

CONTENTS

Balda M.		
Preface.....		7
Plenary lectures		
Carpenter P.W., Berkouk K., Lucey A.D.:		
Theoretical Model of Pressure Propagation in the Human Spinal CSF System.....		11
Dowell E.H., Hall K. C., Thomas J.P., Florea R., Epureanu B. I., Heeg J.:		
Reduced Order Models in Unsteady Aerodynamics.....		20
Gnesin V.I.:		
A Numerical Study of 3D Flutter in Turbomachines Using a Fluid-Structure Coupled Method.....		36
Goyder H.G.D.:		
Water Hammer in Heat Exchangers.....		46
Païdoussis M. P., Lopes J. L., Semler C.:		
Nonlinear Equations and Dynamical Behaviour of a Cantilevered Cylinder in Axial Flow.....		56
Solari G.:		
Progress and Prospects in Gust-Excited Vibrations of Structures.....		65
Weaver D.S.:		
Flow Induced Vibrations in Bellows Expansion Joints.....		77
Ziada S.:		
Feedback Control of Global Flow Oscillations.....		85
Contributed papers		
Amabili M., Pellicano F., Païdoussis M. P.:		
On the Nonlinear Stability of Circular Cylindrical Shells Containing Flowing Fluid.....		99
Amabili M., Lakis A.A., Nuno-Siebrecht N.:		
Hydroelastic Vibrations of a Hermetic Can.....		105
Bardleben M.J., Weaver D.S.:		
Acoustic Pressure Pulsations of a Centrifugal Volute Pump in a Pipeline.....		111
Bistrteanu M. F., Madarame H., Okamoto K., Iida M.:		
Numerical Analysis on Self-Induced Oscillation of a Vertical Plane Jet Impinging on a Free Surface Jet Flutter.....		117
Botez R.M., Bigras P.:		
Optimization of Generalized Aerodynamic Unsteady Forces for the Aeroservoelasticity.....		122
Daněk O.:		
The Aeroelastic Coupling of Steam Turbine Rotor Blades.....		129
Dedouch K., Horáček J., Vampola T., Vohradník M., Švec J.:		
Finite Element Model of Supraglottal Vocal Tract with Consideration of Wall Impedance.....		131

Dessi D., Mastroddi F., Morino L.: Linear vs. Nonlinear Stability Behaviour of an Aeroelastic System in the Neighbourhood of a Hopf Bifurcation.....	135
DiCarlo A., Nardinocchi P., Teresi L.: How to Model Blood Flow in Distensible Vessels.....	141
Dimentberg M. F., Noori M.M.: Nonlinear Torsional Divergence under Randomly Varying Flow Speed.....	146
Dzygadło Z., Kowaleczko G.: Linear and Nonlinear, Regular and Chaotic Flutter and Ground Resonance of a Helicopter.....	150
Dzygadło Z., Nowotarski L., Olejnik A.: Linear and Nonlinear, Regular and Chaotic Vibrations of an Airfoil with a Trailing Edge Flap in Supersonic Flow.....	155
Dzygadło Z., Nowotarski L., Olejnik A.: Linear and Nonlinear, Regular and Chaotic Vibrations of a Plate in Supersonic Flow.....	161
Giordano V., Coiro D.P., Nicolosi F.: Reconnaissance Very Light Aircraft Design. Wind-Tunnel and Numerical Investigation.....	167
Gnesin V.I., Kanilo S.P. Kolodyazhnaya L.V.: 3D Flutter Analysis of Oscillating Transonic Blade Row Using a Coupled Fluid-Structure Problem.....	175
Gorman D.G., Horáček J., Dedouch K.: Vibro-Acoustic Characteristics of a Disc Interacting with Fluid in a Cylindrical Cavity.....	181
Hayashi H., Kodama, Y. Sasaki S., Fukano T.: Wake Vortices and Turbulent Noise from Two Dimensional Bodies in Flow.....	187
Hémon P., Santi F.: Study of Movement-Induced Vibrations of Elongated Structures by Wind Tunnel Tests and Numerical Simulation.....	193
Horáček J.: Dynamic Characteristics of a Hydroelastic Model of a Blood-Vessel.....	199
Hsiao K. M., Chou C. F.: Vibration Analysis of Rotating Euler Beam.....	203
Jakubauskas V.F., Weaver D.S.: Transverse Vibrations of Fluid-Filled Bellows Expansion Joints.....	209
Kaplunov S.M., Makhutov N. A.: Physical Modelling Dynamics and Strength of Aero-Hydro-Elastic System Structures.....	215
Kaplunov S.M., Valles N. G., Solonin V.I.: Analysis of Errors Agreement for the Complex Numerical – Experimental EAHE – Investigations.....	223
Katinas V., Vaitiekunas P.: Study of Hydroelasticity of Prismatic Bodies in Transverse Flow.....	229
Kießling F., Rippl M., Sinapius M.: Flutter Monitoring by Means of the Modal Envelope Function.....	233
Klášteřka H., Pašek R.: Unsteady Aerodynamic Forces Acting on Vibrating Blade Cascade.....	239
Křen J., Zát'ura F., Rosenberg M.: Mathematical Model of the Male Urethra.....	245

