PART ONE

INTRODUCTORY CONSIDERATIONS 1

1 INTRODUCTION 3

Introduction 3

The Sexes Are Very Different 4

Breeding-Season Choices: The Basics 7

Case Histories 9

Information upon Which Breeding-Season Choices

Can Be Based 12

Plan of the Book 14

2 MARSHES AS BREEDING HABITATS, STUDY SITE, GENERAL METHODS, AND LIFETIME REPRODUCTIVE SUCCESS 15

Introduction 15

Marshes of the Columbia National Wildlife

Refuge (CNWR) 16

Physical Variability of Marshes in Blackbird Time 19

Seasonal Changes in Marsh Structure 20

Histories of the Marshes during Our Study 22

Seasonal Changes in Production of Blackbird Food 25

General Methods 26

Trapping and Banding; Aging 26

Monitoring Reproductive Success 27

Monitoring Territories 31

Variation in LRS	32
Causes of Variation in LRS	34
Marsh Shape: Pockets versus Strips	34
Mean Territory Tenure	35
Harem Sizes	35
Fledging Success	37
Predation Rates	37
EPCs and Mate Guarding	39
Decision-Making and Environmental Predictability: The Future from a Blackbird Perspective	39
 PART TWO	
FEMALE DECISIONS	41
 3 WHEN TO NEST: INFLUENCES AND CONSTRAINTS ON STARTING DATES	47
Introduction and Theory	47
Temporal Pattern of Nest Starts and Nest Success	48
Tests of Hypotheses to Explain Timing of Nesting	53
General Environmental Factors	53
<i>Influence of Early Spring Weather</i>	53
<i>Early Spring Food Supplies</i>	56
<i>Environmental Conditions Elsewhere</i>	58
Social Environment	60
Individual Female Attributes	61
Age	61
<i>Previous Reproductive Effort</i>	61
<i>Genetic Differences</i>	63
Renesting	64
Discussion: Why Initiation of Nesting Is So Variable	66
 4 WHERE TO NEST: INFLUENCES AND CONSTRAINTS ON SETTLING DECISIONS	70
Introduction	70
Environmental Information	72
Vegetation Structure	73
Food Supply	74
Previous Nests	75
Marsh Fidelity and Environmental Predictability	76
Social Information	77
A Mate	77
Male Neighbors	79

Identity of Harem Mates	80
Harem Size, Female-Female Aggression, and Rank in Harem	80
<i>Theoretical Considerations</i>	80
<i>Tests</i>	83
Discussion	99
Rank in Harem	100
Harem Mates and Female-Female Aggression	102
5 HOW MUCH EFFORT TO INVEST IN BREEDING AND WHEN TO STOP	104
Introduction	104
Methods	107
Results	110
RE Scores of Yearling versus Mature Females	110
RE Scores versus Survival	110
RE Score in Year x versus First Laying Date in $x + 1$	111
RE Scores versus Coloration	111
Correlation of RE Scores between Years	112
Discussion: How Much Effort to Invest	112
When and Why Females Terminate Nesting	114
Discussion: Why Females Stop Breeding	118
PART THREE	
MALE DECISIONS	121
6 HOW TO ACQUIRE A TERRITORY: THEORETICAL CONSIDERATIONS	125
Introduction	125
Current Models of Animal Contest Behavior	127
Resource-Holding Potential: Sources and Dynamics	129
Value Asymmetries: Sources and Dynamics	132
Sources of Value Asymmetries	132
Time Scales and the Development of Value Asymmetries	133
<i>Information Acquirable within the First Hour</i>	134
<i>Information Acquirable over Several Hours or Days</i>	134
<i>Information Acquirable Slowly</i>	134
Changes in Territory Value during a Breeding Season	135
Spatial Aspects of Value Asymmetries	135
Information Acquirable by Floaters	136

