

# Table of Contents

<b>About the Authors</b> .....	<b>xi</b>
<b>About the Technical Reviewer</b> .....	<b>xiii</b>
<b>Acknowledgments</b> .....	<b>xv</b>
<b>Introduction</b> .....	<b>xvii</b>
<b>Chapter 1: Why Optimize?</b> .....	<b>1</b>
What Do We Mean by Optimization? .....	1
Why It Is Difficult: Imperative and Declarative .....	2
Optimization Goals .....	5
Optimizing Processes.....	7
Optimizing OLTP and OLAP .....	8
Database Design and Performance .....	8
Application Development and Performance .....	10
Other Stages of the Lifecycle .....	10
PostgreSQL Specifics.....	11
Summary.....	12
<b>Chapter 2: Theory: Yes, We Need It!</b> .....	<b>13</b>
Query Processing Overview .....	13
Compilation .....	13
Optimization and Execution.....	14
Relational, Logical, and Physical Operations.....	15
Relational Operations .....	15
Logical Operations.....	19

## TABLE OF CONTENTS

Queries as Expressions: Thinking in Sets .....	20
Operations and Algorithms .....	20
Summary.....	21
<b>Chapter 3: Even More Theory: Algorithms.....</b>	<b>23</b>
Algorithm Cost Models.....	23
Data Access Algorithms .....	24
Storage Structures .....	25
Full Scan.....	26
Index-Based Table Access .....	27
Index-Only Scan .....	28
Comparing Data Access Algorithms .....	28
Index Structures.....	31
What Is an Index? .....	31
B-Tree Indexes.....	33
Why Are B-Trees Used So Often?.....	35
Bitmaps .....	35
Other Kinds of Indexes .....	36
Combining Relations .....	37
Nested Loops.....	37
Hash-Based Algorithms.....	39
Sort-Merge Algorithm.....	41
Comparing Algorithms.....	42
Summary.....	42
<b>Chapter 4: Understanding Execution Plans .....</b>	<b>43</b>
Putting Everything Together: How an Optimizer Builds an Execution Plan .....	43
Reading Execution Plans.....	44
Understanding Execution Plans .....	49
What Is Going On During Optimization?.....	49
Why Are There So Many Execution Plans to Choose From? .....	50

How Are Execution Costs Calculated? .....	51
How Can the Optimizer Be Led Astray? .....	54
Summary.....	55
<b>Chapter 5: Short Queries and Indexes .....</b>	<b>57</b>
Which Queries Are Considered Short? .....	57
Choosing Selection Criteria.....	59
Index Selectivity .....	60
Unique Indexes and Constraints .....	61
Indexes and Non-equal Conditions .....	65
Indexes and Column Transformations .....	65
Indexes and the <i>like</i> Operator .....	70
Using Multiple Indexes.....	72
Compound Indexes.....	73
How Do Compound Indexes Work?.....	74
Lower Selectivity .....	76
Using Indexes for Data Retrieval .....	76
Covering Indexes .....	77
Excessive Selection Criteria.....	79
Partial Indexes .....	83
Indexes and Join Order .....	85
When Are Indexes Not Used .....	88
Avoiding Index Usage .....	89
Why Does PostgreSQL Ignore My Index?.....	89
Let PostgreSQL Do Its Job! .....	92
How to Build the Right Index(es)?.....	97
To Build or Not to Build .....	97
Which Indexes Are Needed? .....	98
Which Indexes Are Not Needed? .....	98
Indexes and Short Query Scalability .....	99
Summary.....	100

## TABLE OF CONTENTS

<b>Chapter 6: Long Queries and Full Scans</b> .....	<b>101</b>
Which Queries Are Considered Long? .....	101
Long Queries and Full Scans.....	103
Long Queries and Hash Joins.....	104
Long Queries and the Order of Joins.....	105
What Is a Semi-join? .....	105
Semi-joins and Join Order .....	107
More on Join Order .....	109
What Is an Anti-join? .....	112
Semi- and Anti-joins Using the JOIN Operator .....	113
When Is It Necessary to Specify Join Order?.....	116
Grouping: Filter First, Group Last .....	118
Grouping: Group First, Select Last.....	125
Using SET operations .....	128
Avoiding Multiple Scans.....	132
Conclusion .....	138
<b>Chapter 7: Long Queries: Additional Techniques</b> .....	<b>139</b>
Structuring Queries.....	139
Temporary Tables and CTEs .....	140
Temporary Tables .....	140
Common Table Expressions (CTEs).....	142
Views: To Use or Not to Use.....	147
Why Use Views? .....	154
Materialized Views .....	154
Creating and Using Materialized Views .....	154
Refreshing Materialized Views .....	156
Create a Materialized View or Not? .....	156
Do Materialized Views Need to Be Optimized?.....	158
Dependencies.....	159
Partitioning.....	160

