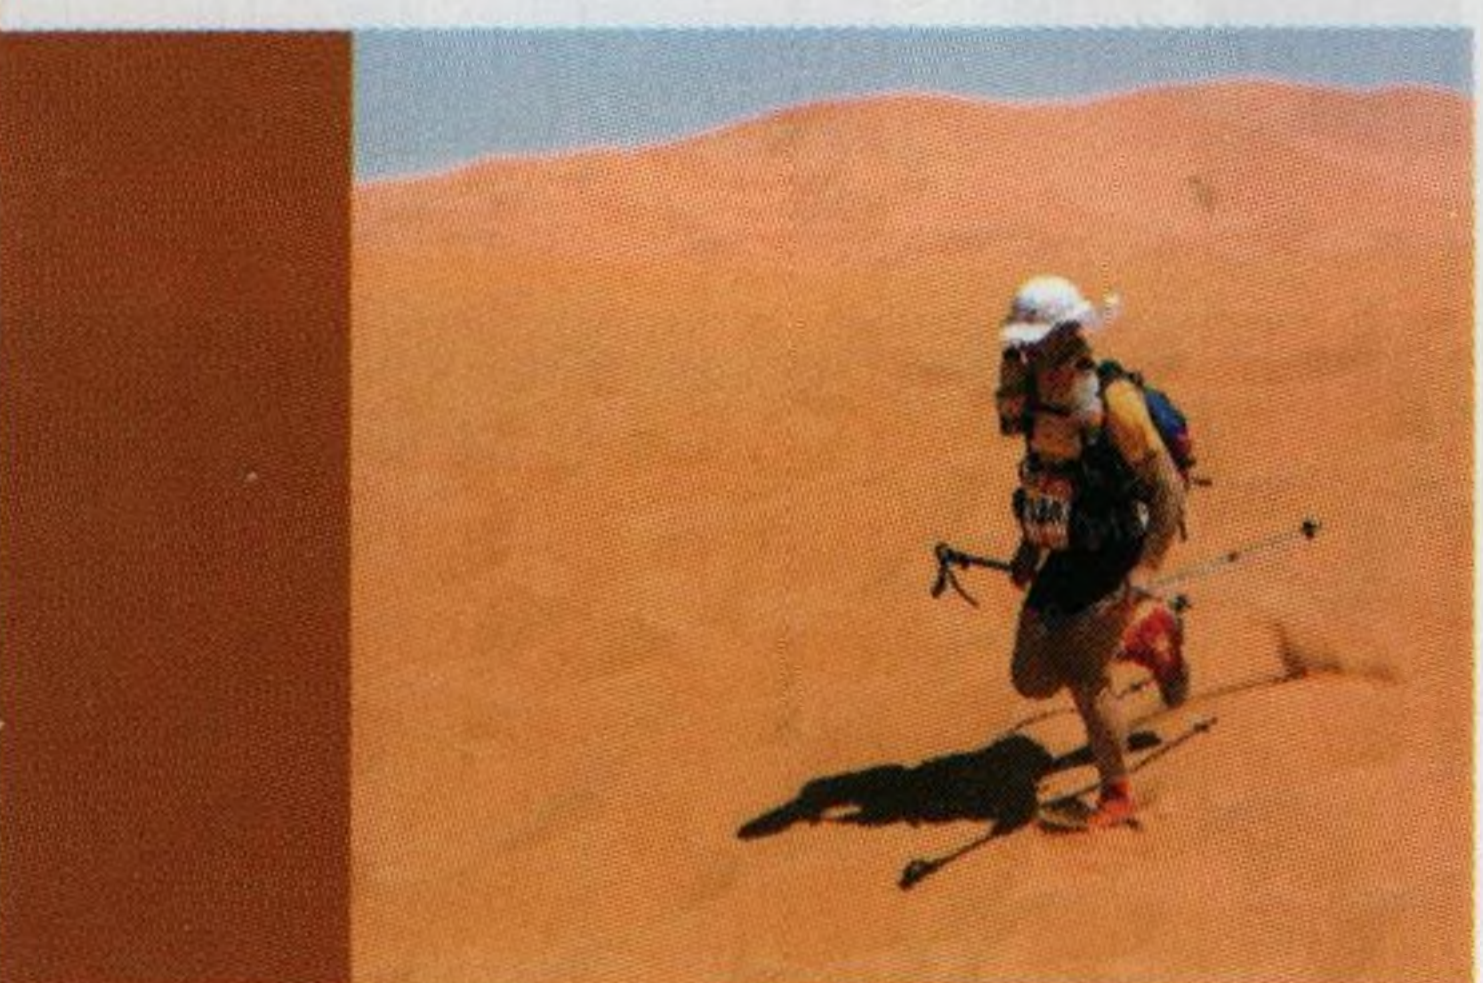

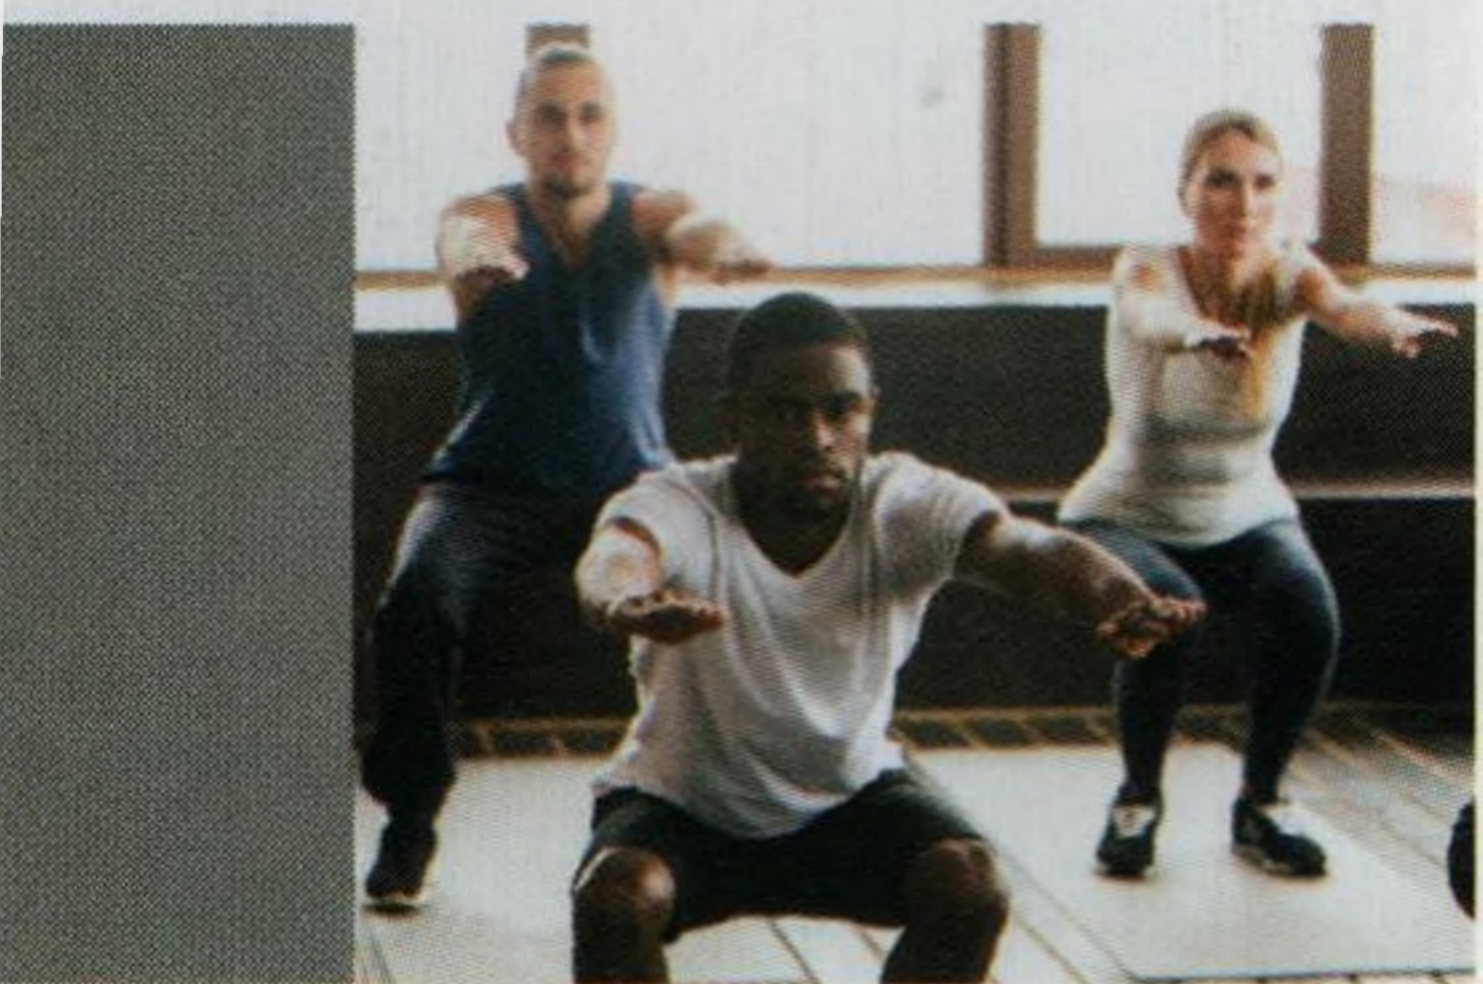

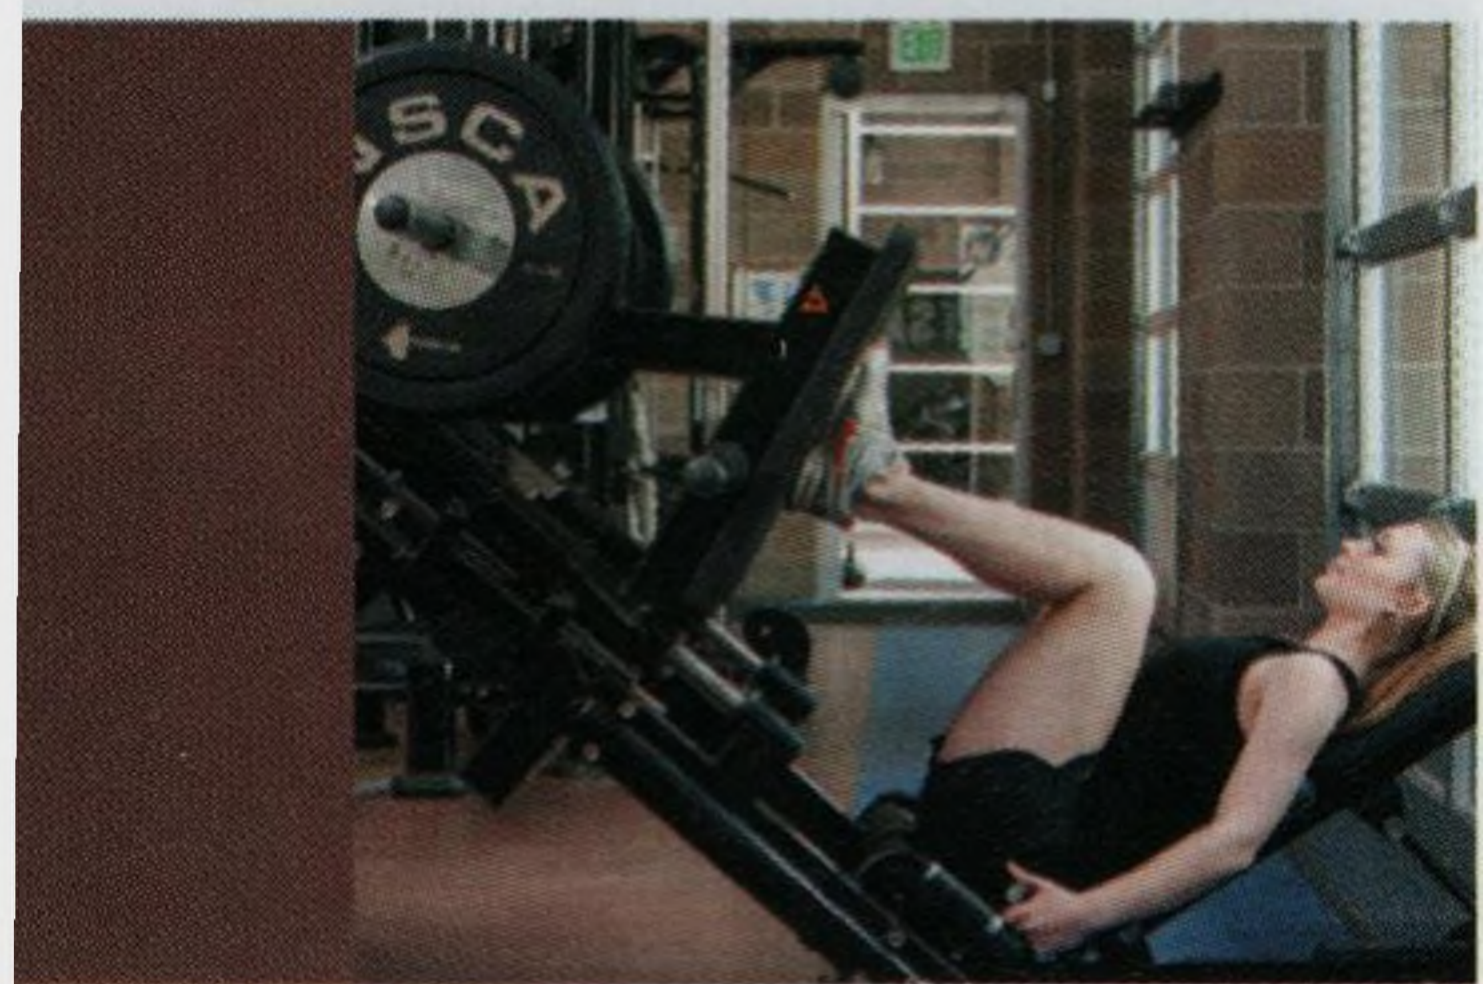

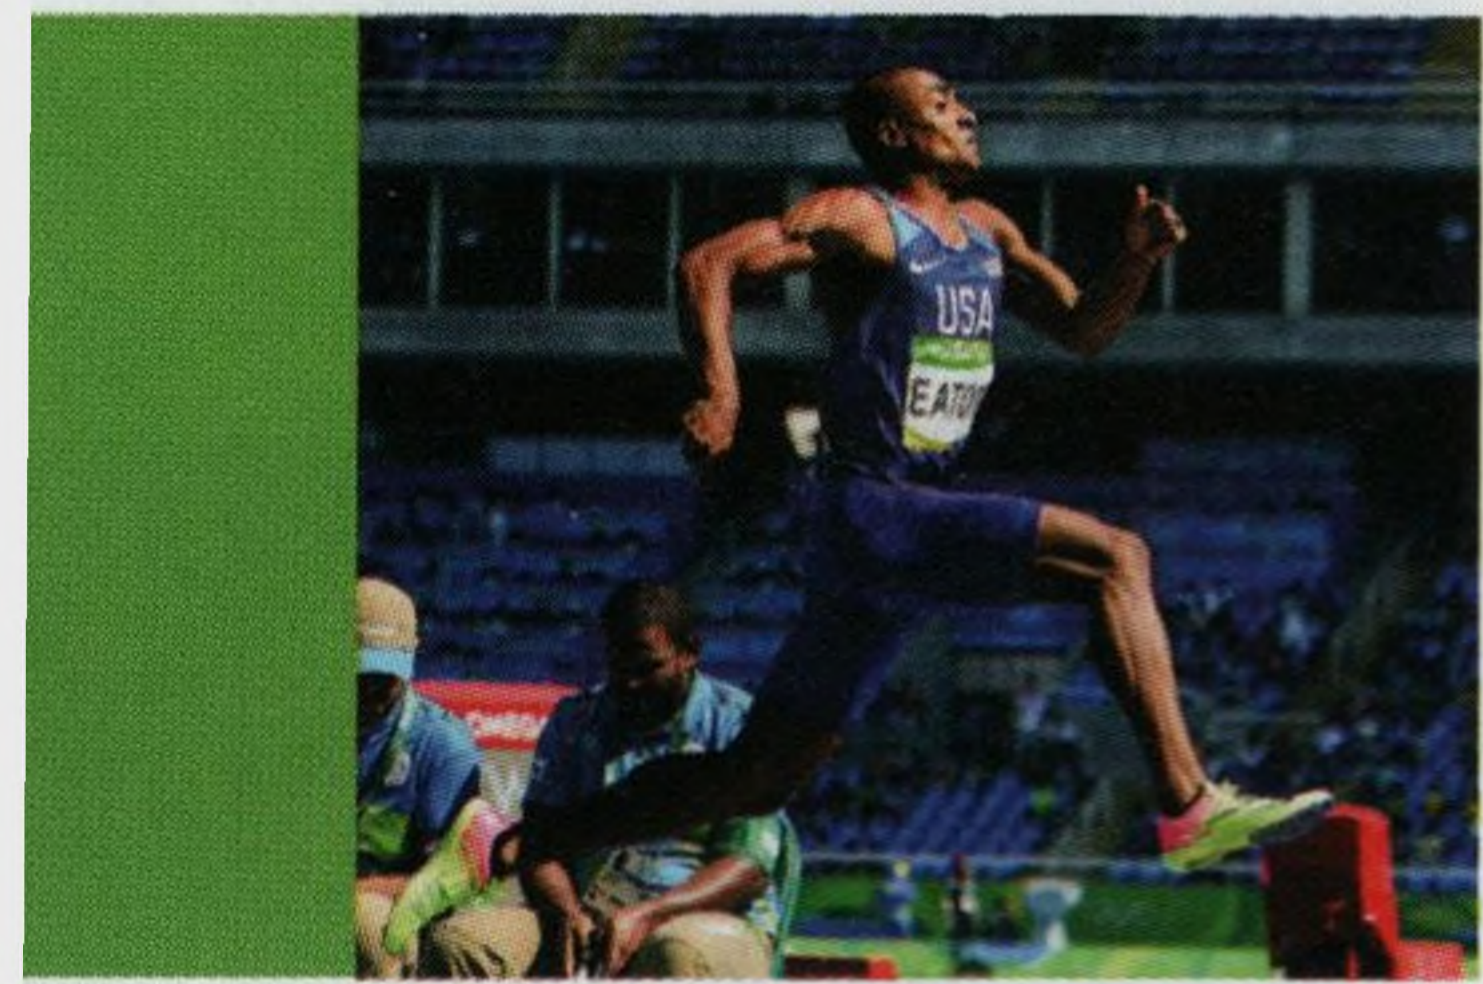

Health Benefits of Regular Physical Activity and Exercise	318
Exercise and Cognitive Function	318
Physical Activity Recommendations	320
Health Screening	322
Exercise Prescription	326
Monitoring Exercise Intensity	330
Exercise Programming	335
Exercise and Rehabilitation of People with Diseases	337

PART V Environmental Influences on Performance

CHAPTER 14

Exercise in Hot and Cold Environments 340

Body Temperature Regulation	342
Physiological Responses to Exercise in the Heat	347
Health Risks During Exercise in the Heat	353
Acclimation to Exercise in the Heat	357
Exercise in the Cold	361
Physiological Responses to Exercise in the Cold	364
Health Risks During Exercise in the Cold	366