Behaviors Predicted by Models of Animal Contests	138
Site-Dependent Dominance	138
Dominance during Removal Experiments	138
Territorial Probing by Floaters	139
Floater Assessment of the Tenure of Territory Owners	140
Floater Assessment of the Vigor of Territory Owners	140
Patterns of Absences from Territories	141
Correlation between Male Quality and Territory Quality	141
Combinations of Models	142
7 TERRITORY ACQUISITION BY MALE REDWINGS: WHEN, WHERE, AND HOW	143
Introduction	143
The Setting: Habitat and Competition	143
Subadult Males	144
Hypothesis-Independent Predictions	144
When to Get a Territory	144
Age at Which Territories Are First Acquired	144
Territory Acquisition by Subadults	147
Time of Year	147
Where to Get a Territory: General Location	151
Natal Dispersal and Territory Ownership	151
Subadult Dispersal, Site Fidelity, and Territory Ownership	152
Habitat Type	152
How to Get a Territory	153
General Considerations and Predictions	153
Influence of Birth Year	155
Influence of Birth Date	156
Methods of Territory Establishment: Inserting versus Replacing	158
Floater Behavior and Tactics	163
<i>Longevity and General Beat Size of Floaters</i>	164
<i>Floater Reconnaissance of Eventual Territory Sites</i>	168
<i>Telemetry and Beats</i>	173
<i>Timing of Probing</i>	175
<i>Information from Removal Experiments</i>	176
Conclusions: Relative Contributions of RHP, VA, and L	181

8	HOW TO CONTINUE AS A BREEDER:	
	TERRITORIAL DOMINANCE AND MOVEMENTS	188
	Introduction and Predictions	188
	Introduction	188
	General Predictions	189
	<i>Removal Experiments and Territorial Dominance</i>	189
	<i>Morphological and Behavioral Correlates</i>	
	<i>of Dominance</i>	191
	<i>Territory Fidelity and Movements</i>	191
	<i>Territory Fidelity following Interactions with</i>	
	<i>Yellow-headed Blackbirds</i>	193
	Removal Experiments and Territorial Dominance	194
	CNWR Removals, 1983–88	194
	Other Removals	198
	Morphological, Behavioral, and Physiological Correlates	
	of Dominance	198
	CNWR Removals during 1993 and 1994	201
	Marsh and Territory Fidelity/Movements	204
	Marsh Fidelity	204
	Do Males Move to Improve Their RS?	206
	Territorial Response to Yellow-headed Blackbirds	208
	Conclusions	210
	Removal Experiments and Site Dominance	210
	Challenger Inhibition	213
	Territory Fidelity and Movements	213
	PART FOUR	
	CONCLUSIONS	217
9	ON BEING A SUCCESSFUL RED-WINGED	
	BLACKBIRD	219
	Lifetime Reproductive Success	220
	The Contrasting Decisions of Male and	
	Female Redwings	221
	The Female Strategy	222
	The Male Strategy	226
	The Contrasts	230
	Invariant Behaviors	232
	<i>Nest Building</i>	232
	<i>Nuptial Feeding</i>	234
	<i>Incubation</i>	234

<i>Territorial Defense</i>	235
<i>Helpers</i>	236
Responses to Environmental Information	238
Information about the Physical Environment	238
Information about the Nonsocial	
Biological Environment	241
<i>Vegetation Structure</i>	241
<i>Food Supplies</i>	242
<i>Predators</i>	243
<i>Yellow-headed Blackbirds</i>	245
<i>Brown-headed Cowbirds</i>	245
Information about the Intraspecific Social Environment	246
<i>Territorial Males</i>	246
<i>Settled Females</i>	248
<i>Prospecting Females</i>	248
Information about Self	249
<i>Age</i>	249
<i>Physiological Condition</i>	249
<i>Genotypically and Developmentally</i>	
<i>Controlled Traits</i>	250
Blackbirds and Sexual Selection	252
Variation in Reproductive Success	252
Sexual Selection on Male Redwings	253
Sexual Selection on Female Redwings	255
Red-winged Blackbird Intelligence	257
Associative Learning in Redwings	257
Redwing Cognitive Maps	258
Are Redwings Intelligence-Limited?	259
Final Remarks	260
Insights from Our Long-Term Study	261
<i>Slowly Accumulating Sample Sizes</i>	261
<i>Long-Term Data and Environmental Variability</i>	262
<i>Where Short-Term Data Suffice</i>	263
The Value of Multiple Tests of Hypotheses	264
The Value of a Decision-Making Approach	265
Scales of Decision-Making	266
<i>Temporal Scales of Decision-Making</i>	266
<i>Spatial Scales of Decision-Making</i>	267
References	271
Index	287
