CONTENTS

Preface vii

1 Brownian Motion 1

1.1 *Random Walk* 1

1.2 *Polymer as a Simple Random Walk* 4

1.3 *Direct Calculation of* $p(\vec{R})$ 5

1.4 *The Langevin Approach* 8

1.5 *Correlation Functions* 12

1.6 *Barrier Crossing* 16

1.7 *What is Equilibrium?* 22

2 Statics of DNA Deformations 25

2.1 *Introduction* 25

2.2 *DNA Melting* 29

2.3 *Zipper Model* 34

2.4 *Experimental Melting Curves* 36

2.5 *Base Pairing and Base Stacking as Separate Degrees of Freedom* 42

2.6 *Hamiltonian Formulation of the Zipper Model* 46

2.7 *2 × 2 Model: Cooperativity from Local Rules* 47

2.8 *Nearest Neighbor Model* 52

2.9 *Connection to Nonlinear Dynamics* 55

2.10 *Linear and Nonlinear Elasticity of DNA* 56

2.11 *Bending Modulus and Persistence Length* 56

2.12 *Measurements of DNA Elasticity: Long Molecules* 60

2.13 *Measurements of DNA Elasticity: Short Molecules* 65

2.14 *The Euler Instability* 68

2.15 *The DNA Yield Transition* 72

3 Kinematics of Enzyme Action 81

3.1 *Introduction* 81

3.2 *Michaelis–Menten Kinetics* 82

3.3 *The Method of the DNA Springs* 89

3.4 *Force and Elastic Energy in the Enzyme—DNA Chimeras* 97

3.5 *Injection of Elastic Energy vs. Activity Modulation* 106

3.6 *Connection to Nonlinear Dynamics: Two Coupled Nonlinear Springs* 116

4 Dynamics of Enzyme Action 122

4.1 *Introduction* 122

4.2 *Enzymes are Viscoelastic* 125

4.3 *Nonlinearity of the Enzyme's Mechanics* 125

4.4 *Timescales* 128

4.5 *Enzymatic Cycle and Viscoelasticity: Motors* 129

4.6 *Internal Dissipation* 137

4.7 *Origin of the Restoring Force g* 138

4.8 *Models Based on Chemical Kinetics (Fisher and Kolomeisky, 1999)* 139

4.9 *Different Levels of Microscopic Description* 143

4.10 *Connection to Information Flow* 147

4.11 *Normal Mode Analysis* 149

4.12 *Many States of the Folded Protein: Spectroscopy* 153

4.13 *Interesting Topics in Nonequilibrium Thermodynamics Relating to Enzyme Dynamics* 158

Bibliography 165

Chapter 1: Brownian Motion 165

Chapter 2: Statics of DNA Deformations 165

Chapter 3: Kinematics of Enzyme Action 167

Chapter 4: Dynamics of Enzyme Action 169

Index 173
