

Contents

Preface

iii

PART 1 Thermodynamics

1 Zeroth Law of Thermodynamics and Equations of State 3

2 First Law of Thermodynamics 31

3 Second and Third Laws of Thermodynamics 72

4 Fundamental Equations of Thermodynamics 102

5 Chemical Equilibrium 133

6 Phase Equilibrium 179

7 Electrochemical Equilibrium 223

8 Thermodynamics of Biochemical Reactions 259

PART 2 Quantum Chemistry

9 Quantum Theory 297

10 Atomic Structure 350

11	Molecular Electronic Structure	395
12	Symmetry	434
13	Rotational and Vibrational Spectroscopy	455
14	Electronic Spectroscopy of Molecules	497
15	Magnetic Resonance Spectroscopy	536
16	Statistical Mechanics	563
PART 3	Kinetics	
17	Kinetic Theory of Gases	603
18	Experimental Kinetics and Gas Reactions	630
19	Chemical Dynamics and Photochemistry	674
20	Kinetics in the Liquid Phase	709
PART 4	Macroscopic and Microscopic Structures	
21	Macromolecules	749
22	Electric and Magnetic Properties of Molecules	771
23	Solid-State Chemistry	786
24	Surface Dynamics	820

Appendices**A-1**

Appendix A: Physical Quantities and Units, A-3

Appendix B: Values of Physical Constants, A-7

Appendix C: Tables of Physical Chemical Data, A-8

Appendix D: Mathematical Relations, A-24

Appendix E: Greek Alphabet, A-35

Appendix F: Useful Information on the Web, A-36

Appendix G: Symbols for Physical Quantities and Their SI Units, A-37

Appendix H: Answers to Exercises, A-47

Index**I-1**
