

CONTENTS

	Page
1. Introduction	1
2. Geological Features	2
3. Mass movements	4
3.0 Introduction	4
3.1 Block-type movements	5
3.11 Southern slopes of Rovný Hill	
3.12 Other areas involved in block-type movements	
3.2 Landslides	7
3.3 Anthropogenic landslides	8
3.4 Analysis of age and activity degree	9
3.5 Movements of debris	11
3.6 Methods of the measurement of movements /M. Herda - J. Šíma, Research Institute of Geodesy, Topography and Cartography, Praha/	12
4. Significance of mass movements	15
Bibliography	16
List of illustrations	17
