

Celebrated guitar virtuoso and three time Grammy® nominee **Stanley Jordan** has consistently shown himself to be a musical visionary. This innovation was apparent the moment he electrified listeners with 1985's gold record 'Magic Touch' and it still resonates twenty years later with 'State Of Nature,' Jordan's first major release in over a decade and his debut for **Mack Avenue Records**.

'State Of Nature' shines with Jordan's pioneering techniques, including simultaneous playing of both guitar and piano. Backed by charismatic bassist Charnett Moffett and anchored by the soulful rhythm of drummers David Haynes and Kenwood Dennard, Jordan's writing and playing express and embrace evolution, talent and change – his own and that of the world around him.
