

Table of contents

1. Preface / 5
2. Committees / 7
3. Venue / 9
4. Programme / 11
5. Abstracts / 17
 - 5.1 List of abstracts / 17
 - 5.2 Key Lectures / 25
 - 5.3 Session I – Molecular Oncology / 37
 - 5.4 Session II – Nucleic Acids Research in Biomedicine / 61
 - 5.5 Session III – Molecular Biology of Non-Oncological Diseases / 89
 - 5.6 Posters / 101
6. List of participants / 203
7. Additional information / 211
 - Conference party / 211
8. Partners and sponsors / 213

Key Lectures

New frontiers in cellular reprogramming (<i>Manuel Serrano</i>)	26
DNA Repair as a Target for Therapy (<i>Lumir Krejčí</i>)	28
AggreWell plate aggregation and defined factors allow highly uniform-sized and functional cardiac embryoid bodies from human ESCs and iPSCs (<i>Albano C. Meli</i>)	30
Tissue engineering – Architecture in cell biology (<i>Josef Jaroš</i>)	32
Rare genetic variants in Mendelian and complex diseases (<i>Stanislav Kmoč</i>)	34

Session I

Molecular Oncology

Effect of viral interferon regulatory factor-3 encoded by Kaposi's sarcoma-associated herpesvirus on p53 function (<i>Jana Musilová</i>)	38
Expression levels of Wnt5a and Wnt11 molecules in cigarette smoke-induced in vitro and in vivo inflammation models (<i>Diána Feller</i>)	40
Carbonic Anhydrase IX: Revealing the secrets by RNA interference and 2D-DIGE analysis (<i>Martin Beneš</i>)	42
Promoter DNA Methylation and CCM1 Transcription Factor in Regulation of Human Endogenous Retrovirus ERVWE1 (<i>Martina Dobšová</i>)	44
Lysosomal pathway of the TRAIL-induced apoptosis in breast carcinoma cells – the role of the lysosomal protease cathepsin D (<i>Blanka Jančková</i>)	46
Identification and characterization of BRCA1 alternative splicing variants in breast cancer cell line (<i>Filip Lhota</i>)	48

Rosiglitazone efficiently sensitizes human colon cancer cells to LA-12-induced apoptosis (<i>Jarmila Lauková</i>)	50
Anticancer effect of new quercetin derivatives (<i>Martina Danihelová</i>)	52
Molecular cytogenetics profiling of 52 patients with low-grade gliomas (<i>Halka Buryová</i>)	54
Shedding of CA IX ectodomain in response to cell death (<i>Ivana Vidličková</i>)	56
Exon recognition and early spliceosome assembly (<i>Eva Šimková</i>)	58

Session II

Nucleic Acids Research in Biomedicine

Domain Movements and Sequence-specific Pausing of RecQ Helicase (<i>Zsuzsa S. Kocsis</i>)	62
NLS copy number variation mediates dUTPase task distribution among cell organelles in eukaryotes (<i>Hajnalka Pálinkás</i>)	64
IMPDH1: ChIPed and CLIPed (<i>Jan Herudek</i>)	66
Atomic Force Microscopy: tool for study of nucleic acid structure on a single molecular level (<i>Veronika Horňáková</i>)	68
The Analysis of Next-Generation Sequencing Data Reveals Patterns of Expression for Clustered miRNAs (<i>Jan Oppelt</i>)	70
The role of uracil-DNA in <i>Drosophila melanogaster</i> (<i>Júlia Batki</i>)	72
Correlation of Updated Wallace's Zoogeographic Regions of the World and Phylogenetic Trees of Selected Non-Pelagic Animal Species (<i>Jaroslav Balogh</i>)	74
Digital Signal Processing Technics for DNA Compression (<i>Karel Sedlář</i>)	76
Comparison of Spectrogram Construction Methods for Detection of Periodicities in DNA sequences (<i>Vladimira Kubicová</i>)	78

