

„Happiness is a journey of the soul, in which the author finds and lets find a relief listening to a work that speaks a language that comes from an ancestral past as well as a contemporary and modern perspective.

The acoustic and the electronic sounds confer a rich and expressive language.

The silences, pauses, breaths and dilatation's represent the air that refreshes the soul allowing to face any obstacle.

Faced with the reality Fernando Saunders knows only one light. Love, Love the strict sense.”
