KEYNOTE LECTURES

J. Šklíba <i>The research of vibroisolation at the technical university in Liberec</i>	2	#182
R. Zavadil, M. Formánek, V. Minář, M. Prokeš <i>ŽDAS, a. s. Company in Czech and world industry</i>	6	#306

PAPERS

P. Antoš <i>Assessment of the sensor temperature in HWA</i>	10	#251
P. Bača, P. Křivák <i>Optimalization of current tabs lay – out of electrodes in a cylindrical type VRLA cells</i>	12	#149
P. Bach <i>Optimal modal properties of milling spindles</i>	14	#195
I. Ballo <i>The necessary power for the operation of semiactive vibration control systems.</i>	16	#103
J. Barbora, J. Mevald <i>Energy-based evaluation method of dissipative properties of a biomechanical system</i>	18	#181
P. Bareš, Z. Knésl <i>Crack tip opening displacement determination for a crack terminating at the bimaterial interface</i>	20	#174
Z. Bayer <i>The development of the new type of simple, middle accurate approximations of caloric functions of state of wet steam</i>	22	#216
K. Bezpalcová, F. Harms, B. Leitl, Z. Jaňour <i>Flow within idealised urban canopy</i> ..	24	#217
T. Blejchař, M. Kozubková <i>Identification of sound sources in hydraulic valve</i>	26	#276
J. Blekta, J. Mevald <i>The multibody simulation of dynamic effects in passenger car trailer</i>	28	#111
J. Bořkovec, J. Petruška <i>EWK rupture model in the numerical simulation of the bolt head trimming</i>	30	#224
P. Brož <i>Prediction models for fatigue damage accumulation</i>	32	#107
A. Bubák <i>The computational modeling of the flying shears drive</i>	34	#248
Cs. Budinszky, Z. Florian <i>Mechanical properties of total knee replacement</i>	36	#155
M. Byrtus, V. Zeman <i>Modelling and dynamical analysis of gear drives vibration considering the influence of nonlinear couplings</i>	38	#281
D. Cirkl <i>Rheologic model of mechanical properties of polyurethane foam</i>	40	#113
J. Čečrdle <i>Whirl flutter analysis of the commuter aircraft aeroelastic model wing – engine component</i>	42	#119
V. Čech, J. Jevický <i>The experimental apparatus for measurement of characteristics of man-operator of special man-machine system</i>	44	#170

J. Čulík <i>Power grip of hand</i>	46	#237
V. Drobny <i>Mathematical model of the truck shoe brake</i>	48	#283
D. Dušek, K. Pellant <i>Influence of position of middle ear prosthesis on mechanics of hearing</i>	50	#156
R. Ďuriš <i>A nonlinear bar element with varying stiffness</i>	52	#225
I. Eisner, M. Lizoň, R. Melicher, M. Žmindák <i>The application of interactive computational system (ICS FEM) in engineering</i>	54	#227
Z. Fiala <i>Stress rate and incremental principle of virtual work in finite deformations</i> ..	56	#243
P. Filip, J. David, R. Pivokonský <i>Flow behaviour of Vočadlo-type fluids during back extrusion</i>	58	#139
O. Fischer <i>Compliance criteria to be proved by the analysis of a civil engineering structure</i>	60	#194
J. Frankl, M. Kloiber, J. Bryscejn <i>Non-destructive inspection of a historical wooden structure damaged by fire</i>	62	#140
L. Franta, Z. Jeníková, J. Pražák, J. Suchánek <i>UHMWPE failure in knee joint components</i>	64	#201
P. Frantík <i>Creation of the stable elastic loop</i>	66	#122
M. Frantová, O. Lojkásek <i>Model of concrete at the early ages</i>	68	#285
K. Frydrýšek, L. Václavek <i>Solution of the beams on elastic foundation (deterministic and probabilistic approach)</i>	70	#311
K. Frydrýšek, R. Fajkoš, J. Rojíček <i>Proposal calculations of a new machine for fatigue testing of railway axles</i>	72	#334
L. Frýba, C. Fischer <i>Dynamics of a beam coupled with a prestressed string</i>	74	#198
V. Fuis, P. Hlavoň, T. Návrát <i>Calculation of the ceramics material parameters from the testing destructions of the heads</i>	76	#268
J. Fuxa, R. Kubala, F. Fojtík <i>Strain gage used for stress and strain state of the torsion test quantification</i>	78	#134
R. Grepl, J. Hrabec, P. Honzík, F. Šolc <i>Dynamic model of differentially driven soccer robot</i>	80	#309
R. Grepl, R. Vlach, P. Krejčí <i>An effective approach to design of interactive mechatronic system</i>	82	#332
Z. Hadaš, V. Singule, Č. Ondrušek <i>Tuning up parameters of vibration generator</i>	84	#257
M. Hajžman, P. Polach <i>Multibody analysis of the control assembly drop in the VVER 440/213 nuclear reactor</i>	86	#190
L. M. Hlaváč, J. Kaličinský, V. Mádr <i>Testing of frequencies generated in water by submerged high-energy liquid jet</i>	88	#277

