Preface / xi

Part I • Overview of the Guide

1 • INTRODUCTION TO THIS GUIDE / 3

- Molt in the Life Cycle / 4
- Understanding Molt and Aging Terminology / 5
- Variation in Molt Extent / 7
- Cycle Code System for Aging Birds / 9
- Tips for Aging Birds in the Central Amazon and Beyond / 13
 - Species with Complete Preformative Molts / 14
 - Species with Limited, Partial, or Incomplete Preformative Molts / 14
 - Unusual Molting Strategies / 15
- Study Site: Biological Dynamics of Forest Fragments Project / 15
 - Background / 15
 - Climate and Habitat / 16
- Literature Cited / 16

2 • HOW TO USE THIS GUIDE / 21

- Family Account / 21
- Species Accounts / 21
- Band Size / 22
- # Individuals Captured / 22
- Similar Species / 22
- Measurements / 22

Skull / 22

Brood Patch / 23

Molt / 23

Age/Sex / 23

Notes / 24

Graphs of Molt and Breeding

Frequency / 24

Abbreviations / 24

Literature Cited / 25

Part II • Non-passerine Land Birds

3 • TINAMIDAE (TINAMOUS) / 29

- Species Accounts / 30
- Literature Cited / 32

4 • ODONTOPHORIDAE (NEW WORLD QUAILS) / 35

- Species Account / 35
- Literature Cited / 36

5 • ACCIPITRIDAE (HAWKS, KITES, EAGLES, AND ALLIES) / 37

- Species Accounts / 38
- Literature Cited / 42

6 • PSOPHIIDAE (TRUMPETERS) / 45

- Species Account / 46
- Literature Cited / 47

7 • COLUMBIDAE (PIGEONS AND DOVES) / 49

- Species Account / 50
- Literature Cited / 55

**8 • CUCULIDAE (CUCKOOS, ROADRUNNERS,
AND ANIS) / 57**

Species Account / 58

Literature Cited / 58

9 • STRIGIDAE (TYPICAL OWLS) / 59

Species Accounts / 60

Literature Cited / 62

10 • NYCTIBIIDAE (POTOOS) / 65

Species Accounts / 66

Literature Cited / 68

**11 • CAPRIMULGIDAE (NIGHTHAWKS
AND NIGHTJARS) / 69**

Species Accounts / 70

Literature Cited / 72

12 • TROCHILIDAE (HUMMINGBIRDS) / 75

Species Accounts / 76

Literature Cited / 88

13 • TROGONIDAE (TROGONS) / 91

Species Accounts / 92

Literature Cited / 98

14 • ALCEDINIDAE (KINGFISHERS) / 99

Species Accounts / 100

Literature Cited / 103

15 • MOMOTIDAE (MOTMOTS) / 105

Species Account / 105

Literature Cited / 107

16 • GALBULIDAE (JACAMARS) / 109

Species Accounts / 110

Literature Cited / 114

17 • BUCCONIDAE (PUFFBIRDS) / 115

Species Accounts / 116

Literature Cited / 126

18 • CAPITONIDAE (NEW WORLD BARBETS) / 127

Species Accounts / 128

Literature Cited / 129

19 • RAMPHASTIDAE (TOUCANS) / 131

Species Accounts / 132

Literature Cited / 134

**20 • PICIDAE (WOODPECKERS, PICULETS,
AND ALLIES) / 135**

Species Accounts / 136

Literature Cited / 142

21 • FALCONIDAE (FALCONS) / 143

Species Account / 144

Literature Cited / 150

Part III • Passerines, the Suboscines

22 • THAMNOPHILIDAE (ANTBIRDS) / 155

Species Accounts / 156

Literature Cited / 203

**23 • CONOPOPHAGIDAE (GNATEATERS
AND PITTASOMA ANTPITTAS) / 205**

Species Accounts / 205

Literature Cited / 207

24 • GRALLARIIDAE (ANTPITTAS) / 209

Species Accounts / 209

Literature Cited / 212

25 • FORMICARIIDAE (ANTTHRUSHES) / 213

Species Accounts / 213

Literature Cited / 218

**26 • FURNARIIDAE (OVENBIRDS,
LEAFTOSSERS, AND WOODCREEPERS) / 219**

Species Accounts / 220

Literature Cited / 253

**27 • TYRANNIDAE (TYRANT FLYCATCHERS
AND ALLIES) / 255**

Species Accounts / 255

Literature Cited / 288

28 • COTINGIDAE (COTINGAS AND ALLIES) / 291

Species Accounts / 292