CHAPTER 15

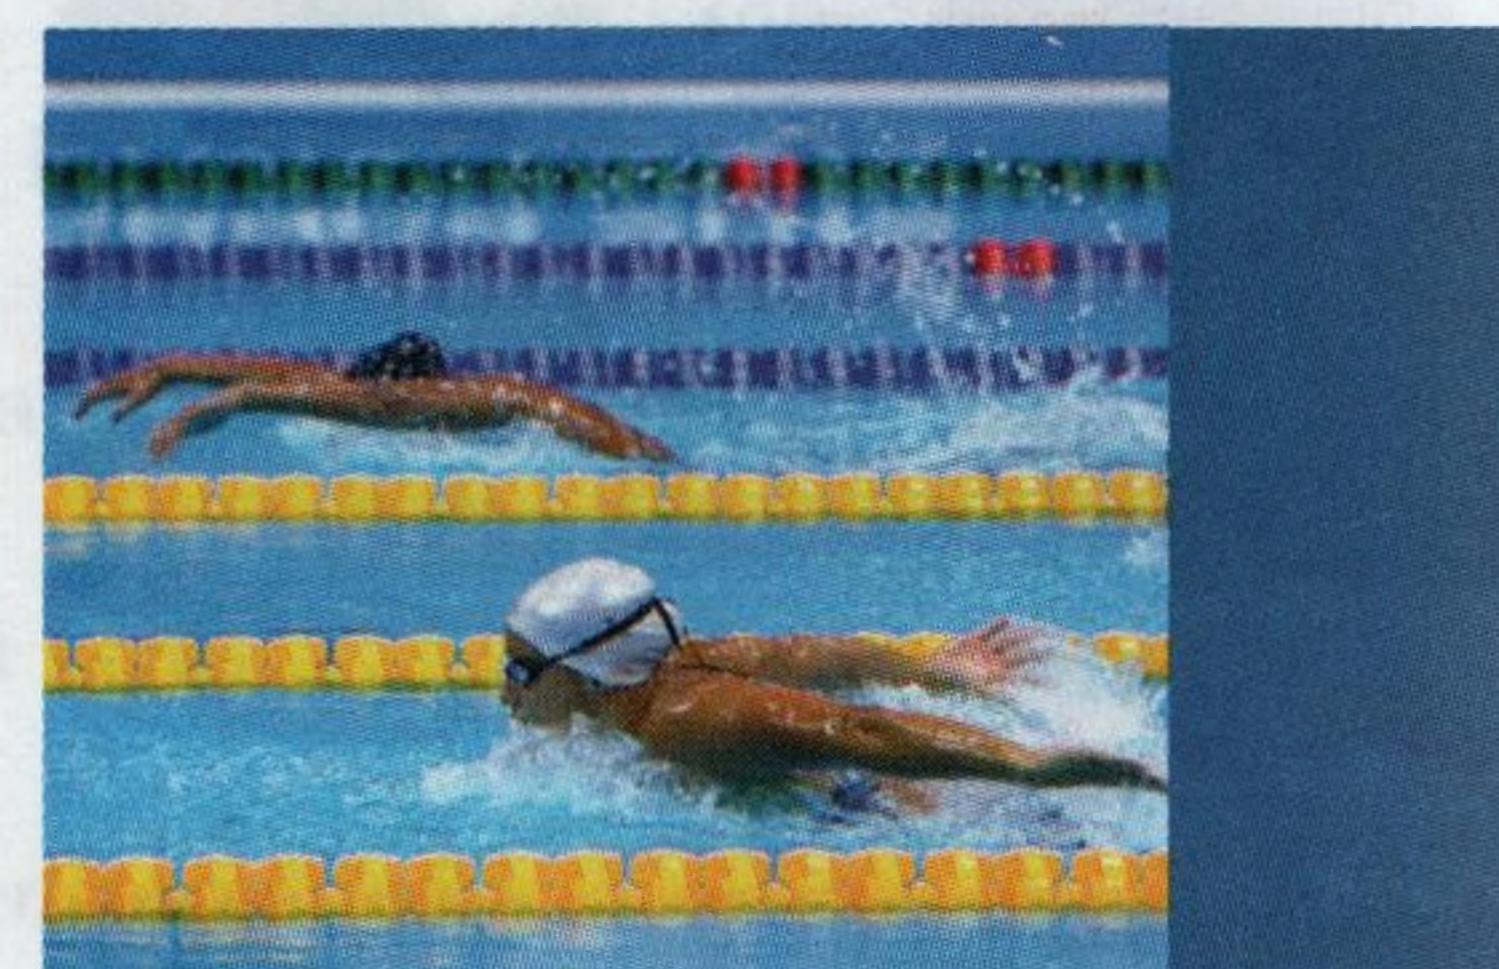

Altitude, Hyperbaric Environments, and Microgravity	370
Environmental Conditions at Altitude	372
Physiological Responses to Acute Altitude Exposure	375
Exercise and Sport Performance at Altitude	380
Acclimation: Chronic Exposure to Altitude	382
Altitude: Optimizing Training and Performance	385
Health Risks of Acute Exposure to Altitude	389
Hyperbaric Environments	392
Microgravity	398

