

Contents

Let's Go

1 Getting Started with Python

- 1.1 Algorithms and algorithmic thinking 1
 - 1.1.1 Algorithmic thinking 1
 - 1.1.2 States 2
 - 1.1.3 What does $a = a + 1$ mean? 3
 - 1.1.4 Symbolic versus numerical 3
- 1.2 Launch Python 4
 - 1.2.1 IPython console 6
 - 1.2.2 Error messages 10
 - 1.2.3 Sources of help 10
 - 1.2.4 Good practice: Keep a log 11
- 1.3 Python modules 11
 - 1.3.1 `import` 12
 - 1.3.2 `from ... import` 12
 - 1.3.3 NumPy and PyPlot 13
- 1.4 Python expressions 14
 - 1.4.1 Numbers 14
 - 1.4.2 Arithmetic operations and predefined functions 14
 - 1.4.3 Good practice: Variable names 15
 - 1.4.4 More about functions 16

2 Organizing Data

- 2.1 Objects and their methods 19
- 2.2 Lists, tuples, and arrays 21
 - 2.2.1 Creating a list or tuple 21
 - 2.2.2 NumPy arrays 21
 - 2.2.3 Filling an array with values 23
 - 2.2.4 Concatenation of arrays 24
 - 2.2.5 Accessing array elements 25
 - 2.2.6 Arrays and assignments 26
 - 2.2.7 Slicing 27
 - 2.2.8 Flattening an array 28

- 2.2.9 Reshaping an array 28
- 2.2.10 **T₂** Lists and arrays as indices 29
- 2.3 Strings 29
 - 2.3.1 Raw strings 31
 - 2.3.2 Formatting strings with the `format()` method 31
 - 2.3.3 **T₂** Formatting strings with `%` 32

3 Structure and Control

35

- 3.1 Loops 35
 - 3.1.1 `for` loops 35
 - 3.1.2 `while` loops 37
 - 3.1.3 Very long loops 37
 - 3.1.4 Infinite loops 37
- 3.2 Array operations 38
 - 3.2.1 Vectorizing math 38
 - 3.2.2 Matrix math 40
 - 3.2.3 Reducing an array 41
- 3.3 Scripts 42
 - 3.3.1 The Editor 42
 - 3.3.2 **T₂** Other editors 42
 - 3.3.3 First steps to debugging 43
 - 3.3.4 Good practice: Commenting 45
 - 3.3.5 Good practice: Using named parameters 47
 - 3.3.6 Good practice: Units 48
- 3.4 Contingent behavior: Branching 49
 - 3.4.1 The `if` statement 50
 - 3.4.2 Testing equality of floats 51
- 3.5 Nesting 52

4 Data In, Results Out

53

- 4.1 Importing data 53
 - 4.1.1 Obtaining data 54
 - 4.1.2 Bringing data into Python 54
- 4.2 Exporting data 57
 - 4.2.1 Scripts 57
 - 4.2.2 Data files 58
- 4.3 Visualizing data 60
 - 4.3.1 The `plot` command and its relatives 60
 - 4.3.2 Log axes 63
 - 4.3.3 Manipulate and embellish 63
 - 4.3.4 Replacing curves 65
 - 4.3.5 **T₂** More about figures and their axes 65
 - 4.3.6 **T₂** Error bars 66

- 4.3.7 3D graphs 66
- 4.3.8 Multiple plots 67
- 4.3.9 Subplots 68
- 4.3.10 Saving figures 69
- 4.3.11 **T₂** Using figures in other applications 70

5 First Computer Lab 71

- 5.1 HIV example 71
 - 5.1.1 Explore the model 71
 - 5.1.2 Fit experimental data 72
- 5.2 Bacterial example 73
 - 5.2.1 Explore the model 73
 - 5.2.2 Fit experimental data 73

6 Random Number Generation and Numerical Methods 75

- 6.1 Writing your own functions 75
 - 6.1.1 Defining functions in Python 76
 - 6.1.2 Updating functions 78
 - 6.1.3 Arguments, keywords, and defaults 78
 - 6.1.4 Return values 79
 - 6.1.5 Functional programming 80
- 6.2 Random numbers and simulation 81
 - 6.2.1 Simulating coin flips 82
 - 6.2.2 Generating trajectories 82
- 6.3 Histograms and bar graphs 83
 - 6.3.1 Creating histograms 83
 - 6.3.2 Finer control 85
- 6.4 Contour plots, surface plots, and heat maps 86
 - 6.4.1 Generating a grid of points 86
 - 6.4.2 Contour plots 86
 - 6.4.3 Surface plots 87
 - 6.4.4 Heat maps 88
- 6.5 Numerical solution of nonlinear equations 89
 - 6.5.1 General real functions 89
 - 6.5.2 Complex roots of polynomials 90
- 6.6 Solving systems of linear equations 91
- 6.7 Numerical integration 92
 - 6.7.1 Integrating a predefined function 92
 - 6.7.2 Integrating your own function 93
 - 6.7.3 Oscillatory integrands 94
 - 6.7.4 **T₂** Parameter dependence 94
- 6.8 Numerical solution of differential equations 95
 - 6.8.1 Reformulating the problem 95