I. M. Hlaváčová, L. M. Hlaváč <i>Experimental verification of velocity modulation by strong electromagnetic field</i>	90	#278
T. Holkup, S. Holý <i>Prediction of thermally induced preload in high-speed bearing systems</i>	92	#196
R. Hollý, P. Hrušovská <i>Effect of the needle diameter on its fatigue failure resistance</i> .	94	#253
V. Horák, B. Hoření <i>Wing airfoil rime ice accretion prediction</i>	96	#313
V. Horák, D. Rozehnal <i>Determination of the small heat exchangers leak</i>	98	#336
T. Hornych, J. Smolík, J. Švéda, M. Valášek <i>Potential of adaptive state control for actuator regulation of machine tool motion axis</i>	100	#121
L. Horný, T. Adámek <i>Stress distribution in human artery based on several types of SEDF</i>	102	#294
M. Hortel, A. Škuderová <i>Influence of linear and nonlinear damping on the stability of motion of kinematic pairs of gears</i>	104	#215
J. Hostýnek, J. Král <i>Influence orography on design wind speeds in the Czech Republic</i>	106	#206
J. Hošek <i>Monolens system for bubble dimension and position measurement</i>	108	#325
J. Hošek, K. Studenovský <i>Optical set-up for small volume of liquid surface tension measurement</i>	110	#348
P. Houška, T. Marada, V. Ondroušek, V. Singule <i>Possibilities of improvement accuracy of the attitude sensor for walking robot</i>	112	#258
J. Hrubý, M. Müller, K. Richtr, R. Mareš <i>Transient temperature field in the chamber for measurement of surface tension of supercooled liquids</i>	114	#290
Z. Hrubý, J. Papuga, M. Růžička, M. Balda, J. Svoboda <i>Prediction and verification of the lifetime for the various combined tensile and torsion load</i>	116	#138
V. Hrůza <i>Modeling of vocal folds function using FEM II</i>	118	#157
I. Monzón Hualde, P. Štemberk, O. Lojkásek <i>Description of material properties of hardening concrete inside deck of composite bridge</i>	120	#293
D. Hudeček, Z. Florian <i>Stress – strain analysis of an aging motion segment of the ligamentous spine under physiologic compression</i>	122	#228
M. Chalupa, J. Veverka, R. Vlach <i>Dynamic loading simulation of vehicle track</i>	124	#110
Z. Chára, B. Hoření <i>Local resistance of surface mounted obstacles</i>	126	#212
H. Chlup, F. Maršík, S. Konvičková <i>Self-excited oscillation of the thin-walled elastic tubes</i>	128	#326
H. Chlup, H. Macková, R. Žitný, S. Konvičková <i>Experimental measurement pulse wave velocity in elastic tube</i>	130	#349
P. Janas, M. Krejsa, V. Krejsa <i>Contemporary capability of direct determined probabilistic calculation</i>	132	#274

