Contents

1 Urn Models and Rudiments of Discrete Probability 1
1.1 Probability Axioms 2
1.2 Random Variables 3
1.3 Independence of Discrete Random Variables 3
1.4 Realization of Basic Discrete Distributions via Urns 5
1.4.1 The Discrete Uniform Distribution 6
1.4.2 The Bernoulli Distribution 6
1.4.3 The Binomial Distribution 7
1.4.4 The Geometric Distribution 7
1.4.5 The Negative Binomial Distribution 8
1.4.6 The Hypergeometric Distribution 9
1.4.7 The Negative Hypergeometric Distribution 10
1.4.8 The Poisson Distribution 10
1.4.9 The Multinomial Distributions 11
1.5 The Poisson Process 12
1.6 Markov Chains 16
1.6.1 Classification of Markov Chains 18
1.6.2 Chapman-Kolmogorov Equations 18
1.6.3 Limit and Stationary Distributions 20
1.7 Exchangeability 23
1.7.1 Mixtures of Distributions 26
1.7.2 de Finetti's Theorem for Indicators 27
Exercises 31

2 Some Classical Urn Problems 35
2.1 Ballot Problems 35
2.2 Occupancy Problems 37
2.3 Coupon Collector's Problems 38
2.4 The Gambler's Ruin 39
2.5 Banach's Matchbox Problem 41
Exercises 42

3 Pólya Urn Models 45
3.1 Tenability 46
3.1.1 Four Negative Numbers 48
3.1.2 Three Negative Numbers 48

3.1.3 Two Negative Numbers 48
3.1.4 One Negative Number 50
3.2 The Pólya-Eggenberger Urn 50
3.3 Bernard Friedman's Urn 54
3.4 The Bagchi-Pal urn 56
3.5 The Ehrenfest Urn 62
Exercises 67

4 Poissonization 69
4.1 The Pólya Process 69
4.2 Poissonization of Multicolor Deterministic Schemes 75
4.3 The Deterministic Monochromatic Pólya Process 76
4.4 The Pólya-Eggenberger Process 78
4.5 The Ehrenfest Process 79
4.6 Poissonization of Schemes with Random Entries 81
Exercises 85

5 The Depoissonization Heuristic 87
5.1 Depoissonization of Dichromatic Pólya Processes 91
5.2 Depoissonization of Invertible Processes 92
5.3 Depoissonization Examples 93
Exercises 96

6 Urn Schemes with Random Replacement 99
6.1 Martingales 99
6.2 Extended Urn Schemes 101
6.3 Deterministic Dichromatic Extended Urn Schemes 102
6.3.1 Laws of Large Numbers 102
6.3.2 Asymptotic Normality 108
6.4 Dichromatic Extended Urn Schemes with Random Entries 112
6.5 Extended Multicolor Urn Schemes 114
Exercises 115

7 Analytic Urns 117
7.1 Enumerating Histories in Balanced Schemes 117
7.2 Analytic Urn Examples 123
7.2.1 Analytic Pólya-Eggenberger Urn 123
7.2.2 Analytic Bernard Friedman's Urn 125
7.2.3 Analytic Ehrenfest Urn 128
7.2.4 Analytic Coupon Collector's Urn 130
Exercises 133

8 Applications of Pólya Urns in Informatics 135
8.1 Search Trees 135
8.1.1 Binary Search Trees 136
8.1.2 Fringe-Balanced Trees 138

8.1.3 *m*–Ary Search Trees 140
8.1.4 2–3 Trees 144
8.1.5 Paged Binary Trees 146
8.1.6 Bucket Quad Trees 148
8.1.7 Bucket *k*–*d* Trees 150
8.2 Recursive Trees 152
8.2.1 Standard Recursive Trees 152
8.2.2 Pyramids 158
8.2.3 Plane-Oriented Recursive Trees 159
8.2.4 Bucket Recursive Trees 160
8.2.5 Sprouts 162
Exercises 164

9 Urn Schemes in Bioscience 167
9.1 Evolution of Species 167
9.1.1 Wright-Fisher Allelic Urn Models 168
9.1.2 Gene Miscopying 169
9.1.3 Mutation 171
9.1.4 Hoppe's Urn Scheme 173
9.1.5 Ewens' Sampling Formula 179
9.1.6 Phylogenetic Trees 184
9.2 Competitive Exclusion 186
9.3 Epidemiology: Kriz' Polytonomous Urn Scheme 198
9.4 Clinical Trials 200
9.4.1 Play-the-Winner Schemes 200
Exercises 203

10 Urns Evolving by Multiple Drawing 205
10.1 Urns Evolving by Drawing Pairs of Balls 205
10.2 The Chen-Wei Urn 209
10.3 Linear Rectangular Urns 209
10.4 Application of Rectangular Schemes in Random Circuits 217
Exercises 220
