Content

1. Basic Methods 5
1.1 Laboratory animals 5
1.1.1 Division of laboratory animals 5
1.1.2 The quality of animals 5
1.1.3 Ethics of work with experimental animals 6
1.1.4 Some vertebrates used in experiments 7
1.1.5 Manipulation with laboratory animals 8
1.2 Laboratory protocol (report) 8
1.3 Anesthesia 9
1.3.1 General anesthesia 9
1.3.2 Local anesthesia 11
1.4 Injection technique 12
1.5 Basic surgical instruments and sewing material 12
1.6 Surgical technique in laboratory animals 16
1.6.1 General principles 16
1.6.2 Surgical sutures 16
1.6.3 Cannulation of the vessels 18
1.6.4 Tracheostomia (Insertion of the tracheal cannula) 19
1.7 Basic evaluation of measured data 19

2. General Pathological Physiology 23
2.1 Skin resistance measurement 23
2.1.1 Changes of skin resistance – galvanic reaction 24
2.2 Disturbances in thermoregulation – fever 24

3. Blood 26
3.1 Experimental hemolytic anemia 26
3.2 Changes of coagulation due to peroral anticoagulants 27
3.3 The effect of heparin on fibrin formation 28
3.4 Rumpel – Leede test 29
3.5 Direct test of phagocytosis by neutrophils 29

4. Circulation 31
4.1 Examination of functional efficiencies of circulation 31
4.2 Harvard step test 32
4.3 Letunov's test 33
4.4 Telemetric observation of heart rate 35
4.5 Electrocardiogram (ECG) in pathological states of the heart 36
4.5.1 Description of ECG curve 38
4.5.2 Pathological changes on ECG curve 40
4.5.2.1 Arrhythmias 40
4.5.2.2 ECG changes in inflammatory heart diseases 49
4.5.2.3 ECG changes in ischemic heart disease 50
4.5.2.4 ECG changes caused by pharmaceuticals 52
4.5.2.5 Electrocardiogram changes in electrolyte disturbances 53

4.5.2.6 Changes of the P wave 53
4.5.2.7 Electric heart stimulation 55
4.6 Experimental disorders of the heart 55

5. Respiration 58
5.1 Examination of pulmonary ventilation 58
5.2 Influence of decreased partial pressure of oxygen 60
5.3 Voluntary apnea 61

6. Digestion 62
6.1 Investigation of saliva properties 62
6.2 Operation of the stomach – insertion of stomach cannula 62

7. Metabolism and Thermoregulation 64
7.1 Obesity after stereotaxically performed hypothalamic lesion 64
7.2 Developmental dependence of thermoregulation 66

8. Excretion 68
8.1 Ureterostomia 68

9. Endocrinology 70
9.1 Metabolic and circulatory changes in experimental thyroid dysfunction 70
9.2 Adrenalectomy in rats 71
9.3 Castration in male rats 72

10. Nervous System 73
10.1 Vestibular ataxia in a guinea pig 73
10.2 Test of motor ability 73
10.3 Recordings of bioelectrical brain activity in man – electroencephalography 74
10.4 EEG recordings – evoked potentials (EP) 76
10.5 Recordings of spontaneous and evoked ECoG in experimental animal. Experimental epilepsy 78
