

TABLE OF CONTENTS

1	DIRECTIONS FOR LABORATORY WORK – GENERAL SAFETY MEASURES.....	7
2	BASICS OF WORK IN A (BIO)CHEMICAL LABORATORY.....	8
2.1	Laboratory equipment, glassware	8
2.2	Heat sources	8
2.3	Laboratory glassware	9
2.3.1	Beakers	9
2.3.2	Measuring glassware	9
2.4	Other laboratory equipment	13
2.4.1	Liquid dispensers.....	13
2.4.2	Automatic piston pipettes.....	13
2.4.3	Balances and weighing.....	14
2.5	Preparation, filtration, dilution and heating of a CuSO_4 solution	14
2.6	Volumetric analysis.....	15
2.6.1	Titration curves of hydrochloric and phosphoric acid	16
2.6.2	Determination of sulphuric acid concentration	17
2.6.3	Determination of H_2O_2 concentration by manganometry	17
2.6.4	Determination of iodine concentration in Lugol's solution	18
2.6.5	Determination of calcium by chelatometry	19
2.7	Determination of dissociation constants by potentiometry	19
2.7.1	Determination of dissociation constant of acetic acid.....	19
2.7.2	Determination of dissociation constant of ammonia.....	20
2.8	Buffers, buffer pH, buffer capacity	21
3	METHODS OF CHROMATOGRAPHY	23
3.1	Thin layer chromatography of amino acids.....	26
3.2	Separation of paprika carotenoids by column adsorption chromatography	26
3.3	Test for purine and pyrimidine bases by thin layer chromatography	27
3.4	Gel chromatography of hemolysed blood	28
3.5	Deionization of calcium chloride solution on ion exchangers	28
3.6	Preparative chromatography of azo-dyes on thin layer of silica gel	29
4	FUNDAMENTALS OF PHOTOMETRIC ANALYSIS.....	31
4.1	Molecular absorptiometry	31
4.2	Beer-Lambert relationship.....	31
4.3	Deviations from the Beer-Lambert law	31
4.4	Quantitative measurements	32
4.4.1	Absolute methods	33
4.4.2	Comparative methods.....	33
5	AMINO ACIDS AND PROTEINS.....	34
5.1	Chemical reactions of amino acids and proteins	34
5.1.1	General colour reactions of amino acids and proteins	34
5.1.2	Specific colour reaction of amino acids	35
5.1.3	Precipitation reactions of amino acids and proteins.....	36
5.2	Separation of acidic, neutral and basic amino acids by electrophoresis	38
5.3	Determination of the isoelectric point of histidine.....	38
5.4	Determination of isoelectric point of casein.....	39
5.5	Determination of total serum proteins by biuret reaction.....	40
5.6	Isolation of albumins and globulins by fraction salting out	41
5.7	Serum protein electrophoresis on cellulose acetate membrane and agarose gel.....	42
5.7.1	Electrophoresis on cellulose acetate membrane.....	42