T. Janda, M. Šejnoha <i>Impact of the shape of the yield surface on the behavior of clayey soils</i>	134	#213
R. Jandora, J. Petruška, P. Janíček <i>Effect of periodic wheel and rail unevenness on behavior of wheel-rail system</i>	136	#158
L. Jirková, Z. Horák, R. Sedláček, P. Tichý, J. Michalec <i>Experimental measurements of the lumbar spine kinematics</i>	138	#204
O. Jiroušek, J. Jíra <i>Head injury criteria assessment through finite element modelling</i>	140	#298
F. Jirouš <i>Thermal cycle with extraction of steam for predrying of fuel</i>	142	#246
M. Jirsák, J. Král, D. Zchoval <i>BLWT approach a wind expose as measured on topography</i>	144	#222
A. Jíra, M. Petrtýl <i>Influence of biophysical interface on stability of implant stem</i>	146	#202
P. Jonáš, O. Mazur, V. Uruba <i>Control by blowing of the separated flow in a channel with a stepwise expansion</i>	148	#209
J. Jurenka, M. Španiel <i>Software development for simulation of general fatigue crack propagation. Pitting prediction application</i>	150	#245
Z. Kalousek, M. Vyšanská <i>The ropes bear more</i>	152	#269
J. Kašpárek, M. Škopán <i>Regulation of vibrating roller parameters in process of compacting cohesive and noncohesive soils</i>	154	#152
Z. Keršner, L. Náhlík, Z. Knésl <i>Influence of interfacial transition zone of cement paste-aggregate on crack propagation: finite element modelling</i>	156	#150
A. Kharlamov <i>2D numerical model of channel bed formed of randomly distributed spherical particles</i>	158	#207
J. Klusák <i>Estimation of generalized stress intensity factors by means of mean value of strain energy density factor</i>	160	#176
H. Konečná, I. Sedlák, J. Veselý <i>Determination of selected properties of nitridated steel samples by experiment and calculation</i>	162	#172
P. Konečný, P. J. Tikalsky, D. G. Tepke <i>Performance assessment of concrete bridge deck applying SBRA approach and fem model with regard to chloride ingress</i>	164	#185
L. Kopecký, P. Kabele, L. Novák <i>Engineered cementitious composites (ECC) manufacturing end verification</i>	166	#236
J. Korbel, Z. Knésl <i>Estimation of generalized stress intensity factor values for structures with thin protective coatings</i>	168	#320
P. Koudelka <i>Similarity of shallow foundations according to ČSN 73 1001</i>	170	#355
T. Koudelka, T. Krejčí <i>Analysis of foundation slab of commercial building in Prague Těšnov: Mechanical behavior</i>	172	#137
J. Koukalová, Z. Horák, P. Tichý <i>Experimental measurement of the characteristics of silicone MED 4550 for FEM simulation</i>	174	#136

C. Kratochvíl, L. Houfek, M. Houfek <i>Analysis of dynamic properties of multimotor driving systems</i>	176	#141
R. Král, S. Pospíšil, J. Náprstek <i>Numerical analysis of interaction of a moving body and streaming medium with high Re number</i>	178	#129
P. Krček, J. Dvořák <i>Mobile robot path planning by means of case-based reasoning and rapidly-exploring random trees</i>	180	#112
P. Krejčí, R. Vlach, R. Grepl <i>Contact sensor for robotic applications — verification of functionality</i>	182	#337
T. Krejčí, T. Koudelka <i>Analysis of foundation slab of administration building Praha Těšnov: Heat and moisture transfer</i>	184	#286
J. Krejsa, S. Věchet <i>Improving rapidly exploring random trees method using two trees</i>	186	#177
J. Kruis, P. Štemberk <i>Parallelization of fuzzy problems</i>	188	#235
A. Kruisová, J. Plešek <i>Application of the logarithmic strain in acoustoelasticity</i>	190	#250
J. Kryštůfek, T. Vampola, J. Horáček <i>Experimental investigation of acoustics of a simplified physical vocal tract model for phonation of vowel /a/ by LF pulse excitation</i> ..	192	#145
J. Křen, L. Hynčík, K. Koudela <i>Model of total knee replacement</i>	194	#282
P. Křivák, P. Bača <i>Simulation of the current distribution through the electrode system in a cylindrical type VRLA cells</i>	196	#128
V. Křivý, P. Marek <i>Stability assessment of steel frames using SBRA method</i>	198	#186
M. Kubíček, Z. Florian <i>Application of the reverse engineering in the sphere of biomechanics</i>	200	#159
A. Kučerová, D. Brancherie, A. Ibrahimbegović <i>Identification of damage model with cracks from results of tensile test and three point bending test</i>	202	#287
A. Kučerová, M. Lepš, J. Zeman <i>Inverse analysis using soft-computing methods: a review</i>	204	#203
P. Kundrát <i>Mathematical modeling via delay differential equations</i>	206	#359
J. Kunecký, O. Jiroušek, J. Jírová <i>Drop tests used for validation of FE models of human head for HIC assessment</i>	208	#299
L. Kupka, J. Šklíba, B. Janeček, M. Apetaur, J. Kozderka <i>Experimental research of the active vibration isolation system of the driver seat</i>	210	#183
D. Kytýř, M. Micka, J. Jírová, J. Jíra <i>Influence of the hip joint shape to stress field after hemiarthroplasty</i>	212	#300
B. Lacko <i>Making use of ball elements in multi-direction undercarriages of mobile robot</i>	214	#104
R. Lebiš, J. Burša <i>Computational modeling of mechanical behaviour of cell</i>	216	#259
J. Lenert <i>The probability method SBRA used in field of stress relaxation by creep</i>	218	#187

