Why Silk?.....	1
What Is Silk?.....	5

The Science of Silk

Silk Types and Variations	11
Silk Is a Hierarchical Material Made of Protein.....	15
Silk Mechanics.....	20
Optical, Thermal, and Conductive Properties	25

Silk-Producing Organisms

Velvet Worms.....	33
Web-Spinners.....	35
Glow Worms.....	38
Raspy Crickets	45
Bees, Hornets, Wasps, and Ants	46
Caddisfly.....	50
Lacewings	53
Sea Silk	56
Moths	59
Spiders.....	65
Spinning Apparatus of Spiders.....	68
Major Ampullate Silk.....	70
Plasticity.....	74
Minor Ampullate Silk	80
Flagelliform Silk.....	82
Aggregate Silk	84
Pyriiform Silk.....	91

Aciniform Silk.....	93
Tubuliform Silk.....	97
Cribellate Silk.....	99
Why the Cribellum Was Lost.....	104

Uses of Silk

Past, Present, and Future Silk Industries.....	109
Artificial Silks	114
Future Fibres	117
Bacteria and Yeast Hosts.....	119
Plant Hosts.....	122
Animal Hosts	123
Scaling Up Production	126
Advanced Spinning	129
Applications	139
Medical applications.....	140
Wound Healing	141
Implants, Tissue Culture, and Prostheses	143
Drug Delivery	146
Non-medical Applications	148
Applications for Adhesive Silk	149
Clothing.....	151
Antiballistics	154
Further Applications.....	156
References	159
Index.....	177
