Introduction (<i>M. Vysoudil</i>)	11
CONCEPTS OF NATURE CONSERVATION IN THE CZECH REPUBLIC, AUSTRIA AND SLOVENIA	13
Nature conservation in the Czech Republic (<i>M. Jurek</i>)	15
Nature conservation in Styria in the national context (<i>W. Sulzer</i>)	19
Nature conservation in Slovenia (<i>B. Lampič, I. Mrak</i>)	26
SUSTAINABLE ENVIRONMENTAL RESEARCH: CASE STUDIES	35
<i>Case study for the Natural Park Bystřice River Valley, Czech Republic</i>	37
Geographical description of the Natural Park Bystřice River Valley (<i>M. Vysoudil</i>)	37
Sustainable topoclimatological research (<i>M. Vysoudil</i>)	41
Application of GIS in sustainable environmental research (<i>A. Létal</i>)	52
Ambient air pollution assessment (<i>M. Jurek</i>)	59
Sustainable hydrological research (<i>R. Pavelková Chmelová</i>)	63
<i>Case study for the NATURA 200 area Hohentauern, Austria</i>	69
Investigation area of Hohentauern (<i>W. Sulzer</i>)	69
The demand of geospatial data integration (<i>J. Gspurning, W. Sulzer</i>)	77
GIS – Applications (<i>J. Gspurning</i>)	80
Remote Sensing – Applications (<i>W. Sulzer</i>)	84
Climate and land use planning in the region of Hohentauern/Styria (<i>R. Lazar</i>)	88
GIS-based modelling of mean annual precipitation (1971-2000) (<i>Ch. König</i>)	93
<i>Case study for the Triglav National Park, Slovenia</i>	99
The geographic characteristics and significance of Triglav National Park as a principal protected area in Slovenia (<i>B. Lampič, I. Mrak</i>)	99

The climatic data acquisition issues in mountain areas (<i>M. Ogrin</i>)	107
Geographic information sources for Triglav National Park (<i>M. Krevs</i>)	113
Demographic vitality of population as an important development potential of protected areas (<i>B. Lampič</i>)	121
Sustainable tourism development in mountain areas (<i>I. Mrak</i>)	125

CONCLUSION 129

List of project participants	135
------------------------------	-----

37	Geographical description of the Natural Park Bystriца River Valley (M. Krevs)
41	Sustainable topographical research (M. Krevs)
52	Application of GIS in sustainable environmental research (A. Ladin)
59	Ambient air pollution assessment (M. Jurčič)
63	Sustainable hydrological research (A. Pavličič Čučar)
69	Case study for the METIRA 200 near Hohenstein, Austria
69	Investigation area of Hohenstein (W. Sulzer)
77	The demand of geospatial data ingestion (J. Gasparyk, W. Sulzer)
80	GIS – Applications (J. Gasparyk)
84	Remote Sensing – Applications (W. Sulzer)
88	Climate and land use planning in the region of Hohenstein, Styria (R. Lapan)
93	GIS-based modelling of mean annual precipitation (1971-2000) (M. Krevs)
99	Case study for the Triglav National Park, Slovenia
99	The geographic characteristics and significance of Triglav National Park as a principal protected area in Slovenia (B. Lampič, I. Mrak)
