1	Introduction: Local Processes with Global Impacts	1
	<i>Lead authors: E. F. Lambin · H. Geist · R. R. Rindfuss</i>	
1.1	A Research Agenda for a Primary Driver of Global Change	1
1.1.1	Introduction	1
1.1.2	Development of the Land-Use/Cover Change (LUCC) Project	2
1.2	The Distinction between Land Use and Land Cover	4
1.3	Theoretical Foundations for Land-Change Science: Multiple Theories but Not "Atheoretical"	5
1.3.1	Box and Arrow Frameworks	5
1.3.2	Disciplinary Theories	6
1.3.3	Potential for an Overarching Theory	7
1.4	Objectives and Structure of the Book	8
2	Global Land-Cover Change: Recent Progress, Remaining Challenges	9
	<i>Lead author: N. Ramankutty</i>	
2.1	Introduction	9
2.2	Historical Changes in Global Land Cover	11
2.2.1	Global Land-Cover Changes over the Last Millennium	11
2.2.2	Global Land-Cover Changes over the Last 300 Years	12
2.2.3	What Makes the 20 th Century Unique?	20
2.3	Most Rapid Land-Cover Changes of the Last Decades: Rapid and Extensive	21
2.3.1	Recent Forest-Cover Changes	21
2.3.2	Recent Changes in Agricultural Areas	24
2.3.3	Recent Changes in Pastoral Areas	24
2.3.4	Recent Changes in Urbanization	25
2.3.5	Recent Changes in Drylands	26
2.3.6	Summary and Conclusions	28
2.4	The Complexity of Land-Cover Change	29
2.4.1	The Poorly Documented Changes	29
2.4.2	Characterizing the Complexity of Changes	33
2.5	Power and Limitations of Remote Sensing	34
2.5.1	Remote Sensing of Global Land Cover	34
2.5.2	The Challenge of Monitoring	35
2.6	Conclusions	38
3	Causes and Trajectories of Land-Use/Cover Change	41
	<i>Lead authors: H. Geist · W. McConnell</i>	
3.1	Introduction	41
3.2	Explaining Land Dynamics	42
3.2.1	Proximate Versus Underlying Causes	42
3.2.2	The Context of Land Change: Slow Versus Fast, and the Role of Mediating Factors	44

3.3	Synopsis of Broad Factors Affecting Land Change	45
3.3.1	Biophysical Factors	45
3.3.2	Economic and Technological Factors	47
3.3.3	Demographic Factors	53
3.3.4	Institutional Factors	57
3.3.5	Cultural Factors	60
3.4	Causation Revisited	62
3.4.1	Factor Interaction and Conjunctural Causation	62
3.4.2	Feedbacks, Thresholds, Endogeneity, and Co-Evolution	64
3.4.3	Globalization	64
3.5	Syndromes, Pathways, and Transitions	65
3.5.1	Syndromes of Land Change	65
3.5.2	Typical Pathways of Land-Use/Cover Change	67
3.5.3	Land-Use Transitions	68
3.6	Conclusions	69
4	Multiple Impacts of Land-Use/Cover Change	71
	<i>Lead authors: A. Chhabra · H. Geist</i>	
4.1	Introduction	71
4.2	Provision and Lack of Food, Feed, Fiber, and Timber	72
4.2.1	Overview	72
4.2.2	Variations in Land Productivity	74
4.2.3	Food Insecurity and Poverty	74
4.2.4	Worsening Conditions for Food and Fiber Production?	75
4.3	Disease Risk and Human Health	77
4.3.1	Overview	77
4.3.2	Spread of Vector-Borne Infectious Diseases	78
4.3.3	Biocide Usage and Land-Use Intensification	81
4.3.4	Health Concerns from Indirect Land-Use Effects	81
4.4	Atmospheric Chemistry, Climate Regulation, and Life Support Functions	82
4.4.1	Overview	82
4.4.2	Micro- and Meso-Level Impacts	83
4.4.3	Macro- or Global-Scale Impacts	83
4.4.4	Land Use and Greenhouse Gas Forcing	84
4.4.5	Feedbacks, Surprises and Unresolved Issues	86
4.5	Agrodiversity and Biodiversity Loss	89
4.5.1	Overview	89
4.5.2	Conservation and Loss of Biodiversity	90
4.5.3	Habitat Destruction, Degradation and Fragmentation	91
4.5.4	Pollination Losses and Other Impacts	95
4.6	Soil Quality and Land-Use/Cover Change	96
4.6.1	Overview	96
4.6.2	Extent of Human-Induced Degradation	98
4.6.3	Impacts of Soil Degradation	102
4.6.4	Preventing Soil Degradation, Improving Soil Quality	103
4.7	Freshwater Hydrology, Agricultural Water Use, and Coastal Zones	104
4.7.1	Overview	104
4.7.2	Hydrological Consequences of Land-Use/Cover Change	105
4.7.3	Land-Ocean Interactions in the Coastal Zone	111
4.8	Conclusions	113
5	Modeling Land-Use and Land-Cover Change	117
	<i>Lead authors: P.H. Verburg · K. Kok · R.G. Pontius Jr. · A. Veldkamp</i>	
5.1	Introduction	117
5.2	The Role of Models in Land-Use/Cover Change Research	117

