

## **CHAPTER 1 INTRODUCTION**

- 1.1 Signal
- 1.2 Signal processing
- 1.3 Analog signal
- 1.4 Discrete time signal
- 1.5 Digital signal
- 1.6 Binary signal
- 1.7 Digital signal processing
  - 1.7.1 Sampling
    - 1.7.2 Quantization
    - 1.7.3 Encoding
- 1.8 What is digital image processing
- 1.9 Different steps in signal processing
  - 1.9.1 image acquisition
  - 1.9.2 Processing the image
  - 1.9.3 Get a processed image
- 1.10 Object of image processing
  - 1.10.1 Image Enhancement
  - 1.10.2 Image restoration
  - 1.10.3 Image segmentation
  - 1.10.4 Image Compression
- 1.11 Application of image processing

## **CHAPTER 2 POINT PROCESSING**

- 2.1 Types of Image
  - 2.1.1 Binary Image
  - 2.1.2 Gray Image

- 2.1.3 Color Image
- 2.2 Image Size
- 2.3 Point Processing
  - 2.3.1 Changing the brightness of an image
  - 2.3.2 Simple Matlab example of image processing
  - 2.3.3 Matlab program for changing the brightness of an image
  - 2.3.4 Matlab program for complement an image
- 2.4 Changing Contrast of an Image
- 2.5 Histogram
  - 2.5.1 Matlab programming for changing contrast by changing histogram
- 2.6 Bit plane

### **CHAPTER 3 NEIGHBOURHOOD PROCESSING**

- 3.1 Different frequency component's present in image
  - 3.1.1 Low Frequency Coefficients
  - 3.1.2 High Frequency Coefficients
- 3.2 Low pass filter
  - 3.2.1 Linear low pass filter
  - 3.2.2 Non linear low pass filter
    - (a) Median filters
    - (b) Rank order filters
    - (c) Minimum filter
    - (d) Maximum filter
- 3.3 High pass filter
- 3.4 Application of low pass filter
- 3.5 Application of high pass filter
- 3.6 Adding and removing different types of noise from an image
  - 3.6.1 Matlab program for adding Salt & Pepeer noise.
  - 3.6.2 Matlab program for adding gaussian noise.
  - 3.6.3 Matlab program for adding speckle noise.
- 3.7 Removing Noise
  - 3.7.1 Removing Salt & Pepeer noise
- 3.8 Matlab example of removing salt & pepper noise using median filter.
- 3.9 Matlab example of removing Gaussian noise using adaptive filters.

### **CHAPTER 4 IMAGE SEGMENTATION**

- 4.1 Introduction.

4.2 Image Thresholding.

4.3 Single thresholding method.

4.3.1 Some Matlab examples of single thresholding.

4.4 Double thresholding Method.

4.4.1 Matlab example of double threshold method using matlab.

4.5 Adaptive Threshold.

4.6 Application of thresholding.

4.7 Edge detection filters

4.8 Edge detection filters

4.9 Some matlab examples for edge detection using prewitt filter

4.9.1 Edge detection using Prewitt filter

4.9.2 Edge detection using Robert filter

4.9.3 Edge detection using Sobel filter

4.9.4 Edge detection using Log filter

## **CHAPTER 5 MATHEMATICAL MORPHOLOGY**

5.1 Introduction

5.2 To obtain internal boundaries of an object

5.3 To obtain external boundaries of an object