Kubenko V., Gavrilenko V.: Interaction of Elastic Bodies and Liquid Surface During Impact Penetration.....	250
La Rocca M., Sciortino G.: A Generalised Variational Approach to the Sloshing: Experimental Validation of the Model.....	256
Linhart J., Hejda Z., Schuster M.: Experimental Determination of Fluid Coupling Forces in a Tube Bundle.....	262
Lucey A.D., Cafolla G.J., Carpenter P.W.: The Effect of a Boundary Layer on the Hydroelastic Stability of a Flexible Wall.....	268
Marichich N.: A Contribution to Flutter Analysis of an Aircraft Containing Certain Types of Structural Nonlinearities.....	274
Mastroddi F., Balis Crema L.: Structural Modifications for the Finite Element Modeling of an Aeroelastic Wind-Tunnel Wing Model.....	280
Matsushita O., Fukushima Y., Miura H., Tagaki M.: Cross Stiffness Control of Electromagnetic Damper for Flow-Induced Rotor Instability.....	286
Meskel C., Fitzpatrick J.A.: A Non-Linear Model for Damping Controlled Fluidelastic Instability.....	292
Musil J., Pražák J.: Nonpulsatile Support to Pulsatile Failing Heart.....	298
Náprstek J., Fischer O.: Stochastic Stability of Slender Profiles Vibrations in Wind.....	302
Nordmann R., Aenis M., Knopf E.: New Identification Techniques for Fluid Structure Interaction Forces in Rotating Machinery.....	309
Novotný J., Horáček J., Damašek A.: Numerical Simulation of Fluid-Structure Interaction Using Finite Element Method.....	316
Pečinka L., Krupa V., Klátil J.: Acoustic Phenomena in Pipelines of NPPs.....	322
Peterka F.: Influence of Transversal Impacts on the Sinking of Controlling Cassette of Nuclear Reactor.....	327
Petrov A. A.: Wind Induced Response and Fatigue Life Prediction of Structures.....	331
Pochylý F., Malenovský E., Hlavoň P.: The Nonstationary Motion of the Rigid Body in Real Liquid.....	335
Postelnicu A.: A 2-D Analysis of Boundary Layer Stability on a Compliant Wall of Laminate Plate Type.....	341
Püst L.: Interaction of Active Magnetic Bearing with Fluidoelastic Effects.....	347
Rosenberg J., Brandner M., Nejedlý J., Zát'ura F.: Non-stationary Flow through the Male Urethra.....	351
Sinitsyn E.N., Shmel'jov D.A., Sakharov V.Yu., Solonin V.I., Evropin S.V.: Numerical Simulation Cross-Flow-Induced Fluidelastic Vibration of Curved Tube Bundles.....	356
Solonin V.I., Evropin S.V., Baranov I.M., Syzarev V.D., Malishev A.V., Menyailov A.I.: Physical Model of the Tube Bundle Fragment. Dynamic Characteristics of Tubes in Motionless Water.....	362

Solonin V.I., Menyailov A.I., Syzarev V.D.:	
Mathematical Vibrational Model of the Modular Helical Steam Generator with Cross Flow of the Coolant.....	367
Suryawanshi C.S.:	
Performance Evaluation of a Bridge-Cum Reservoir Founded on Visco-Elastic Permeable Media.....	372
Sygulski R.:	
Application of FEM and BEM to Air-Membrane Structure Interaction.....	377
Tondl A.:	
Dynamic Absorber for a System Self-Excited by Cross Flow.....	381
Vatkova G., Meynen S., Schäfer M.:	
Numerical Simulation of Fluid-Structure Interaction Using a Weakly Coupled Finite Volume-Finite Element Method.....	385
Watanabe M., Kobayashi N., Hara F.:	
Theoretical Stability Analysis of Double Flexible Disks Rotating in a Confined Fluid Subjected to Swirling Fluid Flow.....	391
Zhang Y. L., Gorman D.G., Reese J.M.:	
Eigenmode Analysis of a Cylindrical Shell Conveying a Viscous Fluid.....	397
Ziada S., Sperling H., Fisker H.:	
Flow-Induced Vibration of a Turbine By-Pass Piping System.....	403
Zolotarev I.:	
Vibration of a Spherical Shell in Interaction with Acoustical Medium.....	409
Zygopoulou C., Papaioannou T.G., Mathioulakis D.S.:	
An Experimental Study of a Balloon Pump.....	415
Index of authors	421
