

CONTENTS

Preface *viii*

1 INTRODUCTION TO DIAGNOSIS AND EVALUATION: PHILOSOPHICAL ISSUES AND GENERAL GUIDELINES	1
Diagnosis and Evaluation Defined	2
Broadening the Notion of Assessment	3
Illustrating the Importance of Measurement in Current Trends	4
The Importance of Functional Measurements: The World Health Organization, U.S. Department of Education, and ASHA	10
Diagnosis to Determine the Reality of the Problem	14
Diagnosis to Determine the Etiology of the Problem	16
Diagnosis to Provide Clinical Focus	18
Diagnosis: Science and Art	19
Diagnosis Versus Eligibility	20
The Diagnostician as a Factor	20
The Client–Clinician Relationship	23
The Client as a Factor: Children, Adolescents, and Adults	23
Putting the Diagnosis to Work	27
Precepts Regarding the Clinical Examination	31
2 INTERVIEWING	33
The Importance of Interviewing	33
The Nature of Interviewing	34
Common Interviewing Considerations	35
An Approach to Interviewing	36
Using Interviewing Skills Beyond the Diagnostic Evaluation	46
Improving Interviewing Skills	47
3 PSYCHOMETRIC CONSIDERATIONS IN DIAGNOSIS AND EVALUATION	50
Common Types of Tests	51
Validity: The Foundation of the Test or Measure	52
Reliability	53
Some Quantitative Background for Test Interpretation	57
Central Tendency, Variation, and the Normal Curve	57
Sensitivity and Specificity: Key Concepts in Evidence-Based Practice	64
Criteria for Evaluating Standardized Tests	66

Common Errors in the Use of Norm-Referenced Tests 69
Conclusion 72

4 ASSESSMENT OF CHILDREN WITH LIMITED LANGUAGE 74

The Process of Becoming a Communicator:
Getting the "Big Picture" 74
Focusing on the Child's Language Level: Nonverbal,
Single-Word, and Early Multiword Communicators 75
Considering Etiology 77
Why Is Early Language Assessment So Difficult? 77
Models to Consider in Language Assessment 79
Theoretical Considerations in Language Assessment 80
Assessment That Focuses on Early Communication
and Variables That Predict Language Growth 81
Specific Assessment Areas: Procedures, Considerations,
and Directions for Further Study 84
Concluding Remarks 114

5 ASSESSMENT OF SCHOOL-AGE AND ADOLESCENT LANGUAGE DISORDERS 115

Use of Standardized Tests with Syntax-Level Children 119
Nonstandardized Testing 120
Language Sampling: A General Look at the Process 121
Later Language Development: Emerging Data 125
Testing Language Comprehension 127
Assessment of Syntax Using Analysis Packages 130
Assessment of Conversational Pragmatics 137
Issues of Memory and Processing Load 144
Evaluating Literacy and School Curriculum 145
Conclusion 150

6 ASSESSMENT OF SPEECH SOUND DISORDERS 151

Multiple Components Contributing to Sound Production 152
Seven Important Knowledge Areas for Evaluation of Articulation
and Phonological Disorders 154
Overview of the Articulation/Phonology Assessment Process 160
Screening for Speech Sound Disorders 161
Traditional Assessment Procedures 161
Test Procedures That Evaluate Phonetic Context Effects 164
Assessment of Speech Sounds in Early Intervention 165

- The Phonetic and Phonemic Inventories 165
- Distinctive Feature Analysis 166
- Phonological Analysis 169
- Assessment of Phonological Knowledge 177
- Other Testing 178
- Integrating Data from the Assessment 181
- Severity and Intelligibility 183
- Computer-Assisted Analysis of Phonology 185
- Long-Term Impact of Phonological Disorders 186
- 7 DISORDERS OF FLUENCY 188**
 - Differential Diagnosis 189
 - The Appraisal of Stuttering 196
 - Evaluation at the Onset of Stuttering 207
 - Evaluation of the School-Aged Student 210
 - Assessment of the Adult Who Stutters 213
- 8 ASSESSMENT OF APHASIA AND ADULT LANGUAGE DISORDERS 215**
 - The Nature of Aphasia 215
 - Case History 219
 - Diagnosis and Formal Testing 221
 - The Art of Informal Assessment 232
 - Summing Up the Findings 234
- 9 MOTOR SPEECH DISORDERS, DYSPHAGIA, AND THE ORAL EXAM 238**
 - The Oral Peripheral Examination 238
 - Apraxia of Speech in Adults 242
 - Childhood Apraxia of Speech 247
 - The Adult Dysarthrias 251
 - Cerebral Palsies and Dysarthria in Children 254
 - Dysphagia 256
 - Summary 265
- 10 LARYNGEAL AND ALARYNGEAL VOICE DISORDERS 267**
 - The Nature of Vocal Disturbances 268
 - The Diagnostic Process 270
 - Perceptual, Acoustic, and Aerodynamic Assessment 277
 - Feature Assessment 280

Visual Assessment 288
Informal Assessment Probes 289
Conclusion to Vocal (Laryngeal) Disorders 292
Assessment of the Laryngectomee 293
The Counseling Process 295
Background and Current Status Information 297
Early Speech Attempts with a Tracheoesophageal Prosthesis 299
Ongoing Assessments: A Dynamic Process 303
Prognosis 305

11 ASSESSMENT OF RESONANCE IMBALANCE 307

Categories of Abnormal Resonance 307
Case History and General Voice Assessment 308
Assessment Techniques and Probes for Resonance Imbalance 309
Assessment Associated with Cleft Palate 316
Self-Esteem and Daily Impact 322
Prognosis Associated with Resonance Imbalance 323
Conclusion 324

12 MULTICULTURAL ISSUES IN ASSESSMENT 325

Population and Professional Trends 326
Cultural Differences in Perceptions of Disability
and Communication 328
Interviewing and Counseling Issues 329
Cultural Differences in Incidence
and Prevalence of Disorders 330
Language Assessment: The Most Problematic Area 334
Nonstandardized Approaches in Multicultural Assessment 343
Concluding Remarks 346

13 THE DIAGNOSTIC REPORT 347

Format 347
Confidentiality 355
Style 355
The Writing Process 356
Follow-Up 357
 Summary 357

Appendix A *Early Child Language Assessment Interview Protocol* 359
Appendix B *Coding Sheet for Early Multiword Analysis* 361

Appendix C *Summary Sheet for Early Multiword Analysis* 362
 Appendix D *Data Consolidation in Limited Language Evaluations* 363
 Appendix E *Diagnostic and Procedural Codes* 365

References 367
 Index 410

NEW TO THIS EDITION

We have made every effort to bring this edition of the book completely up to date. A summary of these changes and additions includes:

- Expanded coverage of working memory and language processing in older children with language disorders
- Expansion of sections dealing with early child language assessment and additional information on literacy assessment
- Expansion of clinical interviewing to include discussion of ethnographic interviewing and curriculum-based assessment
- Additional figures and tables to illustrate critical concepts
- Completely updated content in every chapter