P. Macura, A. Fiala <i>The analysis of rolling forces and moments at weldless tube rolling</i>	220	#144
D. Makovička, D. Makovička <i>Limit response of masonry plate structure under explosion effect</i>	222	#242
J. Maláček <i>Orientation of stress tensors in transformed matters</i>	224	#160
T. Marada, P. Houška, T. Paseka <i>Small autonomous robot for practical verifying of artificial intelligence methods</i>	226	#161
P. Marek, M. Vlk <i>Probabilistic assessment of the fatigue life of tubular steel supports of Žďákov bridge</i>	228	#218
P. Markov, V. Valenta <i>Research reactor IRT-2000 in Sofia reconstruction- design and seismic computation</i>	230	#189
B. Marvalová, V. Klouček <i>Modelling of the rate-dependent behaviour of filled rubbers</i>	232	#331
B. Marvalová, J. Růžička <i>Viscoelastic behaviour of composites with rubber matrix reinforced by textile cords</i>	234	#354
I. Matoušek <i>Technological problems prediction of glass forming in pre-manufacture stage</i>	236	#270
J. Maxa, V. Neděla <i>Experience with the establishment of teaching solidworks.</i>	238	#131
J. Menčík, L. Beneš <i>Analysis of temperatures in the surface layer of a solid in short-term heating followed by cooling</i>	240	#323
J. Menčík <i>Failure rate, bathtub curve and reliability of components and systems</i>	242	#346
M. Micka, J. Minster, P. Václavík <i>Compression test of a timber core – ANSYS model and moiré interferometry experiment</i>	244	#219
V. Mík, L. Mihálka, J. Kořenář, J. Myška <i>Comparison of heat transfer in a straight and helical tube and influence of preset singularities on heat transfer in a straight tube at the flow of surfactant solutions</i>	246	#208
Š. Morávka <i>Oblique inclined surface voids of thick-walled concrete structures of nuclear power plants — numerical simulation of impact-echo diagnostic method.</i>	248	#279
J. Mudrik <i>Analysis of the transient processes in machine aggregates with gear</i>	250	#303
M. Nad' <i>Modification of dynamic properties of circular plate using constraining layers</i>	252	#304
L. Náhlík, P. Hutař <i>The influence of specimen geometry on plasticity induced crack closure</i>	254	#319
T. Nánási <i>Automatic generation of variational statement</i>	256	#305
J. Náprstek, S. Pospíšil <i>Along wind random vibrations of a slender structure — modelling by continuous elements</i>	258	#310
J. Náprstek, S. Pospíšil <i>Along wind random vibrations of a slender structure — modelling by concentrated masses</i>	260	#333

J. Němeček, P. Kabele, P. Jůn <i>Effect of creep in evaluation of nanoindentation of cement pastes</i>	262	#200
V. Nováček, R. Cimrman, J. Rosenberg <i>Elastic cylinder with microstructure</i>	264	#135
J. Novák, M. Vokáč <i>Experimental assessment of masonry material characteristics</i> ...	266	#357
L. Novotný, J. Marek <i>Issues at tool clamping systems</i>	268	#171
V. Obdržálek, J. Klement, J. Vrbka <i>Post-impact compressive load carrying capacity of fibre-metal laminate plates</i>	270	#162
V. Ondroušek, T. Březina <i>The automatic generation of walking policies for a four-legged robot in a non-deterministic space</i>	272	#329
Z. Orság, P. Pernes <i>PLC - Power line communication</i>	274	#163
M. Pásek, M. Bébarová, P. Matejovič, J. Šimurda <i>A model of I_{Kto}-channel function in rat ventricular cardiomyocytes</i>	276	#233
L. Pečínka <i>Comparison of nuclear and conventional seismic standards</i>	278	#179
P. Pejchal, J. Petruška <i>The material model of railway wheel for numerical simulations of cyclic deformation</i>	280	#123
L. Pešek, F. Vaněk, J. Veselý, J. Cibulka, T. Boháč <i>Contribution to experimental research of vibro-acoustics of railway wheels with add-on dampers</i>	282	#214
S. Piatsevich, N. Lukerchenko, Z. Chára, P. Vlasák <i>Calculation of the saltation characteristics as functions of the initial parameters</i>	284	#210
M. Pirner, S. Urushadze <i>Application of passive damper for suppressing footbridge motions</i>	286	#229
M. Pohanka <i>Estimation of discretization error in time and space domain of numerical heat conduction</i>	288	#164
K. Pohl <i>Non-linear analysis of reinforced concrete frame structures and assignment its response to seismic load</i>	290	#125
P. Polach, M. Hajžman <i>Utilization of multibody modelling for design of characteristics of air pressure controlled hydraulic shock absorbers in the SOR intercity bus</i>	292	#191
L. Popelka, M. Matějka <i>Optimization procedure for sailplane wing sections</i>	294	#146
P. Porteš <i>Longitudinal dynamics of race cars</i>	296	#105
S. Pospíšil, J. Lahodný, V. Janata, S. Urushadze <i>Life-time prediction of slender structures subjected to turbulent wind</i>	298	#101
P. Praks, J. Brožovský <i>Fast iterative solvers for the efficient probabilistic reliability assessment of special mechanical systems by the SBRA method</i>	300	#127
F. Pražák, I. Mazůrek <i>Simulation model of car wheel suspension</i>	302	#307
T. Profant, M. Kotoul, O. Ševeček <i>Stress field analysis near the semi-infinite crack tip terminating perpendicular to the interface between two orthotropic materials</i>	304	#261

