

Lecture Notes on
**Econometrics of Panel Data and Limited
Dependent Variable Models**

Štěpán Jurajda
CERGE-EI

August 15, 2002

Contents

I	Introduction	7
1	Causal Parameters and Policy Analysis in Econometrics	7
2	Reminder	9
2.1	Note on Properties of Joint Normal pdf	9
2.2	Testing Issues	10
3	Deviations from the Basic Linear Regression Model	11
II	Panel Data Regression Analysis	13
4	GLS with Panel Data	13
4.1	SURE	14
4.2	Random Coefficients Model	14
4.3	Random Effects Model	16
5	What to Do When $E[\varepsilon x] \neq 0$	17
5.1	The Fixed Effect Model	17
5.2	Errors in Variables	18
6	Testing in Panel Data Analysis	20
6.1	Hausman test	20
6.2	Using Minimum Distance Methods in Panel Data	21

6.2.1	The Minimum Distance Method	21
6.2.2	Arbitrary Error Structure	23
6.2.3	Testing the Fixed Effects Model	24
7	Simultaneous Equations	25
8	GMM and its Application in Panel Data	26
III Qualitative and Limited Dependent Variables		29
9	Qualitative response models	29
9.1	Binary Choice Models	29
9.1.1	Linear Probability Model	29
9.1.2	Logit and Probit MLE	30
9.1.3	The WLS-MD for Multiple Observations	32
9.1.4	Panel Data Applications of Binary Choice Models	32
9.1.5	Choice-based sampling	34
9.1.6	Relaxing the distributional assumptions of binary choice models	35
9.2	Multinomial Choice Models	37
9.2.1	Unordered Response Models	37
9.2.2	Ordered Response Models	41
9.2.3	Sequential Choice Models	41
9.3	Models for Count Data	43
9.4	Threshold Models	44
10	Limited Dependent Variables	45
10.1	Censored Models	45
10.2	Truncated Models	48
10.3	Semiparametric Truncated and Censored Estimators	49
10.4	Introduction to Sample Selection	50
10.5	Endogenous Stratified Sampling	51
10.6	Models with Self-selectivity	52
10.6.1	Roy's model	52
10.6.2	Heckman's λ	53
10.6.3	Switching Regression	55
10.6.4	Semiparametric Sample Selection	56
11	Program Evaluation	57
12	Duration Analysis	60
12.1	Hazard Function	61

12.2	Estimation Issues	63
12.2.1	Flexible Heterogeneity Approach	63
12.2.2	Left Censored Spells	68
12.2.3	Expected Duration Simulations	68
12.2.4	Partial Likelihood	69
IV	Some Recent Topics in Econometrics	70
13	Structural Estimation	70
14	Nonparametrics	70
14.1	Kernel estimation	71
14.2	K-th Nearest Neighbor	71
14.3	Local Linear Regression	71
14.4	Multidimensional Extensions	72
14.5	Partial Linear Model	73
14.6	Quantile Regression	73
15	Miscellaneous Other Topics	73