PART VI Optimizing Performance in Sport

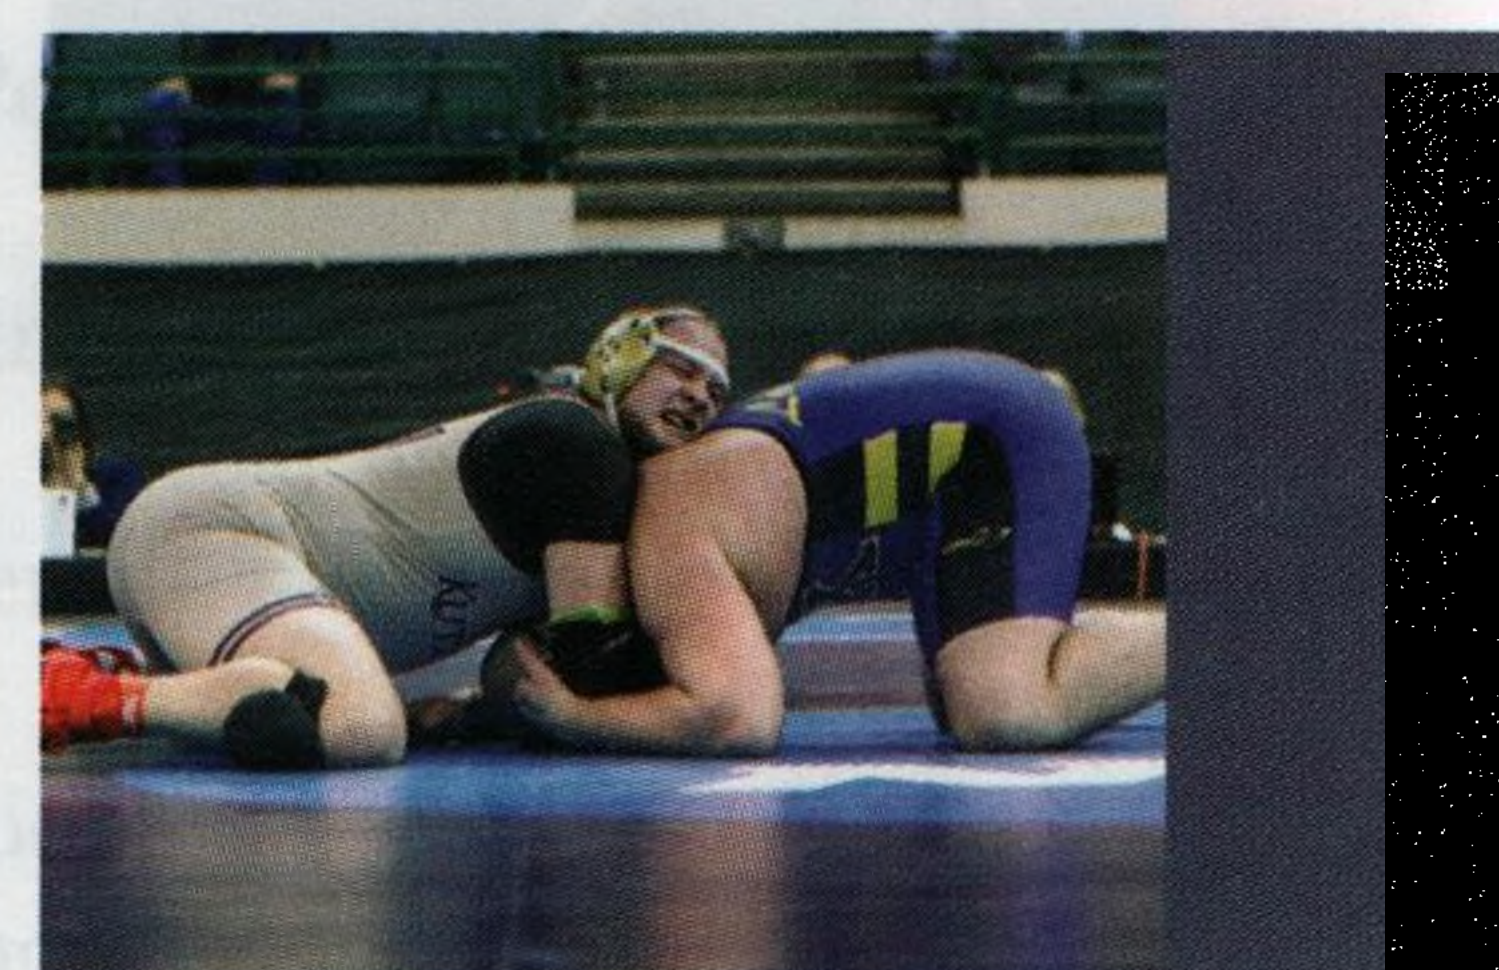

CHAPTER 16

Training for Sport	406
Optimizing Training	408
Periodization of Training	412
Overtraining	413
Tapering for Peak Performance	421
Detraining	422

CHAPTER 17

Nutrition, Body Composition, and Obesity	430
Classification of Nutrients	432
Water and Electrolyte Balance	444
Nutrition and Athletic Performance	450
Assessing Body Composition	455
Body Composition, Weight, and Sport Performance	459
Obesity	463
Weight Loss Management Guidelines	471
Role of Physical Activity in Weight Management and Risk Reduction	473

CHAPTER 18

Ergogenic Aids in Sport	480
Researching Ergogenic Aids	483
Ergogenic Aids with Established Evidence of Efficacy	486
Ergogenic Aids with Emerging Evidence of Efficacy	493
Prohibited Substances and Techniques	496

PART VII Special Considerations in Sport, Exercise, and Physical Activity

CHAPTER 19

Children and Adolescents in Sport and Exercise 512

Growth, Development, and Maturation	514
Physiological Responses to Acute Exercise	517
Physiological Adaptations to Exercise Training	523
Physical Activity Patterns Among Youth	525
Sport Performance and Specialization	530
Special Issues	531

CHAPTER 20

Aging in Sport and Exercise 534

Height, Weight, and Body Composition	537
Physiological Responses to Acute Exercise	539
Physiological Adaptations to Exercise Training	550
Sport Performance	552
Special Issues	556

CHAPTER 21

Sex Differences in Sport and Exercise 560

Sex Versus Gender in Exercise Physiology	562
Body Size and Composition	563
Physiological Responses to Acute Exercise	564
Physiological Adaptations to Exercise Training	568
Sport Performance	569
Special Issues	571

CHAPTER 22

Cardiovascular Disease and Physical Activity 582

Prevalence of Cardiovascular Disease	584
Forms of Cardiovascular Disease	585
Understanding the Disease Process	590
Cardiovascular Disease Risk	592
Reducing Risk Through Physical Activity	596
Risk of Heart Attack and Death During Exercise	599
Exercise Training and Rehabilitation of Patients with Heart Disease	600

Glossary	605	•	References	619	•
Index	637	•	About the Authors	650