5.3	The Diversity of Modeling Approaches	118
5.3.1	Spatial Versus Non-Spatial	118
5.3.2	Dynamic Versus Static	119
5.3.3	Descriptive Versus Prescriptive	119
5.3.4	Deductive Versus Inductive	120
5.3.5	Agent-Based Versus Pixel-Based Representations	120
5.3.6	Global Versus Regional Models	121
5.3.7	What's the Best Model?	122
5.4	Spatial and Temporal Dimensions of Land-Use/Cover Change Modeling ...	123
5.4.1	Spatial Scales and Level of Analysis	123
5.4.2	Spatial Autocorrelation and Spatial Interaction	126
5.4.3	Temporal Dynamics: Trajectories of Change and Feedbacks	128
5.5	Calibration and Validation of Land-Use/Cover Change Models	130
5.6	Conclusions	131
6	Searching for the Future of Land: Scenarios from the Local to Global Scale	137
	<i>Lead authors: J. Alcamo · K. Kok · G. Busch · J.A. Priess</i>	
6.1	Introduction	137
6.2	Scenario Analysis: a Method for Anticipating the Future of Land	137
6.2.1	Qualitative Scenarios	137
6.2.2	Quantitative Scenarios	138
6.3	Global and Continental Scenarios	138
6.3.1	Methodological Issues	138
6.3.2	Global Scenario Results	139
6.3.3	African Scenario Results	141
6.3.4	European Scenario Results	143
6.4	Regional and Local Scenarios	145
6.4.1	Methodological Issues	145
6.4.2	Results from Regional and Local Scenarios	146
6.4.3	Results from Urban Scenarios	147
6.4.4	Results from Multi-Scale Scenarios	147
6.5	Main Findings of Scenarios	150
6.5.1	Changes in Extent of Urban Land	151
6.5.2	Changes in Extent of Agricultural Land	151
6.5.3	Changes in Extent of Forest Land	151
6.5.4	Consequences for the Earth System	152
6.6	Towards Better Land Scenarios	152
6.6.1	Expand the Scope of Scenarios	152
6.6.2	Use Participatory Approaches to Scenario Development	153
6.6.3	Improve the Transparency and Documentation of Scenarios	154
6.6.4	Build Interactive Scenarios	154
6.6.5	Broaden the Realm of Application of Global Scenarios	154
6.6.6	Develop Multi-Scale Scenarios	155
6.6.7	Improve the Representation of Socio-Economic Behavior in Scenarios	155
6.7	Conclusions	155
7	Linking Land-Change Science and Policy: Current Lessons and Future Integration	157
	<i>Lead authors: R. S. Reid · T.P. Tomich · J.C. Xu · H. Geist · A.S. Mather</i>	
7.1	Introduction	157
7.2	Key Public Policy Lessons from Land-Change Science	158
7.3	Influence of Land-Change Science on Policy: Some Successes and Failures ..	165
7.4	How Can Land-Change Science Be More Useful in the Policy Process?	168
7.5	Conclusions	170

8 Conclusion	173
<i>Scientific Steering Committee of the Land-Use/Cover Change (LUCC) Project</i>	
8.1 Main Findings on Land-Change Science	173
8.2 Frontier in Land-Use/Cover Change Research	175
