

Content

1	Introduction (<i>K. Kozlíková</i>)	9
1.1	Acknowledgments	10
2	Working in a Laboratory (<i>K. Kozlíková</i>)	11
2.1	Protection and Safety at Work	11
2.2	The Laboratory Notebook	12
2.2.1	Arrangement of an Experiment in the Notebook	12
2.2.2	Outline for Measurement Experiments	14
3	Evaluation of Measurements (<i>K. Kozlíková</i>)	15
3.1	Probability and Theoretical Distributions	15
3.1.1	Introduction	15
3.1.2	The Gaussian (Normal) Distribution	17
3.1.2	The Student's <i>t</i> Distribution	20
3.2	Numerical Evaluation	22
3.2.1	Uncertainties or Errors of Measurement	22
3.2.2	Error Estimates	23
3.2.3	Error Propagation	24
3.2.4	Significant Figures	26
3.3	Statistical Evaluation	27
3.3.1	Introduction	27
3.3.2	Measures of Location	27
3.3.3	Measures of Variability	28
3.3.4	Confidence Intervals	30
3.3.4.1	Confidence Interval for a Mean	30
3.3.4.2	Confidence Interval for Paired Observations	31
3.3.4.3	Confidence Interval for Comparing Two Means (Unpaired Observations)	32
3.3.5	Hypothesis Testing	32
3.3.5.1	Hypothesis Test for a Mean	33
3.3.5.2	Hypothesis Test for Paired Observations	34
3.3.5.3	Hypothesis Test for Comparing Two Means (Unpaired Observations)	34
3.3.6	Regression and Correlation	36
3.3.6.1	Simple Linear Regression	37
3.3.6.2	Correlation Coefficient	37
3.4	Graphical Evaluation	38
3.4.1	Tables	38
3.4.2	Graphs	39
4	Evaluation of Physical Factors of the Working Place (<i>K. Kozlíková</i>)	45
4.1	Measurement of Chosen Microclimatic Factors.	45
4.1.1	Temperature	45

4.1.2	Barometric Pressure	48
4.1.3	Air Humidity	49
4.2	Measurement of Illuminance	54
4.3	Measurement of Background Radiation - Dosimetry	56
5	Evaluation of Physical Factors of Liquids	58
5.1	Measurement of Surface Tension – Stalagmometric method (<i>K. Kozlíková</i>)	58
5.2	Measurement of Viscosity – Viscometry (<i>K. Kozlíková, J. Martinka</i>)	61
6	Evaluation of Concentration of Solutions Using Optical Methods (<i>K. Kozlíková</i>)	63
6.1	Refractometry	63
6.2	Polarimetry	66
6.3	Spectrophotometry	69
7	Evaluation of Physical Characteristics of the Human Body	73
7.1	Principles of Weighing (<i>K. Kozlíková</i>)	73
7.2	Anthropometry (<i>K. Kozlíková</i>)	77
7.3	Spirometry (<i>K. Kozlíková, J. Martinka</i>)	79
7.4	Examination of Hearing Function (1):	81
7.4.1	Tuning Fork Test (<i>J. Martinka</i>)	81
7.4.2	Audiometry (<i>K. Kozlíková, J. Martinka</i>)	82
7.5	Examination of Visual Acuity (<i>K. Kozlíková, J. Martinka</i>)	86
7.6	Thermometry (<i>K. Kozlíková</i>)	88
7.7	Functional Examination of the Cardiovascular System (1):	90
7.7.1	Indirect Blood Pressure Measurement (<i>K. Kozlíková</i>)	90
7.7.2	Ruffier Test (<i>K. Kozlíková, J. Martinka</i>)	97
7.8	Biophysical Analysis of Biological Signals (<i>K. Kozlíková</i>)	98
7.8.1	Biological Signals in Medical Diagnostics – Information Transmission	98
7.8.1.1	Types of Biological Signals	99
7.8.1.2	Processing of Biological Signals	99
7.8.1.3	Electrodes	103
7.8.2	Electrocardiographic Biosignals	104
7.8.3	Electrical Axis As a Dipole Representation	107
7.9	Application of Electric Current on Biological Tissue (<i>J. Martinka</i>)	109
7.9.1	Electric Current	109
7.9.2	Safety Aspects	110
7.9.3	Electrotherapy	110
7.9.3.1	Application of Direct Current	111
7.9.3.2	Application of Alternating Current	111
7.9.4	Electrical Stimulation	112
7.9.5	Current – Voltage Characteristic of Biological Tissue	112
8	Modelling	114
8.1	Principles of Modelling (<i>K. Kozlíková</i>)	114

8.2	Modelling of Physiological Phenomena: Blood Redistribution Model (<i>K. Kozlíková, J. Martinka</i>)	115
8.3	Modelling of Physical Phenomena: Model of Radioactive Decay (<i>K. Kozlíková</i>)	117
9	Worksheet for Main Tasks (<i>K. Kozlíková, J. Martinka</i>)	119
9.1	Measurement of Chosen Microclimatic Factors.	119
9.2	Measurement of Illuminance	122
9.3	Dosimetry	125
9.4	Weighing	131
9.5	Measurement of Surface Tension	134
9.6	Measurement of Viscosity	138
9.7	Refractometry	141
9.8	Polarimetry	145
9.9	Spectrophotometry	148
9.10	Anthropometry	152
9.11	Spirometry	159
9.12	Tuning Fork Test	166
9.13	Audiometry	168
9.14	Examination of Visual Acuity	171
9.15	Thermometry	174
9.16	Indirect Blood Pressure Measurement	177
9.17	Ruffier Test	183
9.18	Biophysical Analysis of Biosignals	186
9.19	Electrical Axis As a Dipole Representation	190
9.20	Current – Voltage Characteristic of Biological Tissue: Body Resistance	193
9.21	Blood Redistribution Model	197
9.22	Model of Radioactive Decay	201
10	Appendix	205
10.1	Appendix A: List of Used Symbols and Abbreviations (<i>J. Martinka</i>)	205
10.2	Appendix B: Physical Units (<i>J. Martinka</i>)	216
10.3	Appendix C: The Greek Alphabet (<i>J. Martinka</i>)	223
10.4	Appendix D: Fundamental Physical Constants (<i>J. Martinka</i>)	224
10.6	Appendix E: Statistical Tables (<i>K. Kozlíková</i>)	225
10.7	Appendix F: Basic Formulas for Derivatives (<i>K. Kozlíková</i>)	229
10.8	Appendix G: List of Tables (<i>J. Martinka</i>)	230
10.9	Appendix H: List of Figures (<i>J. Martinka</i>)	233
10.10	Appendix H: List of Graphs (<i>J. Martinka</i>)	236
11	References (<i>K. Kozlíková</i>)	237
12	Index (<i>J. Martinka</i>)	241