Literature Cited / 295

29 • PIPRIDAE (MANAKINS) / 297

Species Accounts / 298

Literature Cited / 312

30 • TITYRIDAE (TITYRAS) / 315

Species Accounts / 315

Literature Cited / 321

Part IV • Passerines, the Oscines

31 • VIREONIDAE (VIREOS) / 325

Species Accounts / 326

Literature Cited / 330

32 • HIRUNDINIDAE (SWALLOWS) / 333

Species Account / 333

Literature Cited / 334

33 • TROGLODYTIDAE (WRENS) / 335

Species Accounts / 335

Literature Cited / 342

34 • POLIOPTILIDAE (GNATWRENS AND GNATCATCHERS) / 343

Species Accounts / 343
Literature Cited / 346

35 • TURDIDAE (THRUSHES) / 347

Species Accounts / 347
Literature Cited / 351

36 • THRAUPIDAE (TANAGERS) / 353

Species Accounts / 354
Literature Cited / 376

37 • EMBERIZIDAE (SPARROWS) / 379

Species Accounts / 379
Literature Cited / 382

38 • CARDINALIDAE (CARDINAL GROSBEAKS, PIRANGA TANAGERS, AND ALLIES) / 383

Species Accounts / 383
Literature Cited / 386

39 • PARULIDAE (WOOD-WARBLERS) / 389

Species Account / 390
Literature Cited / 391

AUTHORS

Index / 393

Complete Series List / 399

Erik L. Johnson, PhD, is Director of Bird Conservation for Audubon Louisiana and an adjunct Graduate Faculty Member at the School of Renewable Natural Resources, Louisiana State University. Johnson completed his dissertation work studying the effects of forest fragmentation on avian communities at the Biological Dynamics of Forest Fragments Project (BDFFP) in coordination with the Instituto Nacional de Pesquisas da Amazonia (INPA). Through that work, he developed and applied aging criteria to demonstrate how forest fragmentation alters demographic structure of bird populations and identified molt patterns in molt-breeding overlap across a range of Neotropical bird species and families. Johnson is currently working on avian conservation along the Gulf Coast of the United States. Johnson continues to work with students at the BDFFP and help teach an annual banding workshop offered by INPA. Johnson has more than 15 years of applied ornithological research experience in 5 countries resulting in over 25 scientific publications and much of his work is reflected in this volume. Many of these publications advance or utilize knowledge about aging

birds, including the advancement of an age classification system based on plumage and molt patterns that is applicable to birds worldwide.

Jared D. Wolfe, PhD, is Research Faculty in the Wildlife Department at Humboldt State University and a Wildlife Ecologist at the U.S. Department of Agriculture (USDA) Forest Service's Pacific Southwest Research Station. In addition to conducting extensive fieldwork in the Amazon, including his PhD at the Biological Dynamics of Forest Fragments Project (BDFFP), Wolfe has broadened his research interests to Central Africa where he regularly conducts fieldwork to better understand and conserve understudied bird communities in Equatorial Guinea. Recognizing the need for an improved method to classify bird age, Wolfe developed a transformative and universal system of age classification for tropical birds based on plumage and molt patterns; the system continually grows in popularity among tropical ornithologists. Wolfe has published numerous articles on bird molt, demography, and behavior, and continues to teach advanced banding courses throughout the Americas and Africa.