P.P. Procházka, M.J. Válek, A.E. Yiakoumi <i>Simulation of freezing of rock during tunneling</i>	306	#324
P.P. Procházka, M.J. Válek, Š. Pešková <i>Development of stresses in fiber reinforced structures</i>	308	#347
J. Pulchart, M. Turek <i>Hardware implementation of active magnetic bearing control</i> .	310	#166
V. Radolf, T. Vampola, J. Horáček <i>1D model of the human vocal and nasal tract</i>	312	#273
Z. Ramík, D. Lehký, S. Vejvoda, D. Novák <i>Inverse analysis of loading of the walking undercarriage frame of giant machine ZP 10000</i>	314	#265
E. Rohan, R. Cimrman <i>Shape sensitivity analysis for flow optimization in closed channels</i>	316	#192
J. Rosenberg, L. Hynčák <i>Viscoelasticity and growth theory</i>	318	#106
D. Rozehnal <i>Experimental system for the small aircraft propeller testing</i>	320	#173
D. Rypl <i>Evaluation of geometrical properties of aggregate particles</i>	322	#291
I. Sedlák, H. Konečná <i>Validation and optimization of ISO container for dynamic load at transport</i>	324	#143
M. Schuster <i>Contribution to the simulations of flow during driver's cabin ventilation</i> .	326	#280
V. Singule, Z. Hadaš, Č. Ondrůšek <i>Analysis of vibration power generator</i>	328	#262
M. Sivčák, J. Šklíba <i>The dependence of the vibroisolation effect of the system with three degrees of freedom on the description applied dampers</i>	330	#244
J. Sobotka <i>On applications of generalized functions to calculations of beam design elements</i>	332	#232
P. Souček, A. Bubák <i>Using the residue theorem for computing of dynamic system response at impulse excitation</i>	334	#197
A. Suchánková, B. Kysela, Z. Chára, P. Dítl <i>Effect of ultrasound pulsations on suspension sedimentation</i>	336	#205
J. Svoboda, M. Balda, V. Fröhlich <i>Fatigue strength and life of real structures under combined random loading</i>	338	#115
L. Svoboda, D. Rypl <i>Three-dimensional analysis of RC beams</i>	340	#254
R. Svoboda, J. Šklíba <i>Model of hydraulic damper with both air and oil vapour caves</i>	342	#247
J. Sýkora, J. Vorel, M. Šejnoha <i>Numerical modeling of quarry-masonry with application to the Charles Bridge</i>	344	#180
H. Šeděnková, Z. Jaňour, B. Leitl <i>Pollutant diffusion in the idealized build-up area</i> .	346	#297
L. Šestáková, Z. Majer, L. Náhlík, Z. Knésl <i>Numerical analysis of a surface crack in protective layers</i>	348	#343