Brd2 regulates transcription and alternative splicing (<i>Samira Hozeifi</i>)	80
Quadruplexes of human telomere dG_v(TTAG₃)₃ sequences containing guanine abasic sites (<i>Petra Školáková</i>)	82
Finding telomeres in whole human chromosome sequences (<i>Jiří Nedvěd</i>)	84
Biocompatibility of poly(L-lactide-co-glycolide) scaffolds – <i>in vitro</i> study on human skin cells (<i>Aleksandra Zuber</i>)	86

Session III

Molecular Biology of Non-Oncological Diseases

Budesonide potentiates conventional therapy of meconium aspiration syndrome affecting the respiratory parameters and inflammatory markers (<i>Pavol Mikalka</i>)	90
Protein Hot Spot Prediction Using S-transform (<i>Jan Kašpárek</i>)	92
Molecular biological methods of laboratory diagnosis acute form of leptospirosis – detection of gene encoding surface lipoprotein LipL32 of pathogenic leptospire (<i>Petra Kučerová</i>)	94
Peripheral immune tolerance is mediated by eTAC stromal cells (<i>Jan Dobeš</i>)	96
Mass spectrometry imaging in biomedicine: Localization of Gb₃Cer storage in the mouse kidney suffering from Fabry disease (<i>Lukáš Krásný</i>)	98

Posters

1. **Mutation screening PAX9 and MSX1 genes in patients affected by tooth agenesis** (*Mariana Bindasová*) 102
2. **Characterization of TPR-like proteins in *Francisella tularensis*; identification of a novel lipoprotein FTH_1662 required for virulence** (*Věra Daňková*) 104
3. **Cholecystokinin effects on energy balance depend on age and body composition** (*Nóra Fűredi*) 106
4. **TKI Inhibitors in Targeting Cancer Stem Cells – Development of New KDR Inhibitor** (*Jana Holekšiová, Peter Šramel*) 108
5. **Establishment of *in vitro* infection of mouse BMDC with *F. tularensis* strain LVS** (*Veronika Hostýnková*) 110
6. **The influence of *Candida albicans* on FMT of human bronchial fibroblasts in culture – preliminary study** (*Paulína Knobloch*) 112
7. **The centrosomal abnormalities of human embryonic stem cells in 2D and 3D environments** (*Anna Kučerová*) 114
8. **Are diverse endocytic pathways responsible for TGF- β 1-induced FMT in human bronchial fibroblasts (HBFs)?** (*Ewa Mucha*) 116
9. **Short-term cardiovascular effects of selective phosphodiesterase 3 vs. non-selective phosphodiesterase inhibitor in meconium-induced acute lung injury** (*Hana Pištěková*) 118
10. **Relationship between reactive oxygen species production in human semen and sperm DNA damage assessed by Sperm Chromatin Structure Assay** (*Marie Reruchová*) 120
11. **Apolipoprotein E polymorphism in murine macrophages – the influence on angiogenic mRNA and microRNA expression** (*Michal Rudnik*) 122
12. **Multiple phosphorylation site of E3-ligase CHIP regulates its binding to HSP70/90 chaperones** (*Filip Trčka*) 124

- | | | |
|-----|--|-----|
| 13. | Human IL-23 receptor antagonists derived from an albumin-binding domain scaffold inhibit IL-23-dependent <i>ex vivo</i> expansion of IL-17-producing T-cells (Lucie Vaňková) | 126 |
| 14. | Using forward genetics to identify mutants defective in the regulation of auxin transport in <i>Arabidopsis thaliana</i> (Radka Zemová) | 128 |
| 15. | The importance of Lys3Asn polymorphism in RANKL/RANK/OPG signaling pathway in patients with osteoporosis (Michaela Zígová) | 130 |
| 16. | Cell migration is regulated by ERK pathway, protein RACK1 and protein kinase RSK (Vojtěch Bráborec) | 132 |
| 17. | The Role of Immunoglobulin B-cell Receptor in Follicular Lymphoma (Kamila Brázdilová) | 134 |
| 18. | Inhibition of XIAP and survivin sensitize cancer cells to cytotoxic effect of hypericin-mediated photodynamic therapy (Katarína Gyurászová) | 136 |
| 19. | Impact of P-glycoprotein expression on alteration in cells surface glycosides in leukemic cells (Milan Hano) | 138 |
| 20. | Proadifen enhances mitoxantrone cytotoxicity in mitoxantrone-sensitive and mitoxantrone-resistant human promyelocytic leukemia cells (Lucia Hlívková) | 140 |
| 21. | <i>In vitro</i> analysis of cytotoxic effect of nanoparticles on tumor cells (Alicja Karabasz) | 142 |
| 22. | Dehydrosilybin and its galloylderivatives as modulators of angiogenesis (Daniel Karas) | 144 |
| 23. | New and complementary strategies of blocking and reversing lymphangiogenesis in cancer (Malgorzata Kulesza, Tomasz Klaus) | 146 |
| 24. | Analysis of selected microRNAs in glioblastoma stem cells (Renata Kleinová) | 148 |
| 25. | Expression analysis of microRNAs in relation to the chemoradioresistance of glioblastoma (Zdeňka Kosařová) | 150 |