Parallelism .....	165
Summary.....	166
<b>Chapter 8: Optimizing Data Modification.....</b>	<b>167</b>
What Is DML? .....	167
Two Ways to Optimize Data Modification .....	167
How Does DML Work?.....	168
Low-Level Input/Output.....	168
The Impact of Concurrency Control .....	169
Data Modification and Indexes.....	172
Mass Updates and Frequent Updates .....	173
Referential Integrity and Triggers.....	174
Summary.....	175
<b>Chapter 9: Design Matters .....</b>	<b>177</b>
Design Matters.....	177
Why Use a Relational Model?.....	181
Types of Databases.....	182
Entity-Attribute-Value Model .....	182
Key-Value Model.....	183
Hierarchical Model.....	184
Combining the Best of Different Worlds .....	185
Flexibility vs. Efficiency and Correctness.....	185
Must We Normalize? .....	187
Use and Misuse of Surrogate Keys .....	189
Summary.....	195
<b>Chapter 10: Application Development and Performance.....</b>	<b>197</b>
Response Time Matters .....	197
World Wide Wait .....	198
Performance Metrics .....	199
Impedance Mismatch.....	200

## TABLE OF CONTENTS

The Road Paved with Good Intentions .....	200
Application Development Patterns .....	201
“Shopping List Problem” .....	203
Interfaces .....	205
Welcome to the World of ORM .....	205
In Search of a Better Solution .....	207
Summary.....	210
<b>Chapter 11: Functions .....</b>	<b>211</b>
Function Creation.....	211
Internal Functions.....	212
User-Defined Functions .....	212
Introducing Procedural Language .....	213
Dollar Quoting.....	214
Function Parameters and Function Output: Void Functions.....	215
Function Overloading.....	216
Function Execution.....	218
Function Execution Internals.....	220
Functions and Performance .....	223
How Using Functions Can Worsen Performance .....	224
Any Chance Functions Can Improve Performance?.....	226
Functions and User-Defined Types.....	226
User-Defined Data Types .....	226
Functions Returning Composite Types .....	227
Using Composite Types with Nested Structure .....	231
Functions and Type Dependencies.....	235
Data Manipulation with Functions .....	236
Functions and Security .....	238
What About Business Logic?.....	239
Functions in OLAP Systems .....	240

Parameterizing .....	240
No Explicit Dependency on Tables and Views.....	241
Ability to Execute Dynamic SQL.....	241
Stored Procedures .....	241
Functions with No Results.....	241
Functions and Stored Procedures .....	242
Transaction Management.....	242
Exception Processing .....	243
Summary.....	244
<b>Chapter 12: Dynamic SQL .....</b>	<b>245</b>
What Is Dynamic SQL.....	245
Why It Works Better in Postgres .....	245
What About SQL Injection? .....	246
How to Use Dynamic SQL in OLTP Systems .....	246
How to Use Dynamic SQL in OLAP Systems.....	252
Using Dynamic SQL for Flexibility .....	256
Using Dynamic SQL to Aid the Optimizer .....	263
FDWs and Dynamic SQL.....	266
Summary.....	267
<b>Chapter 13: Avoiding the Pitfalls of Object-Relational Mapping .....</b>	<b>269</b>
Why Application Developers Like NORM .....	269
ORM vs. NORM.....	270
NORM Explained .....	272
Implementation Details .....	278
Complex Searches .....	283
Updates.....	286
Insert .....	287
Update .....	288
Delete .....	290

## TABLE OF CONTENTS

Why Not Store JSON?!	291
Performance Gains	291
Working Together with Application Developers	292
Summary	292
<b>Chapter 14: More Complex Filtering and Search</b>	<b>293</b>
Full Text Search	293
Multidimensional and Spatial Search	295
Generalized Index Types in PostgreSQL	295
GIST Indexes	296
Indexes for Full Text Search	296
Indexing Very Large Tables	297
Indexing JSON and JSONB	298
Summary	302
<b>Chapter 15: Ultimate Optimization Algorithm</b>	<b>303</b>
Major Steps	303
Step-by-Step Guide	304
Step 1: Short or Long?	304
Step 2: Short	304
Step 3: Long	306
Step 4: Incremental Updates	306
Step 5: Non-incremental Long Query	306
But Wait, There Is More!	307
Summary	308
<b>Chapter 16: Conclusion</b>	<b>309</b>
<b>Index</b>	<b>311</b>