O. Ševeček, M. Kotoul, T. Profant <i>A construction of the fundamental solution for the dislocation in the anisotropic bi-material body by force of the finite element method</i>	350	#124
O. Šimek, V. Oliva, A. Materna <i>Influence of specimen thickness on elastic-plastic deformation mechanics ahead of the fatigue crack front</i>	352	#267
V. Šmilauer, J. Litoš <i>Simulation of autogenous shrinkage of young cement pastes</i>	354	#288
M. Španiel, C. Novotný, M. Růžička <i>Re-calibration of the methodology determining burst pressure of pipe with surface defect</i>	356	#249
M. Šperl, Ľ. Gajdoš <i>The effect of overloading of pipes on their fracture toughness in relation to the strength grade of steel</i>	358	#220
M. Štekl <i>Material characteristics of the biological materials like input values to the 3D FEM model of the physiological hip joint</i>	360	#317
M. Štekl <i>Influence of the head diameter of the THR on the value and distribution of the contact pressure inside the polyethylene cup of the THR</i>	362	#340
P. Štemberk, J. Kruis, Z. Bittnar <i>Fuzzy distribution of internal forces in seismically loaded frame structure</i>	364	#292
P. Švancara, J. Horáček <i>Computational modelling of effect of tonsillectomy on production of Czech vowels</i>	366	#263
K. Švaříček, M. Vlk <i>The residual stress determination by the hole drilling method by means of the influence function</i>	368	#330
K. Švaříček, M. Vlk <i>A development of the hole-drilling method with an off-center hole for the residual stress measurement</i>	370	#353
M. Švehlák, I. Křupka, M. Hartl <i>Influence of surface topography on lubricated contacts behaviour</i>	372	#167
J. Švéda, M. Sulitka, L. Novotný, Z. Šika, M. Valášek <i>Dynamic behaviour of experimental milling machine LM-2 z axis with active vibroabsorbtion design</i>	374	#295
J. Švígler, J. Vimmr <i>Contribution to modelling of wheel-rail contact</i>	376	#256
L. Tajč, L. Bednář, I. Šiková, L. A. Feldberg <i>The experimental investigation of the influence of the flow swirl and the tip clearance jet on aerodynamic characteristics of exhaust hoods</i>	378	#238
V. Tesař <i>Multi-lever flow branching</i>	380	#312
V. Tesař <i>Symmetry group analysis of suddenly accelerated flow past a flat plate</i>	382	#335
E. Tesker, S. Tesker, N. Yakovlev, E. Dovgalenko, S. Litvinov, V. Treshev <i>Increasing in loading capacity of highly loaded sliding bearings by surface modification of their friction surfaces</i>	384	#328
P. Tichý, Z. Horák, J. Koukalová, J. Michalec <i>Effect of laminectomy on stability of lumbar spine</i>	386	#289

A. Tondl <i>Effect of different alternatives of self-excitation and damping on the vibration quenching</i>	388	#199
Nam Thanh Tran, P. Štemberk, A. Kohoutková <i>Investigation of Poisson's ratio of early age concrete</i>	390	#175
M. Turek, T. Březina, J. Pulchart <i>Selflearning controller of active magnetic bearing</i>	392	#133
J. Tůma <i>Frequency spectrum estimation by autoregressive modeling</i>	394	#322
J. Tůma <i>Estimation of density function parameters with censored data from product life tests</i>	396	#345
J. Úradníček, M. Musil <i>An investigation of influence of the weighting constants to the optimal controlled active suspension</i>	398	#255
J. Valach, D. Vavřík, J. Bryscejn, J. Jakůbek <i>Optical measurement of surface displacements in the vicinity of crack tip</i>	400	#301
R. Valenta, J. Šejnoha, M. Šejnoha, T. Krejčí <i>Management of hydration heat evolution</i>	402	#358
D. Vališ <i>Mechatronics application influence and its estimation in military vehicles</i> ...	404	#142
T. Vampola, J. Horáček <i>Influence of velopharyngeal insufficiency on phonation of Czech vowels</i>	406	#108
D. Vavřík, J. Bryscejn, J. Jakůbek, M. Jakůbek, T. Holý, J. Valach, Z. Vykydal <i>Simultaneous radiographic observation of damaging and optical measurement of 3D surface displacement evolution in loaded specimen</i>	408	#296
L. Václavek, P. Marek, Ľ. Gajdoš <i>Probabilistic evaluation of unstable crack propagation in pipeline using SBRA method</i>	410	#275
M. Vejpustková, M. Vilímek, M. Sochor <i>Influence of the input muscle parameters to the resulting muscle forces</i>	412	#284
S. Veselý <i>Solution of temperature and stress fields for combustor flame tube</i>	414	#148
V. Veselý, Z. Keršner, L. Řoutil <i>Influence of constraint on determination of concrete fracture energy</i>	416	#153
S. Věchet, J. Krejsa <i>Fast solution of the mobile robot localization problem</i>	418	#168
