| 1s | Introduction: aims, strategies, and method selection for fish monitoring | | | |
|-------|--------------------------------------------------------------------------------|----|--|--|
| 1.1 | Fully drainable waters (fishponds) | 09 | | |
| 1.2 | Sampling strategies: locality-based, continuous and area surveys | 09 | | |
| 1.3 | Sampling period and method selection | | | |
| 1.4 | General guidelines for catch and data processing | | | |
| 1.4.1 | Sampling for age analysis | 14 | | |
| 1.4.2 | Sampling for determination of length-weight relationships and biomass | | | |
| 1.5 | Health and safety | 15 | | |
| 1.6 | References | 16 | | |
| 2 | Sampling by gillnets | 20 | | |
| | Sampling with gillnets has many advantages, such as: | | | |
| | However, there are some drawbacks that researchers should be aware of, namely: | | | |
| 2.1 | Basic equipment | 22 | | |
| 2.2 | Other equipment | 26 | | |
| 2.3 | Sampling | 27 | | |
| 2.3.1 | Selection of sampling sites | 27 | | |
| 2.3.2 | Sampling | 30 | | |
| 2.4 | Catch evaluation | 32 | | |
| 2.5 | Corrections of gillnet catches | 32 | | |
| 2.5.1 | Mesh size selectivity | 33 | | |
| 2.5.2 | Correction for overestimation of perch | 33 | | |
| 2.5.3 | Rough eel-abundance assessment using eel attacks | 34 | | |
| 2.5.4 | Correction for gillnet saturation and avoidance | 35 | | |
| 2.5.5 | Correction for shortened exposure time | 37 | | |
| 2.6 | References | 38 | | |
| 3 | Hydroacoustic surveys | 44 | | |
| | Advantages of hydroacoustic survey: | 46 | | |
| | Limitations of hydroacoustic survey: | 46 | | |
| 3.1 | Basic equipment | 47 | | |
| 3.2 | Other equipment required | 47 | | |
| 3.3 | Sampling | 48 | | |
| 3.4 | Processing and interpretation of results | 50 | | |
| | Acknowledgment | 53 | | |
| 3.5 | References | 53 | | |
| 4 | Electrofishing | 59 | | |
| | Advantages of electrofishing: | 59 | | |
| | Limitations of electrofishing: | 60 | | |
| | Principle of electric fishing | 60 | | |
| 4.1 | Use, time and suitable conditions for electric fishing | 61 | | |

| 4 | 4.2 | Equipment | 61 |
|---|-----------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------|
| 4 | 4.2.1 | Electrofishing boat | 61 |
| | 4.2.2 | Generator unit | 62 |
| 4 | 4.2.3 | Electrodes | 63 |
| 4 | 4.3 | Additional equipment | 65 |
| 4 | 4.4 | Sampling | 66 |
| | 4.4.1 | Selection of locality and environment | 66 |
| 4 | 4.4.2 | Before sampling | 66 |
| 4 | 4.4.3 | Sampling | 67 |
| | 4.5 | The efficiency of electrofishing | 68 |
| | 4.5.1 | Biological factors | 68 |
| | 4.5.2 | Environmental factors | 69 |
| | 4.5.3 | Technical factors | 70 |
| | | Current type | 70 |
| | | Electrodes size and shape | 70 |
| | 4.6 | Catch processing | 71 |
| | 4.7 | Data processing | 71 |
| | 4.8 | Importance of correct settings | 72 |
| | 4.9 | Work safety | 72 |
| | 4.10 | References | 73 |
| | | | |
| | 5 | Sampling by beach seine nets | 76 |
| | 5 | Sampling by beach seine nets Advantages of beach seine nets: | 76 76 |
| | 5 | | |
| | 5 5.1 | Advantages of beach seine nets: | 76 |
| | | Advantages of beach seine nets: Disadvantages of beach seining: | 76 77 |