5.7.2	Electrophoresis on agarose gel.....	42
5.7.3	Determination of urea in serum.....	43
6	SACCHARIDES	44
6.1	Chemical reactions of saccharides	44
6.1.1	Preparation of starch colloid solution:	44
6.1.2	Reactions with strong acids.....	44
6.1.3	Reducing properties of saccharides.....	45
6.1.4	Chemical reactions of polysaccharides - Lugol's reaction	46
6.2	Polarimetric observations of D-glucose mutarotation	47
6.3	Polarimetric determination of glucose in urine	48
6.4	Determination of glucose in blood and urine, oral glucose tolerance test (oGTT)..	48
6.5	Determination of glucose by a personal glucometer.....	50
6.6	Determination of glycated hemoglobin.....	51
7	LIPIDS	53
7.1	Chemical reactions of lipids.....	53
7.1.1	Saponification of lipids	53
7.1.2	Detection of unsaturated fatty acids.....	54
7.1.3	Detection of cholesterol	54
7.2	Determination of the iodine number of lipids	54
7.3	Plasma lipoprotein analysis.....	56
7.3.1	Introduction	56
7.3.2	Plasma lipoprotein separation	57
7.3.3	Determination of total cholesterol in blood serum.....	58
7.3.4	Determination of HDL-cholesterol	58
7.3.5	Determination of triacylglycerols in blood serum.....	59
7.3.6	Calculation of LDL-cholesterol	60
7.3.7	Calculations of lipid concentration	60
8	NUCLEIC ACIDS.....	62
8.1	Isolation and degradation of nucleoproteins from bakers'yeast	62
8.2	Demonstration of dehydrogenase activity of xanthine oxidase	63
8.3	Determination of uric acid in blood serum.....	63
9	TOXICOLOGY AND ANALYSIS OF DRUGS.....	65
9.1	Determination of salicylic acid in Acylpyrin	65
9.2	Quantitative determination of salicylates by photometry	66
9.3	Identification of levomepromazine and its metabolites in biological samples by TLC...	67
9.4	Determination of nitrates in biological material by ion selective electrode.....	68
9.5	Determination of vitamin C in vitamin supplements and fruit juices	69
9.6	Isolation and demonstration of alkaloids from plant material.....	70
10	ENZYMES	72
10.1	Demonstration of enzymatic character of peroxidase reaction	72
10.2	Demonstration of substrate specificity of amylase and sucrase.....	73
10.3	Inhibition of enzymatic activity - inhibition of catalase by cyanide	74
10.4	Determination of pH optimum for trypsin	74
10.5	Determination of pH optimum for pepsin.....	75
10.6	Determination of optimum temperature for trypsin	76
10.7	Determination of Michaelis constant of alkaline phosphatase	77
10.8	Enzyme activity and myocardial infarction	80
10.9	Determination of lactate dehydrogenase (LD) activity in serum	81
10.10	Determination of the α -hydroxybutyrate dehydrogenase activity in serum.....	82
10.11	Determination of creatine kinase (CK) activity	83

10.12	Determination of aspartate aminotransferase (AST) activity in serum.....	84
10.13	Determination of alanine aminotransferase (ALT) activity in serum	85
11	TETRAPYRROLES.....	86
11.1	Determination of hemoglobin in blood	86
11.2	Determination of total bilirubin in serum.....	86
11.3	Test for blood in faeces (test for occult bleeding).....	88
11.4	Gallstones analysis	88
12	URINALYSIS	90
12.1	Physical analysis of urine	90
12.1.1	Urine colours	90
12.1.2	Spume.....	90
12.1.3	Odour.....	90
12.1.4	pH reaction	90
12.1.5	Turbidity.....	90
12.1.6	Density and osmolality of urine	90
12.1.7	Volume of urine	91
12.2	Chemical analysis of urine	91
12.2.1	Tests for proteinuria - proteins in urine.....	91
12.2.2	Tests for glucosuria - glucose in urine	92
12.2.3	Tests for ketonuria - ketone bodies in urine	93
12.2.4	Tests for hemoglobinuria - hemoglobin in urine.....	94
12.2.5	Tests for bilirubinuria - bilirubin in urine	94
12.2.6	Urobilinogenuria - urobilinogen in urine	95
12.2.7	Test for salicylates.....	96
12.2.8	Less frequent examinations.....	96
12.3	Microscopic urinalysis	96
12.4	Chemical analysis of renal calculi (urolithiasis)	97
13	CREATININE CLEARANCE AND GASTRIC SECRETION	99
13.1	Determination of creatinine in blood serum and urine, creatinine clearance	99
13.1.1	Determination of creatinine in blood serum and urine.....	99
13.1.2	Creatinine clearance calculation.....	100
13.2	Determination of gastric output.....	101
13.2.1	Qualitative examination of gastric juice.....	101
13.2.2	Quantitative examination of gastric juice.....	101
14	IMMUNOASSAY.....	103
14.1	Determination of immunoglobulin IgA using radial immune-diffusion	103
14.2	Identification of serum proteins using immunoelectrophoresis	105
14.3	Determination of erythropoietin in blood serum by ELISA	106
14.4	Determination of immunoglobulin IgG using turbidimetry	107
