PREFACE	3
Reproduction and seed development in crops in relation to plant breeding methods	6
Pollination	7
Methods of selection	9
Crossing techniques	19
Hybridization	25
Wide hybridization.....	29
Mutation breeding	33
EMS mutagenesis of seeds of the genus <i>Brassica</i>	38
Polyploidy	39
Practical seed production.....	42
Seed	42
Seed testing.....	46
Seed sampling	47
Purity testing	50
Seed viability and vigour testing.....	50
Germination testing.....	51
Cold germination test	53
Tetrazolium test (TZ).....	55
Conductivity test.....	58
Seedling growth rate test	59
Priming methods	60
Seed treatment	61
<i>IN VITRO</i> TECHNOLOGIES	65
Somatic embryogenesis.....	65
Endosperm cultivation.....	69
Zygotic embryo culture.....	71
<i>In vitro</i> conservation of germplasm	73
Protoplast cultures	76
Protoplast fusion	77
GLOSSARY	81