26. Monitoring of minimal residual disease in patients with mantle cell lymphoma (<i>Milan Lokvenc</i>)	152
27. Wnt-PCP pathway driving pathogenesis of chronic lymphocytic leukemia participates on normal B-cell development (<i>Hana Mádrová, Lucie Poppová</i>)	154
28. Tumor suppressive effects of wedelolactone (<i>Tereza Nehybová</i>)	156
29. Effect of Src kinase inhibitors on chronic myeloid leukemia cell adhesion dynamics (<i>Adam Obr</i>)	158
30. Variations of hypericin's effect on mitoxantrone action in HL-60 cells and in the ABCG2 over-expressing cBCRP sub-clone (<i>Zuzana Papčová</i>)	160
31. Is increased resistance of colorectal carcinoma cells to cytotoxic agents caused by the c-Myb-dependent activation of p38MAPK and PI3K/Akt signaling pathways? (<i>Lucie Pekarčíková</i>)	162
32. Expression of cyclin D1 in Non-Hodgkin's Lymphomas (<i>Lenka Pitrová</i>)	164
33. The study of anticancer properties of novel quercetin complexes (<i>Petra Polakovičová</i>)	166
34. Quantification of human Cdc7 kinase, a key regulator of DNA replication and visualization of DNA synthesis using fluorescence-based methods (<i>Sara Przetocka</i>)	168
35. Anticancer activity of buckwheat hull extracts (<i>Milada Rakická</i>)	170
36. MK-886 increases the susceptibility of HT-29 carcinoma cells to hypericin-based photodynamic therapy (<i>Barbora Valeková</i>)	172
37. pH dependence of UV-VIS and fluorescence spectra of the anthraquinone drug parietin and its dissociation properties (<i>Valéria Verebová</i>)	174
38. TMV-based nanoparticles for medical use (<i>Lucie Dlabalová</i>)	176
39. miRNA synthesis inhibition involved in kidney carcinogenesis (<i>Marta Tempes, Jan Majta</i>)	178

40. Interaction of human transcription factor Yin-Yang 1 N-terminal domain with TATA-box binding protein (*Dawid Zyla*) 180
41. The relationship of selected miRNAs to P-glycoprotein, MRP1 and LRP/MVP mediated drug resistance in non-small cell lung cancer (*Veronika Žižková*) 182
42. Transfer of mRNAs by Embryonic Stem Cell-Derived Microvesicles (*Marta Adamiak*) 184
43. FGF2 can alter energetic metabolism of hESC (*Petr Fojtík*) 186
44. Statins affect stemness properties of human embryonic stem cells (*Šárka Jelinková*) 188
45. Tec kinase in human pluripotent stem cells: expression, localization and function (*Žaneta Konečná*) 190
46. FGFR1 in human embryonic stem cells (*Tereza Obadalová*) 192
47. Influence of synthetic substrates on adhesion, proliferation and survival of pluripotent stem cells (*Jakub Pospíšil*) 194
48. Metabolic crossroads: on the difference between human embryonic stem cells and their differentiated counterparts (*Jan Raška*) 196
49. Analysis of mutation frequency as criterion of genome pluripotent stem cell's stability (*Monika Šeneklová*) 198
50. Chemical modification of poly (allylamine hydrochloride) as potential multilayer films useful in wound healing (*Karol Žrubek*) 200