x

- 6.8.2 Solving an ODE 96
- 6.8.3 T_2 Parameter dependence 97
- 6.8.4 Other ODE solvers 98
- 6.9 Vector fields and streamlines 100
 - 6.9.1 Vector fields 100
 - 6.9.2 Streamlines 101

7 Second Computer Lab

- 7.1 Generating and plotting trajectories 103
- 7.2 Plotting the displacement distribution 104
- 7.3 Rare events 105
 - 7.3.1 The Poisson distribution 105
 - 7.3.2 Waiting times 106

8 Images and Animation

- 8.1 Image processing 109
 - 8.1.1 Images as NumPy arrays 109
 - 8.1.2 Saving and displaying images 110
 - 8.1.3 Manipulating images 110
- 8.2 Displaying data as an image 111
- 8.3 Animation 113
 - 8.3.1 Creating animations 113
 - 8.3.2 Saving animations 114
 - HTML movies 115
 - T_2 Using an encoder 117
 - 8.3.3 Conclusion 117

9 Third Computer Lab

- 9.1 Convolution 119
 - 9.1.1 Python tools for image processing 120
 - 9.1.2 Averaging 121
 - 9.1.3 Smoothing with a Gaussian 121
- 9.2 Denoising an image 122
- 9.3 Emphasizing features 122
- 9.4 T_2 Image files and arrays 123

10 Advanced Techniques

- 10.1 Dictionaries and generators 125
 - 10.1.1 Dictionaries 126
 - 10.1.2 Special function arguments 128
 - 10.1.3 List comprehensions and generators 129
- 10.2 Tools for data science 133
 - 10.2.1 Series and data frames with pandas 133

4.3.7 3D graphs 66
4.3.8 Multiple plots 67
4.3.9 Subplots 68
4.3.10 Saving figures 69
4.3.11 T_2 Using figures in other applications 70

5 First Computer Lab 103

5.1.1 Explore the model 71
5.1.2 Fit experimental data 72
5.2 Bacterial example 73
5.2.1 Explore the model 73
5.2.2 Fit experimental data 73

6 Random Number Generation and Numerical Methods 109

6.1 Writing your own functions 75
6.1.1 Defining functions in Python 76
6.1.2 Updating functions 78
6.1.3 Arguments, keywords, and defaults 78
6.1.4 Return values 79
6.2 Functional programming 80
6.2.1 Random numbers and simulation 81
6.2.2 Simulating coin flips 82
6.2.3 Generating trajectories 82
6.3 Histograms and bar graphs 83
6.3.1 Creating histograms 83
6.3.2 Filter control 85

6.4 Contour plots, surface plots, and heat maps 86

6.4.1 Generating a grid of points 86
6.4.2 Contour plots 86
6.4.3 Surface plots 87
6.4.4 Heat maps 88

6.5 Numerical solution of nonlinear equations 89

6.5.1 General real functions 89
6.5.2 Complex roots of polynomials 90
6.6 Solving systems of linear equations 91

6.7 Numerical integration 92

6.7.1 Integrating a predefined function 92
6.7.2 Integrating your own function 93
6.7.3 Oscillatory integrands 94
6.7.4 T_2 Parameter dependence 94

6.8 Numerical solution of differential equations 95
6.8.1 Reformulating the problem 95

10.2.2	Machine learning with scikit-learn	135
10.2.3	Next steps	138
10.3	Symbolic computing	138
10.3.1	Wolfram Alpha	139
10.3.2	The SymPy library	141
10.3.3	Other alternatives	144
10.3.4	First passage revisited	144
10.4	Writing your own classes	148
10.4.1	A random walk class	148
10.4.2	When to use classes	155
Get Going		157
A	Installing Python	159
A.1	Install Python and Spyder	159
A.1.1	Graphical installation	160
A.1.2	Command line installation	161
A.2	Setting up Spyder	162
A.2.1	Working directory	162
A.2.2	Interactive graphics	163
A.2.3	Script template	163
A.2.4	Restart	164
A.3	Keeping up to date	164
A.4	Installing FFmpeg	164
